CCSK Test Pass4sure & Exam CCSK Practice

Everyone has the right to pursue happiness and wealth. You can rely on the CCSK certificate to support yourself. If you do not own one or two kinds of skills, it is difficult for you to make ends meet in the modern society. After all, you can rely on no one but yourself. At present, our CCSK study materials can give you a ray of hope. You can get the CCSK certification easily with our CCSK learning questions and have a better future.

Cloud Security Alliance Certificate of Cloud Security Knowledge v5 (CCSKv5.0) Sample Questions (Q162-Q167):

NEW QUESTION # 162

What is the primary role of Identity and Access Management (IAM)?

- A. To encrypt data at rest and in transit
- B. To monitor and log all user activities and traffic
- C. Ensure all users have the same level of access
- D. Ensure only authorized entities access resources

Answer: D

Explanation:

The primary role of Identity and Access Management (IAM) is to control and manage who has access to cloud resources and

ensure that only authorized users, systems, or entities are granted access. IAM involves the creation, management, and enforcement of policies that define user identities and their corresponding permissions to access specific resources. This helps prevent unauthorized access and ensures that security policies are properly enforced.

While encryption and activity monitoring are important security practices, they are not the primary focus of IAM. Similarly, IAM is about assigning appropriate access levels based on roles and needs, not ensuring all users have the same level of access.

NEW QUESTION # 163

When configured properly, logs can track every code, infrastructure, and configuration change and connect it back to the submitter and approver, including the test results.

- A. False
- B. True

Answer: B

NEW QUESTION # 164

What primary purpose does object storage encryption serve in cloud services?

- A. It secures data stored as objects
- B. It monitors unauthorized access attempts
- C. It speeds up data retrieval times
- D. It compresses data to save space

Answer: A

Explanation:

Encryption in object storage is used to secure stored data and protect it from unauthorized access, ensuring confidentiality.

NEW QUESTION # 165

Which of the following pose the biggest risk in the organization?

- A. DDoS Attacks
- B. Technology
- C. Access Controls
- D. People

Answer: D

Explanation:

People pose the biggest risk in the organization.

People form the biggest risk as they can expose the sensitive data accidentally or on purpose.

Disgruntled employees or careless employees form a great threat to the organization.

NEW QUESTION # 166

Which provides guidelines for organizational information security standards including the selection, implementation, and management of controls taking into consideration the organization's information security risk environments?

- A. FIPS 140-2
- B. ISO 27002
- C. ISO 27001
- D. NIST 800-9

Answer: B

Explanation:

ISO 27002 is a standard which provides detailed description of security controls and how they need to be implemented to provide
