What is the function of WalkMe in the toolchain?

- A. Providing user guidance and enablement
- B. Automating data backup
- C. Supporting interface testing
- D. Supporting test automation

Answer: A

Explanation:

WalkMe is an end-user enablement tool integrated into SAP transformation programs to ensure smooth adoption and reduce user learning challenges. It provides interactive guidance, on-screen instructions, and automated walkthroughs directly within the SAP application interface. This allows users to follow step-by-step workflows while performing tasks in real time, significantly improving their ability to adapt to new processes and system changes introduced during transformation.

During deployments, WalkMe accelerates onboarding by reducing training time and minimizing errors. It also supports change
