How should the engineer temporarily allow all prefixes to be learned by the routers again without adjusting the existing access list?

- A. A permit any statement should be added before completing the ACL with the required prefixes and then the permit any statement can be removed.
- B. A permit 20 statement should be added before completing the ACL with the required prefixes, and then the permit 20 statement can be removed.
- C. A continue statement should be added within the permit 10 statement before completing the ACL with the required prefixes, and then the continue statement can be removed.

- A. The ASBRs are advertising the redistributed prefixes with a different admin distance and must be changed to 110 on ASBR 10.4.15.5.
- B. The ASBRs are advertising the redistributed prefixes as Type 1 and must be modified to Type 2
- C. The ASBRs are advertising the redistributed prefixes with the iBGP metric and must be modified to Type 1 on ASBR 10.4.17.6.
- D. The admin distance of the prefixes must be adjusted to 20 on ASBR 10.4.15.5 to advertise prefixes to R1 identically from both ASBRs.
