Online DP-203 Lab Simulation & New DP-203 Dumps Files

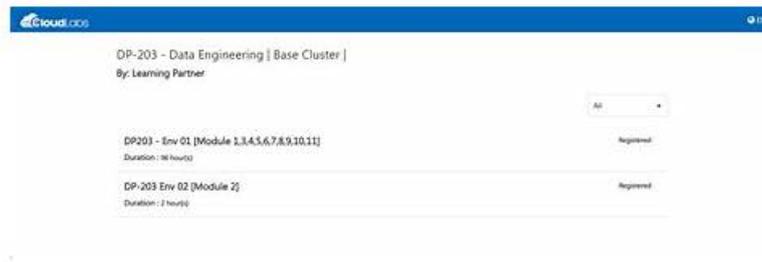

P.S. Free 2025 Microsoft DP-203 dumps are available on Google Drive shared by TestkingPass: https://drive.google.com/open?id=1iDn782JqOV0UySu1qJFPt8NLqNQmUATe

Maybe you have desired the DP-203 certification for a long time but don't have time or good methods to study. Maybe you always thought study was too boring for you. Our DP-203 study materials will change your mind. With our DP-203 exam questions, you will soon feel the happiness of study. Just look at the three different versions of our DP-203 learning quiz: the PDF, Software and APP online which can apply to study not only on the paper, but also can apply to study on IPAD, phone or laptop.

TestkingPass can not only save you valuable time, but also make you feel at ease to participate in the exam and pass it successfully. TestkingPass has good reliability and a high reputation in the IT professionals. You can free download the part of Microsoft DP-203 exam questions and answers TestkingPass provide as an attempt to determine the reliability of our products. I believe you will be very satisfied of our products. I have confidence in our TestkingPass products that soon TestkingPass's exam questions and answers about Microsoft DP-203 will be your choice and you will pass Microsoft certification DP-203 exam successfully. It is wise to choose our TestkingPass and TestkingPass will prove to be the most satisfied product you want.

New DP-203 Dumps Files | DP-203 Passleader Review

We have special online worker to solve all your problems. Once you have questions about our DP-203 latest exam guide, you can directly contact with them through email. We are 7*24*365 online service. We are welcome you to contact us any time via email or online service. We have issued numerous products, so you might feel confused about which DP-203 study dumps suit you best. You will get satisfied answers after consultation. Our online workers are going through professional training. Your demands and thought can be clearly understood by them. Even if you have bought our high-pass-rate DP-203 training practice but you do not know how to install it, we can offer remote guidance to assist you finish installation. In the process of using, you still have access to our after sales service. All in all, we will keep helping you until you have passed the DP-203 exam and got the certificate.

Microsoft Data Engineering on Microsoft Azure Sample Questions (Q253-Q258):

NEW QUESTION # 253
You have two Azure SQL databases named DB1 and DB2.
DB1 contains a table named Table 1. Table1 contains a timestamp column named LastModifiedOn. LastModifiedOn contains the timestamp of the most recent update for each individual row.
DB2 contains a table named Watermark. Watermark contains a single timestamp column named WatermarkValue.
You plan to create an Azure Data Factory pipeline that will incrementally upload into Azure Blob Storage all the rows in Table1 for which the LastModifiedOn column contains a timestamp newer than the most recent value of the WatermarkValue column in Watermark.
You need to identify which activities to include in the pipeline. The solution must meet the following requirements:
* Minimize the effort to author the pipeline.
* Ensure that the number of data integration units allocated to the upload operation can be controlled.
What should you identify? To answer, select the appropriate options in the answer area.

To retrieve the watermark value, use: | Lookup ▼ |

Filter
Get Metadata
Lookup

To perform the upload, use: | Copy data ▼ |

Copy data
Custom
Data flow

Answer:

Explanation:

Answer Area

To retrieve the watermark value, use: | Lookup ▼ |

Data flow

NEW QUESTION # 254
You are designing an application that will store petabytes of medical imaging data When the data is first created, the data will be accessed frequently during the first week. After one month, the data must be accessible within 30 seconds, but files will be accessed infrequently. After one year, the data will be accessed infrequently but must be accessible within five minutes.
You need to select a storage strategy for the dat
a. The solution must minimize costs.
Which storage tier should you use for each time frame? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

First week: | ▼ |

NEW QUESTION # 255

You have an Azure subscription that contains a Microsoft Purview account named MP1, an Azure data factory named DF1, and a storage account named storage. MP1 is configured

10 scan storage1. DF1 is connected to MP1 and contains 3 dataset named DS1. DS1 references 2 file in storage.

In DF1, you plan to create a pipeline that will process data from DS1.

You need to review the schema and lineage information in MP1 for the data referenced by DS1.

Which two features can you use to locate the information? Each correct answer presents a complete solution.

NOTE: Each correct answer is worth one point.

- A. the Storage browser of storage1 in the Azure portal
- B. the search bar in the Azure portal
- C. the search bar in the Microsoft Purview governance portal
- D. the search bar in Azure Data Factory Studio

Answer: A,C

Explanation:
* The search bar in the Microsoft Purview governance portal: This is a feature that allows you to search for assets in your data estate using keywords, filters, and facets. You can use the search bar to find the files in storage1 that are referenced by DS1, and then view their schema and lineage information in the asset details page12.
* The search bar in Azure Data Factory Studio: This is a feature that allows you to search for datasets, linked services, pipelines, and other resources in your data factory. You can use the search bar to find DS1 in DF1, and then view its schema and lineage information in the dataset details page. You can also click on the Open in Purview button to open the corresponding asset in MP13.
The two features that can be used to locate the schema and lineage information for the data referenced by DS1 are the search bar in Azure Data Factory Studio and the search bar in the Microsoft Purview governance portal.
The search bar in Azure Data Factory Studio allows you to search for the dataset DS1 and view its properties and lineage. This can help you locate information about the source and destination data stores, as well as the transformations that were applied to the data.
The search bar in the Microsoft Purview governance portal allows you to search for the storage account and view its metadata, including schema and lineage information. This can help you understand the different data assets that are stored in the storage account and how they are related to each other.
The Storage browser of storage1 in the Azure portal may allow you to view the files that are stored in the storage account, but it does not provide lineage or schema information for those files. Similarly, the search bar in the Azure portal may allow you to search for resources in the Azure subscription, but it does not provide detailed information about the data assets themselves.

* What is Azure Purview?
* Use Azure Data Factory Studio

NEW QUESTION # 256
You have an Azure Active Directory (Azure AD) tenant that contains a security group named Group1. You have an Azure Synapse Analytics dedicated SQL pool named dw1 that contains a schema named schema1.
You need to grant Group1 read-only permissions to all the tables and views in schema1. The solution must use the principle of least privilege.
Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.
NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Answer:

Explanation:

Reference:
https://docs.microsoft.com/en-us/azure/data-share/how-to-share-from-sql

NEW QUESTION # 257
You have an Azure subscription that contains a logical Microsoft SQL server named Server1. Server1 hosts an Azure Synapse Analytics SQL dedicated pool named Pool1.
You need to recommend a Transparent Data Encryption (TDE) solution for Server1. The solution must meet the following requirements:
Track the usage of encryption keys.
Maintain the access of client apps to Pool1 in the event of an Azure datacenter outage that affects the availability of the encryption keys.
What should you include in the recommendation? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

To track encryption key usage: [dropdown]
- Always Encrypted
- TDE with customer-managed keys
- TDE with platform-managed keys

To maintain client app access in the event of a datacenter outage: [dropdown]
- Create and configure Azure key vaults in two Azure regions.
- Enable Advanced Data Security on Server1.
- Implement the client apps by using a Microsoft .NET Framework data provider.
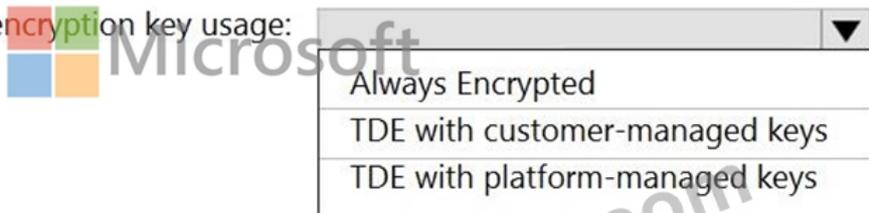

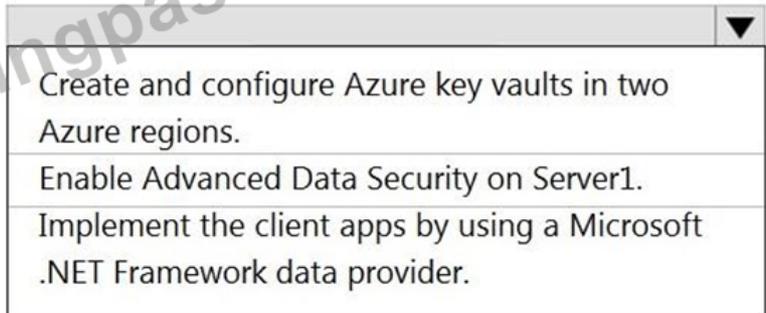

Answer:

Explanation:

To track encryption key usage: [dropdown]
- Always Encrypted
- **TDE with customer-managed keys** ← selected
- TDE with platform-managed keys

To maintain client app access in the event of a datacenter outage: [dropdown]
- **Create and configure Azure key vaults in two Azure regions.** ← selected
- Enable Advanced Data Security on Server1.
- Implement the client apps by using a Microsoft .NET Framework data provider.
