Salesforce Certified Experience Cloud Consultant Sample Questions (Q35-Q40):

NEW QUESTION # 35

Universal Containers (UC) updates its Salesforce CMS content often to meet the needs of its customers. The site builder wants to use a template with out-of-the-box components that dynamically update the CMS content on its Experience Cloud site. Which template should the site builder use?

- A. Build Your Own (Aura)
- B. Salesforce Tabs + Visualforce
- C. Customer Service
- **D. Build Your Own (LWR)**

Answer: D

NEW QUESTION # 36

Recently, Ursa Major Solar (UMS) decided it no longer wants to utilize Data Categories to control article visibility for its customer portal. UMS's users will need to be logged in to the portal in order to view any Knowledge articles. Outside of Data Categories, what is another way UMS can control Knowledge article visibility?

- **A. Permission Sets**
- B. Audience Targeting
- C. Branding Sets
- D. Sharing Rules

Answer: A

Explanation:

Permission sets are a feature that allows you to grant additional permissions to users without changing their profiles. You can use permission sets to control Knowledge article visibility by granting users access to specific article types and actions. For example, you can create a permission set that allows users to view only certain article types and assign it to your customer portal users.

NEW QUESTION # 37

Dreamscape Flowers (DF) is a well-known global with a large network of partners in various regions DF currently has a number of manual process with varied complexity. Some of these processes involve lifecycle management that DF is looking to automate as part of a broad digital transformation initiative.

In what three ways can Salesforce Partnership Management (PRM) help DF?

Choose 3 answers

- A. Providing reports and dashboards access to partners
- B. Automating partner onboarding process
- C. Preventing channel conflict
- D. Helping partners manage their payments and file taxes

Answer: A,B,C

NEW QUESTION # 38

How can Sharing Sets be used to share records with Customer Community users?

- A. Create one Set per object and add the Customer Community profiles to each Sharing Set.
- B. Create one Sharing Set and add the objects to share in the Sharing Set.
- C. Create one Sharing Set, select the 'All Objects' options for the Sharing Set, and add the Customer Community profiles to the Sharing Set.
- D. Create one Sharing Set and use a Sharing Rule to share records with users in the Sharing Set.

Answer: B

Explanation:

To share records with Customer Community users using Sharing Sets, you should create one Sharing Set and add the objects to share in the Sharing Set. A Sharing Set is a feature that allows you to share records with Customer Community users based on common account or contact fields. For example, you can share records with users who have the same account ID or contact ID as the record owner. To use Sharing Sets, you need to create one Sharing Set and add the objects that you want to share in the Sharing Set. You can then define the access level and criteria for each object.

NEW QUESTION # 39

Northern Trail Outfitters wants to add a background image to a record list of products in its digital experience.

How should an administrator accomplish this?

- A. Build a custom Lightning component.
- B. Use an HTML component
- C. Create CMS items.
- D. Use a Flexible page layout.

Answer: A

Explanation:

To add a background image to a record list of products in its digital experience, an administrator should build a custom Lightning component. A Lightning component is a reusable unit of user interface that you can create and customize using code. A custom Lightning component allows you to add your own functionality and design to your Experience Cloud site. To add a background image to a record list of products, an administrator should build a custom Lightning component that uses the SLDS Background Image utility class and the lightning-record-list base component.
