Our C\_BCBAl\_2502 exam materials understand you and hope to accompany you on an unforgettable journey.

### SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q23-Q28):

#### NEW QUESTION # 23

How does SAP AI support HR operations?

There are 2 correct answers to this question.

Response:

- A. Legacy payroll processing without AI integration
- B. AI-powered recruitment and candidate screening
- C. Manual job application sorting
- D. Predictive workforce analytics

Answer: B,D

#### NEW QUESTION # 24

If a company implements SAP's Business AI offerings comprehensively, all things being equal, which bottom-line benefits could they expect? Note: There are 2 correct answers to this question.

- A. Revenue increase: up to 1.4%
- B. Gross profit increase: up to 1.4%
- C. Revenue increase: up to 3.5%
- D. Gross profit increase: up to 3.5%

Answer: B,C

Explanation:

Implementing SAP Business AI comprehensively can lead to significant financial benefits. According to SAP's official documentation, businesses can expect:

- \* An estimated 1.4% increase in gross profits.
- \* An estimated 3.5% increase in revenue.

These figures are based on SAP's analysis of the impact of AI-driven efficiencies and enhancements across various business processes. For instance, a company with €10 billion in revenue could see an annual bottom-line benefit of €141 million and a revenue impact of €352 million.

#### NEW QUESTION # 25

(How can Joule for ABAP development support developers? Note: There are 3 correct answers to this question.)

- A. By explaining ABAP code
- B. By creating unit tests
- C. By generating ABAP business objects
- D. By creating ABAP coding learning journeys
- E. By debugging ABAP programs

Answer: A,B,C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: Joule for ABAP development supports developers by explaining ABAP code to aid understanding of logic and structure, creating unit tests to automate testing and improve code quality, and generating ABAP business objects to accelerate development using the ABAP RESTful Application Programming Model (RAP). These capabilities enhance productivity and proficiency in end-to-end ABAP development.

Exact extracts supporting this:

Explaining ABAP code: "Joule generates explanations of selected ABAP code or ABAP core data services (CDS) views to help you quickly understand the programming logic and code written ..." sap.com Creating unit tests: "New generative AI capabilities are designed to help you write, optimize, and test ABAP code more efficiently. From generating code suggestions

..." community.sap.com (Implying unit test generation as part of testing efficiency.) Generating ABAP business objects: "We are introducing new generative AI capabilities in ABAP Cloud to increase developer efficiency. The first scope of features will cover business object ..." learning.sap.com "Generative AI for ABAP development. With new ABAP capabilities, Joule can now help ABAP developers be more efficient with their development ..." community.sap.com Other options are incorrect because:

Option D: Joule provides suggestions and automation but does not directly debug programs; debugging remains a developer task supported by tools like ADT.

Option E: Joule focuses on practical development assistance rather than creating educational learning journeys, which are handled by SAP Learning platforms.

Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Based on SAP News articles like "Introducing Joule for Developers: AI-Powered Capabilities Across SAP" and SAP Help Portal for "Joule for Developers, ABAP AI Capabilities." These position Joule as an AI tool for ABAP within the SAP Business Suite, as covered in the C\_BCBAl\_2502 certification and learning journeys for generative AI in development.

## NEW QUESTION # 26

A retail business wants to use AI for automating customer support while ensuring personalized customer interactions. Which SAP AI solutions should they implement?

There are 3 correct answers to this question.

Response:

- A. SAP Predictive Analytics
- B. SAP Conversational AI
- C. SAP AI Business Service
- D. SAP AI for Customer Experience
- E. SAP Blockchain for Business

**Answer: B,C,D**

## NEW QUESTION # 27

How does SAP AI support HR operations? Note: There are 2 correct answers to this question.

- A. Legacy payroll processing without AI integration
- B. AI-powered recruitment and candidate screening
- C. Manual job application sorting
- D. Predictive workforce analytics

**Answer: B,D**

Explanation:

SAP AI enhances HR operations by automating processes and providing data-driven insights to optimize recruitment and workforce management. The correct answers are AI-powered recruitment and candidate screening and predictive workforce analytics, as these are core functionalities documented in SAP's HR AI solutions.

SAP documentation states: "AI in human resources involves using artificial intelligence to streamline and enhance HR processes such as recruitment, employee engagement, and performance management. It automates repetitive tasks, analyzes large volumes of data for better decision-making, and offers personalized experiences for employees." SAP SuccessFactors AI supports AI-powered recruitment and candidate screening by "using machine learning to analyze candidate profiles and match them to job requirements," improving hiring efficiency. Predictive workforce analytics enables organizations to "predict employee attrition rates and workforce trends" by analyzing data on engagement, performance, and skills, as seen in SAP SuccessFactors' talent intelligence hub. For example, FC Bayern's use of SAP SuccessFactors AI demonstrates enhanced recruitment and retention through predictive insights. The incorrect options-manual job application sorting and legacy payroll processing without AI integration- are not AI-driven. Manual job application sorting contradicts SAP's automation focus, and legacy payroll processing without AI is outdated and not part of SAP's modern HR solutions. SAP's emphasis on AI-driven HR processes confirms the selected functionalities.

## NEW QUESTION # 28

A free trial service is provided for all customers by C\_BCBAl\_2502 study materials, whose purpose is to allow customers to understand our products in depth before purchase. Many students often complain that they cannot purchase counseling materials suitable for themselves. A lot of that stuff was thrown away as soon as it came back. However, you will definitely not encounter such a problem when you purchase C\_BCBAl\_2502 Study Materials. All consumers who are interested in C\_BCBAl\_2502 study materials can download our free trial database at any time by visiting our platform.
