ED-Con-101 최신 인증 시험 기출 자료 - ED-Con-101 시험 문제 모음

Fast2test의 Salesforce 인증 ED-Con-101 시험 덤프 공부 자료는 pdf 버전과 소프트웨어 버전 두 가지 버전으로 제공되는데 Salesforce 인증 ED-Con-101 실제 시험에 상 문제가 포함되어 있습니다. 덤프의 예상 문제는 Salesforce 인증 ED-Con-101 실제 시험의 대부분 문제를 적중하여 높은 통과율과 점유율을 자랑하고 있습니다. Fast2test의 Salesforce 인증 ED-Con-101 덤프를 선택하시면 IT 자격증 취득에 더할 것 없는 힘이 될 것입니다.

최신 Salesforce Consultant ED-Con-101 무료샘플문제 (Q206-Q211):

질문 # 206

An Advancement office wants a declaratively configured, public-facing form that creates data in Salesforce. Which solution should the consultant recommend to meet the requirement?

- A. Process Builder
- **B. An app on the AppExchange**
- C. Email-to-case

정답: B

설명:

The consultant should recommend an app on the AppExchange to create a declaratively configured, public-facing form that creates data in Salesforce, such as FormAssembly or Formstack, which are web form builders that integrate with Salesforce. Process Builder is a tool that automates business processes based on certain criteria or actions, not a form builder. Email-to-case is a feature that converts emails from customers into cases in Salesforce, not a form builder. Reference:

질문 # 207

An Admissions office is using Admissions Connect to manage its student application review process. The office needs to make sure applications are unable to be edited after the submission deadline. Which functionality should the consultant use to meet this requirement?

- A. Create custom Open Date and Due Date fields.
- **B. Leverage the Open Date and Due Date fields.**
- C. Develop a custom trigger that checks the submission deadline against the current date.

정답: B

설명:

The consultant should leverage the Open Date and Due Date fields to meet the requirement of making sure applications are unable to be edited after the submission deadline for the Admissions office that is using Admissions Connect to manage its student application review process. The Open Date and Due Date fields are fields on the Application object in Admissions Connect that allow users to specify when an application is open or closed for submission. The Open Date field indicates the date and time when an application can be submitted by an applicant. The Due Date field indicates the date and time when an application can no longer be submitted by an applicant. The consultant can leverage the Open Date and Due Date fields to meet the requirement of making sure applications are unable to be edited after the submission deadline for the Admissions office that is using Admissions Connect to manage its student application review process by configuring and customizing these fields to match their application deadlines and policies.

Creating custom Open Date and Due Date fields, developing a custom trigger that checks the submission deadline against the current date, or activating the ApplicantCommunityHomePageController Apex class are not functionalities that the consultant should use to meet the requirement of making sure applications are unable to be edited after the submission deadline for the Admissions office that is using Admissions Connect to manage its student application review process. 질문 # 208

A university is implementing a student community and rolling it out to 20,000 students. The IT manager is concerned about the large increase in users accessing the system at any one time. Which step should the consultant recommend?

- A. Log a case with Salesforce Support to increase limits.
- B. Use a third-party testing automation tool.
- **C. Develop a Performance Testing Strategy.**

정답: C

설명:

The step that the consultant should recommend to the IT manager who is concerned about the large increase in users accessing the student community at any one time is B. Develop a Performance Testing Strategy¹. This is because a performance testing strategy can help the IT manager to plan, execute, and analyze tests that measure the system's performance, scalability, reliability, and availability under various user loads and scenarios. A performance testing strategy can also help the IT manager to identify and resolve any performance issues or bottlenecks before the student community goes live, and to ensure that the system meets the expected service level agreements and user satisfaction².

A. Use a third-party testing automation tool and C. Log a case with Salesforce Support to increase limits are not valid steps for this scenario. Using a third-party testing automation tool may be a part of the performance testing strategy, but it is not a step by itself. The IT manager needs to define the objectives, scope, approach, tools, and metrics of the performance testing strategy before choosing and using a testing automation tool². Logging a case with Salesforce Support to increase limits may be a possible action that the IT manager can take after conducting the performance testing and analyzing the results, but it is not a step that the consultant should recommend before the testing. The IT manager needs to determine the current and expected system capacity, throughput, response time, and resource utilization before requesting any limit increases from Salesforce Support³.

질문 # 209

The Alumni Relations department wants to track alumni and its chapter memberships. The department wants to easily see the Primary Chapter on the Contact record. The system admin prefers to use the standard features that are available with Education Data Architecture (EDA).

Which step should the consultant take to meet this requirement?

- A. Create an Affiliation record type for Alumni Chapter and a custom field for the Primary Chapter on the Contact record.
- B. Create a custom picklist value for Alumni Chapter on the Affiliation object.
- C. Create an Affiliation mapping to the Primary Chapter field in EDA Settings.

정답: C

설명:

The Education Data Architecture (EDA) allows you to map fields from the Affiliation object to the Contact object, so that when an Affiliation record is created or updated, the mapped fields are automatically populated on the Contact record. This way, you can track the primary chapter of an alumni on the Contact record without creating a custom field or record type²³

질문 # 210

An Admissions office wants to digitize and automate transcript requests. Currently, applicants, must follow a set of manual steps they could be more user friendly. The Admissions office wants a declaratively configured, public facing form that created data in Salesforce.

Which solution should the consultant recommend to meet the requirement?

- A. Process Builder
- B. App on the AppExchange
- C. Salesforce Files
- D. Email-to-case

정답: B

설명:

An app on the AppExchange is a solution that the consultant can recommend to meet the requirement of creating a declaratively configured, public facing form that creates data in Salesforce. An app on the AppExchange is an application that provides additional features and solutions for Salesforce. There are many apps on the AppExchange that offer form building capabilities, such as creating web forms, surveys, or quizzes, and capturing data from them in Salesforce. The consultant can help the Admissions office choose an app that meets their needs and budget. Email-to-case, Process Builder, and Salesforce Files are not solutions that can create a declaratively configured, public facing form that creates data in Salesforce. Reference:
