Huawei is a leading provider of telecommunications equipment and solutions, and its transmission products are widely used by service providers and enterprises around the world. By earning the HCIP-Transmission V2.5 certification, candidates will gain a competitive edge in the job market and be recognized as experts in Huawei's transmission network technologies. HCIP-Transmission V2.5 certification is also a stepping stone to higher-level Huawei certifications, such as the HCIE-Transmission, which is the highest level of certification in this domain.

Huawei H31-341_V2.5 (HCIP-Transmission V2.5) Exam is an advanced level certification exam that is designed to test the knowledge and skills of professionals who are involved in the planning, designing, and maintenance of transmission networks. H31-341_V2.5-ENU Exam is targeted towards individuals who have already completed the HCNA-Transmission certification and are looking to further enhance their expertise in the field of transmission technology.

Huawei HCIP-Transmission V2.5 Sample Questions (Q52-Q57):

NEW QUESTION # 52

Regarding the operation of deleting paths from the network management system, which of the following statements is wrong?

- A. After the path is deleted from the network layer and the network element layer, the service will be interrupted
