## Cisco Performing CyberOps Using Cisco Security Technologies Sample Questions (Q46-Q51):

### NEW QUESTION # 46

An engineer received multiple reports from users trying to access a company website and instead of landing on the website, they are redirected to a malicious website that asks them to fill in sensitive personal data. Which type of attack is occurring?

- A. Address Resolution Protocol poisoning
- B. session hijacking attack
- C. teardrop attack

- **D. Domain Name System poisoning**

**Answer: D**

#### NEW QUESTION # 47

Drag and drop the threat from the left onto the scenario that introduces the threat on the right. Not all options are used.

□

**Answer:**

Explanation:

□

#### NEW QUESTION # 48

Drag and drop the telemetry-related considerations from the left onto their cloud service models on the right.

□

**Answer:**

Explanation:

□

#### NEW QUESTION # 49

What is the purpose of hardening systems?

- A. to create the logic that triggers alerts when anomalies occur
- **B. to securely configure machines to limit the attack surface**
- C. to analyze attacks to identify threat actors and points of entry
- D. to identify vulnerabilities within an operating system

**Answer: B**

#### NEW QUESTION # 50

A company recently completed an internal audit and discovered that there is CSRF vulnerability in 20 of its hosted applications. Based on the audit, which recommendation should an engineer make for patching?

- **A. Fix applications according to the risk scores**
- B. Validate CSRF by executing exploits within Metasploit
- C. Identify the business applications running on the assets
- D. Update software to patch third-party software

**Answer: A**

Explanation:

When dealing with a CSRF vulnerability discovered in multiple applications, the recommended approach is to prioritize patching based on the risk scores associated with each application. This ensures that the most critical vulnerabilities that pose the greatest risk to the organization are addressed first. It is a strategic approach that aligns remediation efforts with the potential impact of the vulnerabilities.

#### NEW QUESTION # 51
