The benefit in Obtaining the API-580 Exam Certification

- Risk Based Inspection Certification provides practical experience to candidates from all the aspects to be a proficient worker in the organization.
- Risk Based Inspection will be confident and stand different from others as their skills are more trained than non-certified professionals.
- Risk Based Inspection Certifications provide opportunities to get a job easily in which they are interested in instead of wasting years and ending without getting any experience.
- Risk Based Inspection Certification is distinguished among competitors. Risk Based Inspection certification can give them an edge at that time easily when candidates appear for a job interview employers seek to notify something which differentiates the individual to another.

API Risk Based Inspection Professional Sample Questions (Q52-Q57):

NEW QUESTION # 52

Following are not the residual risk factors for loss of containment.

- A. Fundamental limitations of inspection method
- B. Natural disasters
- C. Human error
- D. Toxic fluid containment

Answer: D

NEW QUESTION # 53

No deterioration found in the inspection program but still failure can occur under the following conditions.

- A. As a result of change or process upset condition
- B. All the above
- C. During plant construction period

Answer: A

NEW QUESTION # 54

Which of the following statements is generally correct with regard to qualitative RBI analysis using a broad range of data?

- A. It generally results in lower accuracy analysis.
- B. It requires a high-level of judgment, skill, and understanding.
- C. It does not require a high level of accuracy and precision in the data.
- D. It is generally improved by utilizing numeric data.

Answer: B

Explanation:

API 580 Section 7.2.2 states:

"Generally a qualitative analysis using broad ranges requires a higher level of judgment, skill, and understanding from the user than a more quantitative approach." This confirms that qualitative methods require more professional judgment even though they are simpler in format. It is not simply about using less accurate or numeric data but about the user's expertise.

Reference: API 580, 2nd Edition (2016), Section 7.2.2

NEW QUESTION # 55

Act of mitigating a known risk to a lower level of risk.

- A. Risk reduction
- B. Risk management
- C. Risk mitigation

Answer: A

NEW QUESTION # 56

Which of the following statements is correct with regard to the potential reduction of inspection cost by using RBI?

- A. RBI will probably raise the total cost of inspection for a given unit.
- B. RBI will eliminate many internal inspections.
- C. Equipment integrity is the focus.
- D. On-stream inspections are as effective as internal inspections.

Answer: C

Explanation:

API 580 highlights that while cost reduction is a potential benefit of RBI, the true focus is risk management and equipment integrity. From Section 12.5:

"Inspection costs can be more effectively managed through the use of RBI... The user should recognize that while there is a potential

for the reduction of inspection costs through the utilization of RBI, increased equipment integrity and inspection cost optimization should remain the focus." This confirms that the main driver for RBI is not cost elimination, but rather the intelligent allocation of inspection resources to preserve equipment integrity.

Option B is incorrect because RBI does not guarantee elimination of internal inspections - only that some may be deferred or replaced with alternative methods.

Option C generalizes effectiveness without case-by-case evaluation.

Option D is false; RBI is designed to optimize, not increase costs.

Reference: API 580, 2nd Edition (2016), Section 12.5

NEW QUESTION # 57
