- A. Order and order item details
- B. Assets and inventory item records
- C. Commercial and technical product configurations
- D. Fulfillment request and fulfillment request line records
- E. Quote and quote line items records

Answer: A,B,C

NEW QUESTION # 62

During the discovery phase a consultant learns that provisioning the internet service requires multiple steps of integration. The first step returns an identifier that is required for the second step, but is meaningless in ensuring steps afterwards. How should the consultant implement this requirement in Order Management with the least amount of configurations?

- A. Create a Callout that uses a customer adaptor. This adaptor is implemented in Apex and can make both callouts and keep the identifier in memory in between callouts
- B. Implement the integration using an integration procedure, which can make both callouts, and pass identifier as a variable from one step to another
- C. Model a non-assetizable attribute on the technical product to hold the identifiers configure both orchestration items for provisioning on the same swimlane
- D. Implement the multiple call logic in Enterprise service Bus and have a single callout to the ESB in orchestration

Answer: C

NEW QUESTION # 63

A consultant analyzing integrations to various fulfillment systems. While the consultant believes that process shall be automated, they have identified one particular complex integration that has a formatted payload that verify JSON Implemented for nonstandard error response to be returned to order management from the fulfillment system. How should the consultant solve this use case?

- A. Use a dataRaptor to grab the JSON payload from Order Management to pass it to the fulfillment system directly.
- B. Attach an OmniScript to task and handle the integration manually
- C. Recommend that this step to be handled manually by having the user navigation to the fulfillment system's native UIlogic
- D. Use Apex to be able to send the customized payload and interpret the response

Answer: D

NEW QUESTION # 64

Universal Containers (UC) is implementing communication cloud. One of the KPIs for their digital transformation is to reduce time to market for new product and products changes since it currently takes three-month end to end to launch new product. Which two actions will help measure product time to market in communication cloud?

- A. Create a Salesforce Report on the Product object to track the product time to market
- B. Leverage the EPC functionality to track the product related configuration.
- C. Create a Product Time to market app from template in CRM analytics to track the product time to market
- D. Create Salesforce report on EPC project object to track the product time to market.

Answer: D

NEW QUESTION # 65

UC is communications service provider using communication cloud. UC have one callout to the activation system per mobile services and then one calls out to the billing system per item decomposed. How should consultant configure the orchestration to meet the requirement

- A. Create two orchestration plan definition with single orchestration item definition, each orchestration dependency on orchestration item. Set the scope of activation orchestration plan to order and scope of the billing orchestration item to order line item
- B. Create two orchestration plan definition with single orchestration item definition, each orchestration item Set the scope of activation orchestration plan to order and scope of the billing orchestration item to global.
- C. Create an orchestration plan definition with two orchestration item definition with an orchestration dependency between activation orchestration item to main order item and the scope of the billing orchestration item to order
- D. Create an orchestration plan definition with two orchestration item definition with an orchestration dependency between activation orchestration item to order item and the scope of the billing orchestration item to global

Answer: C

NEW QUESTION # 66
