Customizable C-ACDET-2506 Practice Test Software

If you follow the steps of our C-ACDET-2506 exam questions, you can easily and happily learn and ultimately succeed in the ocean of learning. And our C-ACDET-2506 exam questions can help you pass the C-ACDET-2506 exam for sure. Choosing our C-ACDET-2506 exam questions actually means that you will have more opportunities to be promoted in the near future. We are confident that in the future, our C-ACDET-2506 Study Tool will be more attractive and the pass rate will be further enhanced. For now, the high pass rate of our C-ACDET-2506 exam questions is more than 98%.

SAP C-ACDET-2506 Exam Syllabus Topics:

Topic	Details
Topic 1	• Deploy and Migration: This part of the exam assesses the expertise of an SAP Deployment Specialist and focuses on the final deployment of the configured solution and the data migration process. Candidates should demonstrate a solid grasp of how to move configurations from a testing environment into production while minimizing disruption. It also includes knowledge of tools and strategies used for data extraction.
Topic 2	• Project Overview, Roles and Responsibilities: This section of the exam measures the skills of an SAP Cloud Consultant and covers the fundamental understanding of SAP Activate methodology within the context of a cloud implementation project. Candidates are expected to be familiar with the project lifecycle, including phases such as Prepare, Explore, Realize, Deploy, and Run. This part also focuses on identifying key roles and responsibilities within a cloud project team, ensuring clarity in collaboration between consultants, clients, and SAP. It checks whether the consultant understands governance, stakeholder management, and the high-level structure of cloud deployment using SAP best practices.
Topic 3	• Field Configuration: This domain evaluates the knowledge of an SAP Deployment Specialist and focuses on customizing and configuring business fields in the SAP system according to client-specific needs. This includes adjusting system settings for master data, transaction data, and other essential field-level controls to support business processes effectively. The section tests the candidate's ability to use configuration tools, apply SAP standard templates, and ensure that the field configurations align with the desired operational workflows of the business. It also touches upon validation, testing, and documenting the configuration changes made during the implementation.

SAP Certified Associate - Configuring SAP Ariba Strategic Sourcing Suite Sample Questions (Q21-Q26):

NEW QUESTION # 21
The full SAP Ariba Strategic Sourcing suite baseline (Greenfield baseline scenario) has been applied to the customer Test site. The customer and project team will configure SAP Ariba Sourcing and deploy that to the Production site, then configure and deploy the remaining solutions in stages. What does this mean for subsequent migration activities?

- A. If the baseline applied the full suite, the full suite must be configured and migrated to production at the same time.
- B. Subsequent migration activities follow Bluefield deployment scenario.
- C. Both SAP Ariba Sourcing as well as subsequent migration activities would be Brownfield deployments.
- D. Subsequent migration activities will require a complete reconfiguration of existing solutions.

Answer: C

NEW QUESTION # 22
Which key technical activities occur during the Deploy phase? (Select 3 correct answers)

- A. Migration to production
- B. Apply the bundle in production
- C. Rebuild all custom header fields in production
- D. Go-live
- E. Execute change management plans

Answer: A,B,D

Explanation:

During theDeploy phase, key technical activities include:
* A. Apply the bundle in production:Using Intelligent Configuration Manager (ICM) to migrate configuration bundles to the production environment.
* B. Go-live:Transitioning from project mode to operational live usage of the SAP Ariba solution.
* D. Migration to production:Performing final configuration migration, data loads, and cutover activities per the deployment plan.Rebuilding custom header fields manually (C) is not required because configuration is migrated rather than rebuilt. Executing change management plans (E) is important but considered a business/change activity, not a technical migration activity.These technical tasks ensure the system is correctly configured and operationally ready for end users.

NEW QUESTION # 23
Which key technical activities occur during the Deploy phase? Note: There are 3 correct answers to this question.

- A. Migration to production
- B. Apply the bundle in production
- C. Rebuild all custom header fields in production
- D. Go-live
- E. Execute change management plans

Answer: A,B,D

NEW QUESTION # 24
What actions can typically be performed on existing fields? (Select 3 correct answers)

- A. Change the internal name
- B. Make the field mandatory
- C. Change the field type
- D. Add a Visibility, Editability, or Validity Condition
- E. Change the help tip

Answer: B,D,E

Explanation:
In SAP Ariba,existing fields can be made mandatoryby setting the Required property,help tips can be edited to clarify field usage, andvisibility, editability, and validity conditions can be added or modifiedto control when and how fields appear or accept values. However,the internal field name is immutable once the field is created, andthe field data type cannot be changed post-creation. These restrictions ensure system consistency and prevent data corruption. These limitations are well documented in SAP Ariba configuration best practices.

NEW QUESTION # 25
Which read-only files show the key and English translations for custom field labels and help tips?

- A. The JSON files that can be exported through AML & Translations Upload
- B. The customer Resource files that can be exported through AML & Translations Upload
- C. The customerResource files that can be exported through ICM
- D. The JSON files that can be exported through ICM

Answer: B
