Updated Microsoft SC-100 Questions - Fast Track To Get Success

If you are still hesitating about whether you can get SC-100 certification through the exam, we believed that our SC-100 study materials will be your best choice, it will tell you that passing the exam is no longer a dream for you, and it will be your best assistant on the way to passing the exam. Tens of thousands of our customers have benefited from our SC-100 Exam Braindumps and got their certifications. So you will as long as you choose to buy our SC-100 practice guide.

Benefits Of The Microsoft Cybersecurity Architect Professional

The Microsoft **SC-100 exam dumps** is a comprehensive guide for the students to prepare for their exams.

1. It provides an opportunity to become a certified expert in the field of cybersecurity.
2. It offers you the ability to work with various organizations that are involved in various aspects of information security, such as risk management, security architecture, incident response and forensics, cryptography and more.
3. It also allows you to take advantage of your knowledge and expertise in order to protect business assets from external threats and internal vulnerabilities.

4. This certification qualifies you for various positions in industry such as: Information Security Specialist, Security Analyst or Security Engineer

Microsoft SC-100 (Microsoft Cybersecurity Architect) exam is designed to test an individual's knowledge and skills in the area of cybersecurity architecture. SC-100 Exam is intended for individuals who are interested in pursuing a career in cybersecurity and want to validate their skills and knowledge in this field. The Microsoft SC-100 exam is suitable for individuals who have a background in IT and cybersecurity, and who are looking to enhance their skills and knowledge in this area.

Microsoft SC-100, also known as the Microsoft Cybersecurity Architect certification exam, is a globally recognized certification that validates the skills and knowledge required to design and implement secure solutions using Microsoft technologies. Microsoft Cybersecurity Architect certification exam is intended for those professionals who want to take their career in cybersecurity to the next level and demonstrate their expertise in designing, implementing, and maintaining secure systems.

Microsoft Cybersecurity Architect Sample Questions (Q238-Q243):

NEW QUESTION # 238

Your company has an Azure subscription that has enhanced security enabled for Microsoft Defender for Cloud. The company signs a contract with the United States government. You need to review the current subscription for NIST 800-53 compliance. What should you do first?

- A. From Defender for Cloud, enable Defender for Cloud plans.
- B. From Defender for Cloud, review the secure score recommendations.
- **C. From Defender for Cloud, add a regulatory compliance standard.**
- D. From Defender for Cloud, review the Azure security baseline for audit report.

Answer: C

Explanation:

Add a regulatory standard to your dashboard

The following steps explain how to add a package to monitor your compliance with one of the supported regulatory standards.

Add a standard to your Azure resources

1. From Defender for Cloud's menu, select Regulatory compliance to open the regulatory compliance dashboard. Here you can see the compliance standards currently assigned to the currently selected subscriptions.
2. From the top of the page, select Manage compliance policies. The Policy Management page appears.
3. Select the subscription or management group for which you want to manage the regulatory compliance posture.
4. To add the standards relevant to your organization, expand the Industry & regulatory standards section and select Add more standards.
5. From the Add regulatory compliance standards page, you can search for any of the available standards:
6. Select Add and enter all the necessary details for the specific initiative such as scope, parameters, and remediation.
7. From Defender for Cloud's menu, select Regulatory compliance again to go back to the regulatory compliance dashboard. Your new standard appears in your list of Industry & regulatory standards.

Note: Customize the set of standards in your regulatory compliance dashboard.

Microsoft Defender for Cloud continually compares the configuration of your resources with requirements in industry standards, regulations, and benchmarks. The regulatory compliance dashboard provides insights into your compliance posture based on how you're meeting specific compliance requirements.

NEW QUESTION # 239

Your on-premises network contains an e-commerce web app that was developed in Angular and Nodejs. The web app uses a MongoDB database. You plan to migrate the web app to Azure. The solution architecture team proposes the following architecture as an Azure landing zone.

You need to provide recommendations to secure the connection between the web app and the database. The solution must follow the Zero Trust model.

Solution: You recommend creating private endpoints for the web app and the database layer.

Does this meet the goal?

- A. No
- **B. Yes**

Answer: B

Explanation:

When using Azure-provided PaaS services (e.g., Azure Storage, Azure Cosmos DB, or Azure Web App, use the PrivateLink connectivity option to ensure all data exchanges are over the private IP space and the traffic never leaves the Microsoft network.
<https://docs.microsoft.com/en-us/azure/cosmos-db/how-to-configure-private-endpoints>

NEW QUESTION # 240

A customer uses Azure to develop a mobile app that will be consumed by external users as shown in the following exhibit.

You need to design an identity strategy for the app. The solution must meet the following requirements:

- * Enable the usage of external IDs such as Google, Facebook, and Microsoft accounts.
- * Be managed separately from the identity store of the customer.
- * Support fully customizable branding for each app.

Which service should you recommend to complete the design?

- **A. Azure Active Directory (Azure AD) B2B**
- B. Azure Active Directory Domain Services (Azure AD DS)
- C. Azure AD Connect
- D. Azure Active Directory (Azure AD) B2C

Answer: A

NEW QUESTION # 241

You have a Microsoft 365 subscription that uses Microsoft Defender XDR and Microsoft Purview.

On a Microsoft SharePoint Online site, you have a file named File1 that has a sensitivity label applied.

You need to recommend a solution that will reevaluate Conditional Access policies when a user downloads File1 from the SharePoint site.

What should you include in the recommendation?

- A. Microsoft Defender for Office 365
- **B. Microsoft Defender for Cloud Apps**
- C. Microsoft Defender for Cloud
- D. Microsoft Entra application proxy

Answer: B

Explanation:

Conditional Access app control in Microsoft Defender for Cloud Apps

Activities in Conditional Access app control

Conditional Access app control uses access policies and session policies to monitor and control user app access and sessions in real time, across your organization.

Each policy has conditions to define who (which user or group of users), what (which cloud apps), and where (which locations and networks) the policy is applied to. After you determine the conditions, route your users first to Defender for Cloud Apps. There, you can apply the access and session controls to help protect your data.

Access and session policies include the following types of activities:

* Require authentication context

Reevaluate Microsoft Entra Conditional Access policies when a sensitive action occurs in the session, such as requiring multifactor authentication.

* Etc.

NEW QUESTION # 242

Your company has a third-party security information and event management (SIEM) solution that uses Splunk and Microsoft Sentinel. You plan to integrate Microsoft Sentinel with Splunk. You need to recommend a solution to send security events from Microsoft Sentinel to Splunk.

What should you include in the recommendation?

- A. a Microsoft Sentinel workbook
- B. Azure Event Hubs
- C. a Microsoft Sentinel data connector
- D. Azure Data Factor

Answer: B

Explanation:

If data need to go to splunk then event hub.
