200-301 latest exam online & 200-301 valid test questions & 200-301 test training vce

P.S. Free 2026 Cisco 200-301 dumps are available on Google Drive shared by Dumps4PDF: https://drive.google.com/open?id=1nRpphklNwBmMQFXA_H0LK_RCzXBjPFj-

Buying any product should choose a trustworthy company. Our Dumps4PDF can give you the promise of the highest pass rate of 200-301 exam; we can give you a promise to try our 200-301 software for free, and the promise of free updates within a year after purchase. To resolve your doubts, we assure you that if you regrettably fail the 200-301 Exam, we will full refund all the cost you buy our study materials. Dumps4PDF is your best partners in your preparation for 200-301 exam.

Cisco 200-301 exam is an important certification for anyone who wants to work in the networking field. It covers a wide range of topics, including modern networking technologies, and provides a solid foundation for building a successful career in IT. By passing 200-301 Exam, candidates demonstrate their knowledge and skills in networking, which can help them to advance their careers and achieve their professional goals.

200-301 Test Certification Cost 100% Pass | High-quality Cisco New Cisco Certified Network Associate Exam Test Book Pass for sure

You can also be part of successful 200-301 exam candidates. To do this you just need to enroll in 200-301 exam and strive hard to get success in the Cisco 200-301 certification exam. In this journey, the 200-301 Dumps can help you perfectly. The Cisco Certified Network Associate Exam 200-301 Exam Questions are the real, updated Cisco Certified Network Associate Exam 200-301 exam practice Test that will assist you in Cisco 200-301 exam preparation and enable you to pass the final Cisco 200-301 exam easily.

Cisco Certified Network Associate Exam Sample Questions (Q533-Q538):

NEW QUESTION # 533
Physical connectivity is implemented between the two Layer 2 switches,
and the network connectivity between them must be configured.
I . Configure an LACP EtherChanneI and number it as 44; configure it
between switches SWI and SW2 using interfaces EthernetO/O and
Ethernet0/1 on both sides. The LACP mode must match on both ends.
2. Configure the EtherChanneI as a trunk link.
3. Configure the trunk link with 802. Iq tags.
4. Configure VLAN 'MONITORING' as the untagged VLAN of the
EtherChannel.
Guidelines
This is a lab item in which tasks will be performed on virtual devices.
* Refer to the Tasks tab to view the tasks for this lab item.
* Refer to the Topology tab to access the device console(s) and perform the tasks.

* Console access is available for all required devices by clicking the device icon or using the tab(s) above the console window.
* All necessary preconfigurations have been applied.
* Do not change the enable password or hostname for any device.
* Save your configurations to NVRAM before moving to the next item.
* Click Next at the bottom of the screen to submit this lab and move to the next question.
* When Next is clicked, the lab closes and cannot be reopened.

Answer:

Explanation:
To configure an LACP EtherChannel and number it as 44, configure it between switches SW1 and SW2 using interfaces Ethernet0/0 and Ethernet0/1 on both sides, configure the EtherChannel as a trunk link, configure the trunk link with 802.1q tags, and configure VLAN 'MONITORING' as the untagged VLAN of the EtherChannel, you need to follow these steps:

On both SW1 and SW2, enter the global configuration mode by using the configure terminal command.
On both SW1 and SW2, select the two interfaces that will form the EtherChannel by using the interface range ethernet 0/0 - 1 command. This will enter the interface range configuration mode.
On both SW1 and SW2, set the protocol to LACP by using the channel-protocol lacp command.
On both SW1 and SW2, assign the interfaces to an EtherChannel group number 44 by using the channel-group 44 mode active command. This will create a logical interface named Port-channel44 and set the LACP mode to active on both ends. The LACP mode must match on both ends for the EtherChannel to form.
On both SW1 and SW2, exit the interface range configuration mode by using the exit command.
On both SW1 and SW2, enter the Port-channel interface configuration mode by using the interface port-channel 44 command.
On both SW1 and SW2, configure the Port-channel interface as a trunk link by using the switchport mode trunk command.
On both SW1 and SW2, configure the Port-channel interface to use 802.1q tags for VLAN identification by using the switchport trunk encapsulation dot1q command.
On both SW1 and SW2, configure VLAN 'MONITORING' as the untagged VLAN of the Port-channel interface by using the switchport trunk native vlan MONITORING command.
On both SW1 and SW2, exit the Port-channel interface configuration mode by using the exit command.
On both SW1 and SW2, save the configuration to NVRAM by using the copy running-config startup-config command.

NEW QUESTION # 534
Refer to the exhibit.

```
Switch#show etherchannel summary
[output omitted]

Group  Port-channel  Protocol      Ports
------+-------------+------------+---------------------------
10     Po10(SU)      LACP          Gi0/0(P)     Gi0/1(P)
20     Po20(SU)      LACP          Gi0/2(P)     Gi0/3(P)
```

Which two commands were used to create port channel 10? (Choose two)

☐ int range g0/0-1
   channel-group 10 mode active

☐ int range g0/0-1
   channel-group 10 mode desirable

☐ int range g0/0-1
   channel-group 10 mode passive

☐ int range g0/0-1
   channel-group 10 mode auto

☐ int range g0/0-1
   channel-group 10 mode on

- A. Option E
- B. Option B
- C. Option C
- D. Option A
- E. Option D

Answer: C,D

NEW QUESTION # 535
Refer to the exhibit.

```
SW1#show run int gig 0/1
interface GigabitEthernet0/1
  switchport access vlan 11
  switchport trunk allowed vlan 1-10
  switchport trunk encapsulation dot1q
  switchport trunk native vlan 5
  switchport mode trunk
  speed 1000
  duplex full
```

Which action is expected from SW1 when the untagged frame is received on the GigabitEthernet0/1 interface?

- A. The frame is processed in VLAN 11
- B. The frame is processed in VLAN 5.
- C. The frame is dropped
- D. The frame is processed in VLAN 1

Answer: B

NEW QUESTION # 536
Which process is associated with spanning-tree convergence?

- A. learning the sender bridge ID
- B. electing designated ports
- C. assigning the port ID
- D. determining the path cost

Answer: B

NEW QUESTION # 537
Refer to the exhibit.

A router reserved these five routes from different routing information sources.
Which two routes does the router install in its routing table? (Choose two)

- A. EIGRP route 10.0.0.1/32
- B. OSPF route 10.0.0.0/16
- C. OSPF route 10.0.0.0/30
- D. iBGP route 10.0.0.0/30
- E. RIP route 10.0.0.0/30

Answer: A,E

NEW QUESTION # 538
......

As to this fateful exam that can help you or break you in some circumstances, our company made these 200-301 practice materials with accountability. We understand you can have more chances being accepted by other places and getting higher salary or acceptance. Our 200-301 training materials are made by our responsible company which means you can gain many other benefits as well. We offer free demos for your reference, and send you the new updates if our experts make them freely.
