If you have ITCertMagic NCP-CN Exam Questions, you don't need a person to help you with reading and explaining the facts. This Nutanix NCP-CN exam questions material is available in pdf so that anyone can study it without any difficulty. On the other hand, to understand real exam's format, you can easily take ITCertMagic NCP-CN Practice Exams. These Nutanix Certified Professional - Cloud Native v6.10 (NCP-CN) practice tests help you know how much you can score and if is it the right time to apply for the Nutanix Certified Professional - Cloud Native v6.10 (NCP-CN) certification exam or if you should wait for a little.

The ITCertMagic is a trusted and leading platform that is committed to making the entire Nutanix NCP-CN exam preparation process simple, smart, and quick. To achieve this objective ITCertMagic is offering real, valid, and updated Nutanix NCP-CN Exam Questions. These Nutanix NCP-CN exam dumps are the real NCP-CN exam questions that surely will repeat in the upcoming NCP-CN exam and you can pass the challenging exam.

Study Materials NCP-CN Review & NCP-CN Exam Materials

There are more and more people to try their best to pass the NCP-CN exam, including many college students, a lot of workers, and even many housewives and so on. These people who want to pass the NCP-CN exam have regard the exam as the only one chance to improve themselves and make enormous progress. So they hope that they can be devoting all of their time to preparing for the NCP-CN Exam, but it is very obvious that a lot of people have not enough time to prepare for the important NCP-CN exam. Our NCP-CN exam questions can help you pass the NCP-CN exam with least time and energy.

Nutanix Certified Professional - Cloud Native v6.10 Sample Questions (Q80-Q85):

NEW QUESTION # 80
There is a private registry for the NKP deployment and the company has an NKP Ultimate license. A Platform Engineer is using the Podman tool and is already logged in. Now, the engineer needs to send the private registry with the NKP Catalog Applications. What command should the engineer use?

- A. podman load -i ./container-images/nkp/catalog-applications-image-bundle-v2.12.0.tar
- B. nkp push bundle --bundle ./container-images/nkp/catalog-applications-image-bundle-v2.12.0.tar --to-registry=${REGISTRY_URL} --to-registry-username=${REGISTRY_USERNAME} --to-registry-password=${REGISTRY_PASSWORD}
- C. nkp apply bundle -f ./container-images/nkp/catalog-applications-image-bundle-v2.12.0.tar --to-

registry=${REGISTRY_URL} --to-registry-username=${REGISTRY_USERNAME} --to-registry-password=${REGISTRY_PASSWORD}
- D. docker load -i ./container-images/nkp/catalog-applications-image-bundle-v2.12.0.tar

Answer: B

NEW QUESTION # 81
A Cloud Engineer wishes to attach existing AKS clusters to a newly deployed NKP management cluster.
What should the engineer consider specific to attaching these types of clusters to NKP?

- A. Cert-manager, which is included in NKP, is deployed by default on AKS clusters.
- B. AKS does not have the kubelet installed on them. Therefore the KIB-prep process should be performed on each of the nodes in the AKS clusters prior to attaching them.
- C. AKS nodes do not use containerd as its container runtime. Therefore it should be deployed to each of the nodes in the AKS clusters prior to attaching them.
- D. A separate service account should be created for them because their kubeconfig files are not usable out-of-box by NKP Kommander.

Answer: D

NEW QUESTION # 82
A Cloud Engineer is deploying an NKP management cluster and plans to deploy multiple NKP workload clusters from it. The management cluster will be on Nutanix infrastructure, but the NKP workload clusters may be deployed in multiple provisioning environments, such as:
Nutanix
AWS
AzureWhen the engineer deploys an NKP workload cluster in AWS, which two default behaviors will be performed by NKP on this newly-deployed cluster? (Choose two.)

- A. The NKP workload cluster will be deployed all of the applications that have been enabled on this NKP workspace.
- B. The NKP workload cluster will receive all of the GitOps sources that have been assigned to the NKP workspace.
- C. The NKP workload cluster will also be assigned to all of the NKP projects that have been created within the NKP workspace.
- D. The NKP workload cluster will receive all of the NKP RBAC policy that has been assigned to this NKP workspace.

Answer: A,B

NEW QUESTION # 83
Which procedure should a Platform Engineer follow for setting up user authentication into an NKP cluster?

- A. Enable Gatekeeper and create a connector to the user base's identity provider.
- B. Create a MetalLB connector to the user base's identity provider.
- C. Disable native NKP authentication, enable Traefik, and create a connector to the user base's identity provider.
- D. Create a Dex connector to the user base's identity provider.

Answer: D

NEW QUESTION # 84
By default, a full cluster backup is occurring on a daily basis on an NKP-managed cluster. However, the Victory Finance team has requested that their applications be backed up four times a day. The user group has been assigned to the victory-finance-apps NKP workspace, and the applications have been deployed to the Kubernetes namespace victory-finance.
What is the procedure for scheduling the team's application backups?

- A. Install the Velero CLI
  Use the Velero CLI to create a backup schedule that includes the following parameters:
  - Backup name

- B. Access the NKP UI
Switch to the victory-finance NKP namespace
Click on the Applications menu panel and select Velero
Edit the Velero application configuration at the cluster level for the specific NKP managed cluster (not all clusters in that NKP workspace) Set the backup frequency to four times daily
- C. Access the NKP UI
Switch to the victory-finance-apps NKP workspace
Click on the Applications menu panel and select Velero
Edit the Velero application configuration at the cluster level for the specific NKP managed cluster (not all clusters in that NKP workspace) Set the backup frequency to four times daily
- D. Install the Velero CLI
Use the Velero CLI to create a backup schedule that includes the following parameters:
- Backup name
- NKP workspace to backup
- Backup frequency (every six hours)
- Managed NKP cluster's kubeconfig

Answer: A

Explanation:
As per the NKPA 6.10 documentation under "Application Backup and Recovery with Velero," Velero is the out-of-the-box backup and restore solution integrated with NKP. To schedule application backups at a specific frequency (in this case, every six hours, equivalent to four times daily), the recommended approach is to use the Velero CLI to create a backup schedule.
The procedure involves:
* Using the Velero CLI to create a scheduled backup targeting the specific Kubernetes namespace (victory-finance) rather than the entire workspace.
* Specifying the frequency as --schedule="0 */6 * * *" (every six hours).
* Providing the cluster's kubeconfig for authentication.
Exact extract from the documentation:
"Velero's CLI can be used to create backup schedules for application-specific workloads. Use the namespace parameter to target the namespace where the applications are deployed, and set the cron-like schedule to the desired frequency." Reference:
Nutanix Kubernetes Platform Administration (NKPA) 6.10 - "Using Velero CLI to Create Backup Schedules" NCP-CN 6.10
