- B. A shared file system cannot be mounted simultaneously by hosts in different host pools
- C. Shared file system types include iSCSI shared file system and FC shared file system
- D. FC shared file system does not support FC multipathing

Answer: B,C

NEW QUESTION # 26

The following description of H3CCAS cloud resources is correct:

- A. Cloud resources mainly include computing resources, storage resources and network resources
- B. You can directly create a cluster under cloud resources and add hosts to the cluster
- C. Hosts can be added directly to a host pool or to a cluster
- D. Cloud resource management mainly includes host pool management, cluster management, host management, virtual machine management, virtual machine template management, policy management, storage management and network management

Answer: A,C,D

NEW QUESTION # 27

The correct statements about UIS Manager are:

- A. UIS Manager can be embedded in TOR switch to manage rack servers
- B. UIS Manager can be used to manage the M8300 itself
- C. UIS Manager can manage UIS Pack cabinets
- D. UIS Manager can be embedded in the blade switch to manage UIS8000 blade frame

Answer: A,B,C,D

NEW QUESTION # 28

Which of the following statements about configuring VM operating system information is correct?

- A. The deployed virtual machine needs to be added to the AD domain, so the operating system information needs to be configured using the quick initialization method
- B. The deployed virtual machine needs to be added to the AD domain, so the operating system information needs to be configured using the full initialization method.
- C. When using the quick initialization method to configure the operating system information, the CAS Tools tool must be installed in the virtual machine template.
- D. When using the full initialization method to configure the operating system information, it is required that the CAS Tools tool is installed in the virtual machine template.

Answer: B,C,D

NEW QUESTION # 29

Which of the following descriptions of the life cycle of a virtual machine is correct?

- A. During the normal operation of the virtual machine, if the storage pool where the image file is located is full, the virtual machine will become suspended.
- B. After a virtual machine is moved to the recycle bin, it can be manually restored within the storage period. If the storage period exceeds the limit, it will be automatically deleted.
- C. When the virtual machine is working normally, performing a power off operation may cause the virtual machine operating system and application data to be lost, so it should be used with caution.
- D. The virtual machine does not have CAS Tools installed, and the virtual machine may not be shut down when the shutdown operation is performed.

Answer: A,B,C,D

NEW QUESTION # 30
