

CNX-001 Latest Exam Cram - Cert CNX-001 Guide

BONUS!!! Download part of DumpsValid CNX-001 dumps for free: <https://drive.google.com/open?id=1EZVmpO0Ai6VjmHZAJ1MwlhPqr4Qyzkl>

To want to pass CompTIA CNX-001 certification test can't be done just depend on the exam related books. Instead of blindly studying relevant knowledge the exam demands, you can do some valuable questions. The efficient exam dumps is essential tool to prepare for CNX-001 test. Come on and purchase DumpsValid CompTIA CNX-001 Practice Test dumps. This braindump's hit accuracy is high and it works best the other way around. DumpsValid CompTIA CNX-001 questions and answers are a rare material which can help you pass you exam first time.

Our App online version of CNX-001 study materials, it is developed on the basis of a web browser, as long as the user terminals on the browser, can realize the application which has applied by the CNX-001 simulating materials of this learning model, users only need to open the App link, you can quickly open the learning content in real time in the ways of the CNX-001 Exam Guide, can let users anytime, anywhere learning through our App, greatly improving the use value of our CNX-001 exam prep.

Pass Guaranteed CompTIA - High-quality CNX-001 Latest Exam Cram

DumpsValid has a strong IT elite team. They use their professional eyes searching the latest CNX-001 braindumps and CNX-001 certification training materials. With them, you can save more time to study and pass the CNX-001 Exam. After you purchase our CNX-001 exam dumps, we will offer free update service in one year.

CompTIA CloudNetX Certification Exam Sample Questions (Q85-Q90):

NEW QUESTION # 85

A network engineer at an e-commerce organization must improve the following dashboard due to a performance issue on the website:

Which of the following is the most useful information to add to the dashboard for the operations team's?

- A. Concurrent users
- B. Number of active incidents
- C. 404 errors
- D. Number of orders

Answer: A

Explanation:

Adding a concurrent-user count gives you the key context you're missing: it ties spikes in CPU, memory, disk I/O, and network traffic directly to how many people are actively hitting the site. You can then see whether performance issues align with increases in user load, enabling more targeted capacity planning and troubleshooting.

NEW QUESTION # 86

A company deployed new applications in the cloud and configured a site-to-site VPN to connect the internal data center with the cloud. The IT team wants the internal servers to connect to those applications without using public IP addresses. Which of the following is the best solution?

- A. Configure proxy service in the site-to-site VPN to allow internal servers to access applications through the proxy.
- B. Configure a NAT server on the cloud to allow internal servers to connect to the applications through the NAT server.
- C. Register applications on the cloud with a public DNS server and configure internal servers to connect to them using their public DNS names.
- D. **Create a DNS server in the cloud. Configure the DNS server in the customer data center to forward DNS requests for cloud resources to the cloud DNS server.**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

To allow private IP-based communication between internal servers and cloud applications over a site-to-site VPN, private DNS resolution is necessary. The internal DNS server can be configured to forward specific DNS queries (for cloud-based applications) to a DNS server located in the cloud. This ensures applications can be resolved to private IPs, not public ones.

Relevant Extract from CompTIA CloudNetX CNX-001 Study Guide - under "Hybrid Networking and DNS Integration":

"To support name resolution over hybrid connections like site-to-site VPN, enterprises should configure conditional forwarding to cloud-based DNS servers. This allows internal devices to resolve private IP addresses for cloud-based resources." Other options:

- * B. NAT introduces complexity and may hide source IPs, which is not required in this case.
- * C. Public DNS names map to public IPs, violating the requirement.
- * D. A proxy is not needed if direct private IP-based access is available via VPN.

NEW QUESTION # 87

A developer reports errors when trying to access a web application. The developer uses Postman to troubleshoot and receives the following error:

- * HTTP Status: 403 Forbidden
- * Headers include authentication-related variables such as access_key, signature, salt, and timestamp
- * The request is a GET request to a payment methods API

Which of the following is the cause of the issue?

- A. Incorrect HTTP redirection
- B. Requested element not found
- C. **Lack of user authentication**
- D. Too restrictive NGFW rule

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

A 403 Forbidden error indicates that the request was understood by the server but is refusing to fulfill it due to insufficient authorization. The developer is attempting to call a protected API that requires valid credentials such as an access key and signature (often used in HMAC-based APIs), but the values appear as Postman variables (e.g., {{rapyd_access_key}}), which suggests they were not replaced with actual credentials.

This typically means that the request lacks proper authentication or authorization headers, or the keys /signature are incorrect or missing. The presence of access_key, signature, salt, and timestamp in the request implies the API requires authentication, but the variables were not resolved or valid.

Relevant Extract from CompTIA CloudNetX CNX-001 Study Guide - under "API Security and Authentication":

"A 403 error typically results from failed authentication or lack of proper authorization. Developers must ensure that tokens or signatures are valid, not missing, and properly injected." Other options:

- * A. 404 is the code for a missing resource, not 403.
- * C. A firewall rule would block the request entirely (e.g., no response or a 0 status), not result in a 403 from the server.
- * D. HTTP redirection issues typically result in 3xx codes, not 403.

NEW QUESTION # 88

A network security engineer must secure a web application running on virtual machines in a public cloud. The virtual machines are behind an application load balancer. Which of the following technologies should the engineer use to secure the virtual machines? (Choose two.)

- A. DLP
- B. CDN
- C. WAF
- D. NSG
- E. SIEM
- F. IDS

Answer: C,D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

WAF (Web Application Firewall) protects web applications by inspecting HTTP/S traffic to and from the application. It filters, monitors, and blocks malicious traffic and exploits targeting web application vulnerabilities. WAFs are deployed at the edge, often in conjunction with load balancers, and are ideal for mitigating threats like SQL injection, cross-site scripting, and protocol violations. NSG (Network Security Group) is a native security feature offered by many cloud providers (such as Azure), functioning similarly to a firewall. NSGs control inbound and outbound traffic at the virtual network interface, subnet, or VM level, allowing engineers to define allowed or denied traffic rules.

Relevant Extract from CompTIA CloudNetX CNX-001 Study Guide under "Cloud Workload Protection & Security Tools":

"WAFs are critical for protecting web-facing applications in public cloud environments."

"Network Security Groups (NSGs) are used to enforce access policies on cloud-based virtual networks, providing filtering and segmentation at the instance or subnet level."

NEW QUESTION # 89

An administrator logged in to a cloud account on a shared machine but forgot to log out after the session ended. Which of the following types of security threats does this action pose?

- A. Zero-day
- B. On-path attack
- C. Privilege escalation
- D. IP spoofing

Answer: B

Explanation:

By leaving an active session open on a shared machine, an attacker with access to that machine can intercept or hijack the administrator's session tokens or credentials - classic on-path behavior - allowing them to impersonate the admin without needing

elevated exploits.

NEW QUESTION # 90

.....

With our CompTIA CNX-001 exam questions material, we promise your success in CompTIA certification. We guarantee that if you study completely from our practice CompTIA CNX-001 exams, you will pass your CompTIA CNX-001 exam with flying colors on the first try. If you are pressed for time when studying for the CompTIA CloudNetX Certification Exam PDF Questions and working several jobs, PDF format is the ideal option. Because the DumpsValid follows every bit of the official CompTIA CloudNetX Certification Exam exam syllabus to compile the most relevant CompTIA Exam Questions and answers with a 100% chance of appearing in the actual CompTIA CloudNetX Certification Exam exam. The CompTIA CNX-001 PDF file does not require any installation and is equally suitable for PCs, mobile devices, and tablets. Using a smartphone, you may go through the CompTIA CNX-001 exam questions whenever and wherever you desire. The CNX-001 PDF files are also printable for making handy notes.

Cert CNX-001 Guide: <https://www.dumpsvalid.com/CNX-001-still-valid-exam.html>

CNX-001 practice materials will be the most professional and dedicated tutor you have ever met. The third format of DumpsValid product is the desktop CompTIA CloudNetX Certification Exam (CNX-001) practice exam software. So before you try to take the Cert CNX-001 Guide - CompTIA CloudNetX Certification Exam exam test, you require understanding the questions & answers and doing adequate preparation. Now, we will provide you the easiest and quickest way to get the CNX-001 certification without headache.

Therefore, it is important that all the switches in a domain must be configured CNX-001 with the same version. From start to finish, the focus is on results: generating more customers and more cash at the lowest possible cost!

Brilliant CNX-001 Guide Materials: CompTIA CloudNetX Certification Exam Display First-class Exam Braindumps - DumpsValid

CNX-001 practice materials will be the most professional and dedicated tutor you have ever met. The third format of DumpsValid product is the desktop CompTIA CloudNetX Certification Exam (CNX-001) practice exam software.

So before you try to take the CompTIA CloudNetX Certification Exam Cert CNX-001 Guide exam test, you require understanding the questions & answers and doing adequate preparation. Now, we will provide you the easiest and quickest way to get the CNX-001 certification without headache.

As is well known to us, our passing rate has been high; Ninety-nine percent of people who used our CNX-001 real braindumps have passed their exams and get the certificates.
