

# Valid Workday-Prism-Analytics Test Notes | Workday-Prism-Analytics Real Questions

Total no. of pages: 2

BBA.....III<sup>rd</sup> Semester.....

Roll No. ....

Course work

**END-SEMESTER THEORY EXAMINATION, NOV-DEC, 2024.**

Course Code: BBAC2103

Time: 03 Hrs.

Note:- Attempt all the five questions. Missing data/information (if any), may be suitably assumed and mentioned in the answer.

Course Title: Business Statistics

Max. Marks: 50

Q. No	Question	Marks	CO
Q.1	Attempt any 2 parts of the following		
1a	Briefly explain Skewness and Kurtosis? Show them through diagrams with proper markings. Write the formula for measure of Skewness and Coefficient of Skewness.	5	CO1
1b	High Performance Bicycle Products Company in Punjab sampled its shipping records for a certain day with these results: Time from Receipt of Order to Delivery (in Days) 4 12 8 14 11 6 7 13 13 11 20 5 19 10 15 24 7 19 6 Construct a frequency distribution for these data. Use intervals of 5 days. Construct Histogram, Frequency Polygon and Frequency Curve on the same Graph and show all the three graphs with different markings or Colours.	5	CO1
1c	Calculate the Median and Quartiles for the given data. Marks : 0-10 10-20 20-30 30-40 40-50 50-60 60-70 70-80 No. of Students : 15 20 25 24 12 31 71 52	5	CO1
Q.2	Attempt any 2 parts of the following		
2a	Make a regression line from the below given data. The data is related with Price in Rs. and Items sold. Price (Rs.) : 27 35 20 42 31 40 Items sold : 760 510 980 250 320 480 By using the regression equation, state how many items can be sold if Price is kept at Rs.30.	5	CO2
2b	Find the Rank Correlation Coefficient for the data of Marks of two tests taken by a student for a job. The data are given below. Test-1 : 92 89 87 86 83 77 71 63 53 50 Final Test: 86 83 91 77 68 85 52 82 37 57	5	CO2
2c	Differentiate between Correlation and Regression. What do the Regression Coefficients interpret? Show it through diagram also. Write the formulas for Karl Pearson Coefficient of Correlation.	5	CO2
Q3	Attempt any 2 parts of the following?	5	
3a	If, $P(A)=0.5$ , $P(B)=0.6$ , $P(A \cap B)=0.4$ , find $P(A B)$ and $P(B A)$ . The probabilities that A, B and C becoming managers of a company are in the ratio of 4:2:3 respectively. The probability that automation will be implemented if A, B and C become managers are $3/10$ , $1/2$ and $4/5$ respectively. What is the probability that Automation will be introduced? Also find, if Automation has been introduced, the probability that managers appointed were either A or B.	5	CO3
3b	What is a Random Variable? Write its types and show by diagram. What do you mean by Expected Value, write its formula and its application.	5	CO3
3c	GMAT score is widely used criteria for admissions in International Business Schools. Assume that the scores obtained are normally distributed. In a recent year, the mean GMAT Score was 495 and the standard deviation was 100. What is the probability that a randomly selected GMAT score lies between 300 and 600. Also find the probability for getting the GMAT score of more than 700. Show the data with the graphs also. Some Z values are given below for	5	CO3

P.S. Free & New Workday-Prism-Analytics dumps are available on Google Drive shared by FreeDumps:  
<https://drive.google.com/open?id=1eWcj1FZR89F8szZ5a0XKFiLY5TfLvQcX>

FreeDumps is a leading platform that has been helping the Workday-Prism-Analytics exam candidates for many years. Over this long time period, countless Workday-Prism-Analytics exam candidates have passed their dream Workday Pro Prism Analytics Exam (Workday-Prism-Analytics) certification and they all got help from valid, updated, and Real Workday-Prism-Analytics Exam Questions. So you can also trust the top standard of Workday-Prism-Analytics exam dumps and start Workday-Prism-Analytics practice questions preparation without wasting further time.

In the matter of quality, our Workday-Prism-Analytics practice engine is unsustainable with reasonable prices. Despite costs are constantly on the rise these years from all lines of industry, our Workday-Prism-Analytics learning materials remain low level. That is because our company beholds customer-oriented tenets that guide our everyday work. The achievements of wealth or prestige is not important than your exciting feedback about efficiency and profession of our Workday-Prism-Analytics Study Guide.

## Free PDF Quiz 2026 Workday-Prism-Analytics: The Best Valid Workday Pro Prism Analytics Exam Test Notes

Customers can start using the Workday-Prism-Analytics Exam Questions instantly just after purchasing it from our website for the preparation of the Workday-Prism-Analytics certification exam. They can also evaluate the Workday Pro Prism

Analytics Exam (Workday-Prism-Analytics) practice test material before buying with a free demo. The users will receive updates 365 days after purchasing. And they will also get a 24/7 support system to help them anytime if they got stuck somewhere or face any issues while preparing for the Workday-Prism-Analytics Exam.

## Workday Pro Prism Analytics Exam Sample Questions (Q35-Q40):

### NEW QUESTION # 35

A report that uses a Prism data source that you created has a brand new requirement that Expense Partner by Location should only see expense reports for workers for the locations they support. Given that you have the Location Hierarchy (instance) field in your dataset used for publishing, how can you adjust to meet the requirement?

- A. Run the Edit Data Source Security task to update row-level security and then republish the PDS.
- B. Run the Edit Data Source Security task to update the Securing Entities.
- C. Run the Edit Data Source Security task to update row-level security.
- D. Run the Edit Data Source Security task to update the Securing Entities and then republish the PDS.

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, restricting access to specific rows in a Prism data source (PDS) based on a field like Location Hierarchy for users such as Expense Partners requires implementing row-level security.

According to the official Workday Prism Analytics study path documents, to meet the requirement that Expense Partners only see expense reports for the locations they support, you should run the Edit Data Source Security task to update row-level security and then republish the PDS (option B).

The Location Hierarchy (instance) field in the dataset can be used to define row-level security rules, ensuring that each Expense Partner only sees data for their assigned locations. The Edit Data Source Security task allows you to configure row-level security by mapping the Location Hierarchy field to the user's security profile (e.g., their assigned locations). After updating the security settings, republishing the Prism data source is necessary to apply the changes, ensuring the updated security rules take effect in the reports that use the data source.

The other options are incorrect:

\* A. Run the Edit Data Source Security task to update the Securing Entities and then republish the PDS:

Securing Entities are used to control overall access to the data source (e.g., via security domains), not to restrict data at the row level based on a field like Location Hierarchy.

\* C. Run the Edit Data Source Security task to update row-level security: While updating row-level security is correct, the changes will not take effect in reports until the data source is republished, making this option incomplete.

\* D. Run the Edit Data Source Security task to update the Securing Entities: As with option A, updating Securing Entities does not address row-level security for location-based restrictions.

Updating row-level security and republishing the PDS ensures that Expense Partners only see the relevant expense reports, meeting the requirement while maintaining security governance.

### NEW QUESTION # 36

You want to convert each instance of a multi-instance field and convert it to a single-instance field. What transformation stage can you use to do this?

- A. Manage Fields
- B. Explode
- C. Group By
- D. Unpivot

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, a multi-instance field contains multiple values for a single record (e.g., a list of skills for a worker). To

convert each instance of a multi-instance field into a single-instance field, you need a transformation that expands the data into multiple rows, with each row containing one instance. According to the official Workday Prism Analytics study path documents, the Explode stage (option B) is the transformation stage designed for this purpose. The Explode stage takes a multi-instance field and creates a new row for each instance, transforming the multi-instance field into a single-instance field in the output. For example, if a worker has three skills in a multi-instance field, the Explode stage will create three rows, each with a single skill value in a single-instance field.

The other options are incorrect:

\* A. Unpivot: Unpivot transforms columns into rows (e.g., converting wide data to long format), but it does not handle multi-instance fields, which are a specific Workday data type.

\* C. Manage Fields: The Manage Fields stage modifies field properties (e.g., type, name) but cannot expand a multi-instance field into multiple rows.

\* D. Group By: The Group By stage aggregates data (e.g., summing values by a key) but does not convert multi-instance fields into single-instance fields.

The Explode stage is the correct transformation to achieve the conversion of a multi-instance field into a single-instance field by expanding the data into multiple rows.

### NEW QUESTION # 37

When joining datasets, what items must match?

- A. The field names for the Match Row fields.
- **B. The field types for the Match Row fields.**
- C. The number of rows in each dataset.
- D. The level of detail in each dataset.

**Answer: B**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, joining datasets requires that the fields used in the join condition (Match Row fields) are compatible to ensure accurate matching. According to the official Workday Prism Analytics study path documents, the field types for the Match Row fields must match (option A). For example, if the join condition is based on an Employee ID field, the field type (e.g., Text or Numeric) must be the same in both datasets. Mismatched field types (e.g., Text in one dataset and Numeric in another) can lead to join failures or incorrect results, as Prism cannot reliably compare values of different types. This often requires using a Manage Fields stage to align field types before the join.

The other options are incorrect:

\* B. The number of rows in each dataset: The number of rows does not need to match; joins can handle datasets of different sizes, depending on the join type (e.g., Left Outer Join).

\* C. The level of detail in each dataset: The level of detail (granularity) does not need to match; joins can combine datasets with different levels of detail as long as the Match Row fields are compatible.

\* D. The field names for the Match Row fields: The field names do not need to be identical; the join condition maps fields between datasets, so different names can be used as long as the types and values are compatible.

Ensuring that the field types of the Match Row fields are the same is critical for a successful join operation in Prism Analytics.

### NEW QUESTION # 38

A custom report uses your recently published Prism data source, but you noticed a minor error in the published data. You need to delete the published rows to fix it. What happens to your custom report?

- **A. The report definition remains intact and will work after republishing.**
- B. The report definition will be copied and a new version will appear after republishing.

- C. The report definition will need to be edited to reflect changes.
- D. The report definition will need to be manually recreated.

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, deleting published rows from a Prism data source (PDS) is a step taken to correct errors in the published data, often followed by republishing the dataset with corrected data. According to the official Workday Prism Analytics study path documents, when you delete the published rows, the report definition remains intact and will work after republishing (option A). The custom report's definition, which is based on the Prism data source, is not affected by the deletion of published rows because the report definition references the data source's structure (e.g., fields and metadata), not the specific data rows. Once the dataset is republished with the corrected data, the report will automatically reflect the updated data without requiring any changes to the report definition, assuming the structure of the data source remains the same.

The other options are incorrect:

- \* B. The report definition will need to be manually recreated: The report definition is not deleted or invalidated by deleting published rows, so recreation is not necessary.
- \* C. The report definition will be copied and a new version will appear after republishing: Workday does not automatically copy or version report definitions when a data source is republished.
- \* D. The report definition will need to be edited to reflect changes: No edits are required unless the structure of the data source (e.g., field names or types) changes, which is not indicated in this scenario.

The report definition's integrity is maintained, and it will function as expected after republishing the corrected data.

## NEW QUESTION # 39

Using three different source files, you want to load rows of data into an empty table through a Data Change task. What needs to be the same about the three source files?

- A. Size
- B. Naming convention
- C. Source
- **D. Schema**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

In Workday Prism Analytics, a Data Change task is used to load or update data into a table, which can involve importing data from multiple source files. According to the official Workday Prism Analytics study path documents, when loading rows from multiple source files into an empty table, the source files must share the same schema. The schema defines the structure of the data, including the column names, data types, and their order, which ensures that the data from all source files can be consistently mapped and loaded into the target table without errors.

The schema is critical because the Data Change task relies on a predefined table structure to process the incoming data. If the schemas of the source files differ (e.g., different column names or data types), the task will fail due to inconsistencies in data mapping. The other options are not required to be the same:

- \* Source: The source files can originate from different systems or locations (e.g., Workday, external systems, or file uploads) as long as the schema aligns.
- \* Naming convention: The names of the source files do not need to follow a specific convention for the Data Change task to process them.
- \* Size: The size of the source files (e.g., number of rows or file size) can vary, as the task processes the data based on the schema, not the volume.

Thus, the requirement for the source files to have the same schema ensures seamless data loading into the table, maintaining data integrity and consistency during the transformation process.

## NEW QUESTION # 40

.....

Now Workday Workday-Prism-Analytics certification test is very popular. Not having got Workday-Prism-Analytics certificate, you must want to take the exam. Indeed, Workday Workday-Prism-Analytics test is very difficult exam, but this is not suggested that you cannot get high marks and pass your exam with ease. Without knowing the shortcut of Workday Workday-Prism-Analytics Exam, do you want to know the testing technique? As for the point, I can tell you that FreeDumps Workday Workday-Prism-Analytics study guide is your unique choice.

**Workday-Prism-Analytics Real Questions:** <https://www.freedumps.top/Workday-Prism-Analytics-real-exam.html>

Workday Valid Workday-Prism-Analytics Test Notes If you decide to buy and use the study materials from our company, it means that you are not far from success, If you fail exam with our Workday-Prism-Analytics: Workday Pro Prism Analytics Exam collect you can apply full refund any time, All of these lead to our success of Workday-Prism-Analytics learning file and high prestige, Workday Valid Workday-Prism-Analytics Test Notes Perhaps you still cannot make specific decisions.

All things being equal, a camera with more pixels produces better Workday-Prism-Analytics pictures than a camera with fewer pixels, But we've found in our research that hackerspaces are also hotbeds of entrepreneurship.

## Workday - Workday-Prism-Analytics - High Hit-Rate Valid Workday Pro Prism Analytics Exam Test Notes

If you decide to buy and use the study materials from our company, it means that you are not far from success, If you fail exam with our Workday-Prism-Analytics: Workday Pro Prism Analytics Exam collect you can apply full refund any time.

All of these lead to our success of Workday-Prism-Analytics learning file and high prestige, Perhaps you still cannot make specific decisions, Workday-Prism-Analytics study guide latest exam dumps are the reliable and valid study material with latest & guaranteed questions & answers for your preparation. We promise you the easiest way to success and offer you the most prestigious and updated Workday-Prism-Analytics practice torrent which carry 100% money return policy.
