- D. both address and port translation enabled

Answer: D

NEW QUESTION # 156

A web server is being overloaded with HTTPS traffic. To decrease the load on the server, the LTM Specialist and the Server Administrator decide to perform SSL offloading on the LTM device. The configuration of the virtual server is as follows:

□ Which change must be made to the configuration to perform SSL offloading?

- A. Remove the clients profile
- B. Remove the serverssl profile
- C. Remove the clientssl and serverssl profiles
- D. Remove the clientssl and http profiles

Answer: B

NEW QUESTION # 157

Remote office users are having performance issues with a virtual hosted on the F5 LTM.

The LTM Specialist reviews the configuration for the virtual server and determine that some settings are set with default profiles.

Which profile should the LTM Specialist enable to improve virtual server performance?

- A. A Stream profile for the remote user networks
- B. An HTTP profile for the virtual server
- C. A FastL4 profile on the virtual server
- D. A WAN optimized client side profile

Answer: D

Explanation:

The key word is that there are performance problem with Remote office users, no F5. The user experience can be improved through tcp optimization. The expression should be wom-tcp-wan- optimized in Protocol Profile (Client)
