Salesforce Salesforce-MuleSoft-Developer-I Reliable Test Sample | Salesforce-MuleSoft-Developer-I Dumps Cost

What's more, part of that TroytecDumps Salesforce-MuleSoft-Developer-I dumps now are free: https://drive.google.com/open?id=1d92h8rRowmdtZmABgGkLhd4Zigwgvqnd

We have compiled the Salesforce-MuleSoft-Developer-I test guide for these candidates who are trouble in this exam, in order help they pass it easily, and we deeply believe that our Salesforce-MuleSoft-Developer-I exam questions can help you solve your problem. Believe it or not, if you buy our study materials and take it seriously consideration, we can promise that you will easily get the certification that you have always dreamed of. We believe that you will never regret to buy and practice our Salesforce-MuleSoft-Developer-I latest question.

Salesforce Salesforce-MuleSoft-Developer-I Exam Syllabus Topics:

Topic	Details
Topic 1	• Handling Errors: Handling errors includes describing default error handling in Mule applications and defining custom global default error handlers. It involves comparing On Error Continue and On Error Propagate scopes, creating error handlers for a flow, using the Try scope, and mapping errors to custom application errors.

Topic 2	• Creating Application Networks: The topic of creating Application Networks encompasses understanding MuleSoft's proposal for closing the IT delivery gap and describing the role and characteristics of the modern API. It also includes the purpose and roles of a Center for Enablement (C4E), and the benefits of API-led.
Topic 3	• Designing APIs: Designing APIs involves describing the lifecycle of the modern API and using RAML to define various aspects of an API. It includes identifying when to use query parameters vs URI parameters, and defining API parameters.
Topic 4	• Structuring Mule Applications: Structuring Mule applications covers parameterizing an application and defining and reusing global configurations. It includes breaking an application into multiple flows using private flows, subflows, and the Flow Reference component.
Topic 5	• Accessing and Modifying Mule Events: It describes the Mule event data structure. Moreover, the topic focuses on usage of transformers and enriching Mule events.
Topic 6	• Debugging and Troubleshooting Mule Applications: Using breakpoints to inspect a Mule event during runtime, installing missing Maven dependencies, and reading and deciphering Mule log error messages are sub-topics of this topic.
Topic 7	• Building API Implementation Interfaces: This topic involves manually creating a RESTful interface for a Mule application and generating a REST Connector from a RAML specification. It also includes describing the features and benefits of APIkit.
Topic 8	• Transforming Data with DataWeave: It involves writing DataWeave scripts and using DataWeave functions. This topic also includes defining and using DataWeave variables, functions, and modules, and applying correct syntax.
Topic 9	• Routing Events: It focuses on using the Choice router for conditional logic and the Scatter-Gather router to multicast events. This topic also involves validating data by using the Validation module.
Topic 10	• Deploying and Managing APIs and Integrations: It includes packaging Mule applications for deployment and deploying them to CloudHub. This topic also involves using CloudHub properties, creating and deploying API proxies, connecting an API implementation to API Manager, and applying policies to secure an API.

Salesforce-MuleSoft-Developer-I Dumps Cost - New Salesforce-MuleSoft-Developer-I Dumps Sheet

The contents of Salesforce-MuleSoft-Developer-I study guide are selected by experts which are appropriate for your practice in day-to-day life. It is especially advantageous for busy workers who lack of sufficient time to use for passing the Salesforce-MuleSoft-Developer-I preparation materials. I guess no person can know the Salesforce-MuleSoft-Developer-I Exam Questions better than our experts. And we are ready to help you pass Salesforce-MuleSoft-Developer-I exam with our high-efficient exam materials by your first attempt.

Salesforce Certified MuleSoft Developer (Mule-Dev-201) Sample Questions (Q105-Q110):

NEW QUESTION # 105
Refer to the exhibits.
The Batch Job scope processes the array of strings
After the Batch Job scope completes processing the input payload what information is logged by the Logger component?

- A. ☐
- B. ☐
- C. ☐
- D. ☐

Answer: C

NEW QUESTION # 106

A
web client submits a request to http://localhost:8081?accountType=personal. The query parameter is captured using a Set Variable transformer to a variable named accountType.
What is the correct DataWeave expression to log accountType?

- A. Account Type: # [attributes.accountType]
- B. Account Type: #[message.inboundProperties.accountType]
- C. Account Type: #[vars.accountType]
- D. Account Type: #[flowVars.accountType]

Answer: C

Explanation:
vars: Keyword for accessing a variable, for example, through aDataWeave expression in a Mule component, such as the Logger, or from an Input or Output parameter of an operation. If the name of your variable is myVar, you can access it like this: vars.myVar
Hence correct answer is Account Type: #[vars.accountType]

NEW QUESTION # 107

What should this endpoint return? http://dev.acme.com/api/patients?name=John&surname=Bell

- A. Patient with surname as bell
- B. Patients with name as John and surname as Bell
- C. Patient with name as John
- D. Patients with either name as John or surname as Bell

Answer: B

Explanation:
Query parameters are a defined set of parameters attached to the end of a url. They are extensions of the URL that are used to help define specific content or actions based on the data being passed. To append query params to the end of a URL, a '?' Is added followed immediately by a query parameter.
To add multiple parameters, an '&' is added in between each.
Hence coming back to question, endpoint would return Patients with name as John and (and is very important here) surname as Bell

NEW QUESTION # 108

A Mule application's HTTP Listener is configured with the HTTP protocol. The HTTP listeners port attribute is configured with a property placeholder named http.port. The mule application sets the http.port property placeholder's value to 9090 The Mule application is deployed to CloudHub without setting any properties in the Runtime manager Properties tab and a log message reports the status of the HTTP listener after the Mule application deployment completes.
After the mule applications is deployed, what information is reported in the worker logs related to the port on which the Mule application's HTTP Listener listens?

- A. The HTTP Listener is listening on port 9090
- B. The HTTP Listener is listening on port 80
- C. The HTTP Listener is listening on port 8081
- D. The HTTP Listener failed to bind to the port and is not listening for connections

Answer: C

Explanation:

Cloudhub expose services on port 8081 and override value in http.port with this one .
Sample log in Runtime Manager is below
21:15:53.148 08/08/2021 Worker-0 ArtifactDeployer.start.01 INFO
Listening for connections on 'http://0.0.0.0:8081'

NEW QUESTION # 109

Refer to the exhibits.

Each route in the Scatter-Gather sets the payload to the number shown in the label. What response is returned to a web client request to the HTTP Listener?

- A. ▢
- B. ▢
- C. ▢
- D. ▢

Answer: C

Explanation:
Correct answer is as below.
After all processing routes have finished execution, the Scatter-Gather component creates a new Mule event that combines all resulting Mule events from each route, and then passes the new Mule event to the next component in the flow.

```
{
"0": {
"attributes": ...,
"payload": "100"
},
"1": {
"attributes": ...,
"payload": "200"
}
}
```
Bottom of Form

NEW QUESTION # 110

......

With the increasing marketization, the product experience marketing has been praised by the consumer market and the industry. Attract users interested in product marketing to know just the first step, the most important is to be designed to allow the user to try before buying the Salesforce-MuleSoft-Developer-I study materials, so we provide free pre-sale experience to help users to better understand our products. The user only needs to submit his E-mail address and apply for free trial online, and our system will soon send free demonstration research materials of Salesforce-MuleSoft-Developer-I Study Materials to download.
