- C. SAP Datasphere
- D. SAP Business Data Cloud

Answer: D

### NEW QUESTION # 53

What are some insights that finance provides in SAP Business Suite?

- A. Cost management

- B. Employee performance evaluation
- C. Technology ROI
- D. Supply chain optimization

**Answer: A,B,D**

#### NEW QUESTION # 54

Which of the following is a key feature of SAP Business One?

- A. Batch-based reporting
- B. Real-time data processing
- C. Limited scalability
- D. Manual reconciliation

**Answer: B**

#### NEW QUESTION # 55

How does SAP Sanctioned Party Screening support compliance?

Note: There are 2 correct answers to this question.

- A. Performs automatic blocking of transactions.
- B. Provides efficient review workflows.
- C. Analyzes sales data to identify market trends.
- D. Manages stock requirements and inventory levels.

**Answer: A,B**

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

SAP Sanctioned Party Screening, a core component of SAP Global Trade Services (GTS), is designed to ensure that an organization does not conduct business with individuals, companies, or entities listed on international restricted-party lists (such as those from the UN, EU, or US OFAC). It supports compliance primarily through automatic blocking of transactions and providing efficient review workflows.

When a sales order or purchase order is created in the SAP S/4HANA system, the GTS engine instantly checks the names and addresses against current sanctioned party lists. If a potential match is found, the system automatically blocks the transaction, preventing any further actions such as shipping goods or issuing payments. This real-time intervention is critical for preventing inadvertent violations of international law.

Because screening algorithms can sometimes produce "false positives" (e.g., similar names), SAP provides efficient review workflows. These workflows route the blocked transaction to a designated compliance officer who can quickly investigate, add comments, and either release the block or confirm the violation. This ensures that compliance does not become an unnecessary bottleneck to legitimate business while maintaining a rigorous and auditable trail of all screening activities. Analyzing market trends (D) and managing inventory (B) are entirely different functional areas (Analytics and SCM) and are not related to the legal compliance functions of Sanctioned Party Screening.

#### NEW QUESTION # 56

Which SAP Finance technology ensures all finance data is available from a Single source?

- A. Document Splitting
- B. Extension Ledger
- C. Actual Costing
- D. Universal Journal

**Answer: D**

Explanation:

Comprehensive and Detailed 150 to 250 words of Explanation From Positioning SAP Business Suite via SAP Financial Management Solutions documents:

The cornerstone of SAP S/4HANA Finance is the Universal Journal (table ACDOCA). Traditionally, financial systems relied on separate tables for General Ledger (GL), Controlling (CO), Asset Accounting (AA), and Material Ledger (ML). This fragmentation led to data silos, necessitated complex reconciliations at period end, and often resulted in "multiple versions of the truth." The Universal Journal revolutionizes this by combining all these components into a single line-item table.

By providing a Single Source of Truth, the Universal Journal ensures that financial and managerial accounting are inherently reconciled. Every transaction captured in the system updates one table with all relevant dimensions-including market segments, cost centers, and functional areas. This eliminates the need for reconciliation between FI and CO and provides immediate, real-time access to granular data. For the CFO, this means faster financial closes and the ability to drill down from high-level financial statements directly to the underlying operational detail without leaving the report. This architecture is the "digital core" that enables all other advanced SAP Financial Management capabilities, such as real-time analytics and predictive forecasting.

## NEW QUESTION # 57

.....

Our company has always been following the trend of the C\_BCFIN\_2502 certification. Our research and development team not only study what questions will come up in the C\_BCFIN\_2502 exam, but also design powerful study tools like exam simulation software. With the Software version of our C\_BCFIN\_2502 study materilas, you can have the experience of the real exam which is very helpful for some candidates who lack confidence or experice of our C\_BCFIN\_2502 training guide.
