With the rapid development of IT technology, the questions in the IT certification exam are also changing. Therefore, Actual4Dumps also keeps updating test questions and answers. And if you purchase Actual4Dumps Google Associate-Cloud-Engineer Practice Test materials, we will provide you with free updates for a year. As long as the questions updates, Actual4Dumps will immediately send the latest questions and answers to you which guarantees that you can get the latest materials at any time. Actual4Dumps can not only help you pass the test, but also help you learn the latest knowledge. Never pass up a good chance to have the substantial materials.

Exam Topics

As mentioned above, applicants for the title of Google Cloud certified must have practical experience with on-premises solutions and public clouds. Thus, on the official test they should be able to demonstrate skills on the following exam topics:

- ensuring the successful operation of a cloud solution by Compute Engine resources management;
- deploying and implementing cloud solutions such as Cloud Run, App Engine, and Cloud Functions;
- planning and configuration of a cloud solution, including compute resources, data storage options, and network resources;
- configuring access and security, including service accounts and audit logs.
- setting up a cloud solution environment, which includes managing billing configuration and CLI installation;

Career Path

After aching the certification test, the candidates will possess all the knowledge and skills needed to function in a role of an Associate Cloud Engineer. The responsibilities of these professionals include the deployment of apps, monitoring of operations, and management of enterprise solutions. The successful applicants will be capable of using Google Cloud Console as well as the command-line interface to fulfill common platform-based tasks to maintain deployed solutions that leverage self-managed or Google-

managed services on Google Cloud. Some of the other job roles that you can take up after getting certified include the following: an Associate DevOps Engineer, an Associate Software Engineer, an Associate Cloud Migration Engineer, an Associate Consulting Engineer, an Associate Cloud Security Engineer, an Associate DevOps Network Engineer, and an Associate Cloud Operations Engineer. The average salary associated with these positions is \$108,752 per year. However, the specialists with some level of experience in the domain can earn as much as \$177,000 per annum.

Google Associate-Cloud-Engineer Certification Exam is an entry-level certification exam that tests an individual's ability to deploy, monitor, and manage Google Cloud Platform (GCP) projects. Google Associate Cloud Engineer Exam certification exam is designed for individuals who are looking to start a career in cloud engineering and want to demonstrate their foundational knowledge of GCP. Google Associate Cloud Engineer Exam certification exam covers a variety of topics related to GCP, including cloud services, compute, networking, storage, security, and management.

Associate-Cloud-Engineer exam practice is well known for its quality service! Our users are all over the world, and we use uniform service standards everywhere. Our after-sales service staff will be on-line service 24 hours a day, 7 days a week. So, whether you are purchasing Associate-Cloud-Engineer Training Materials, or during the study period, no matter what kind of problems you encounter on the Associate-Cloud-Engineer study guide, you can always contact online customer service to get the timely help.

Google Associate Cloud Engineer Exam Sample Questions (Q63-Q68):

NEW QUESTION # 63

Your organization has a dedicated person who creates and manages all service accounts for Google Cloud projects. You need to assign this person the minimum role for projects. What should you do?

- A. Add the user to roles/iam.roleAdmin role.
- **B. Add the user to roles/iam.serviceAccountUser role.**
- C. Add the user to roles/iam.serviceAccountAdmin role.
- D. Add the user to roles/iam.securityAdmin role.

Answer: B

Explanation:

Reference:

<https://cloud.google.com/iam/docs/creating-managing-service-accounts>

NEW QUESTION # 64

You have a number of applications that have bursty workloads and are heavily dependent on topics to decouple publishing systems from consuming systems. Your company would like to go serverless to enable developers to focus on writing code without worrying about infrastructure. Your solution architect has already identified Cloud Pub/Sub as a suitable alternative for decoupling systems. You have been asked to identify a suitable GCP Serverless service that is easy to use with Cloud Pub/Sub. You want the ability to scale down to zero when there is no traffic in order to minimize costs. You want to follow Google recommended practices. What should you suggest?

- **A. Cloud Functions.**
- B. Cloud Run for Anthos
- C. App Engine Standard
- D. Cloud Run

Answer: A

Explanation:

Cloud Functions is Google Cloud's event-driven serverless compute platform that lets you run your code locally or in the cloud without having to provision servers. Cloud Functions scales up or down, so you pay only for compute resources you use. Cloud Functions have excellent integration with Cloud Pub/Sub, lets you scale down to zero and is recommended by Google as the ideal serverless platform to use when dependent on Cloud Pub/Sub. "If you're building a simple API (a small set of functions to be

accessed via HTTP or Cloud Pub/Sub), we recommend using Cloud Functions." Ref: <https://cloud.google.com/serverless-options>

NEW QUESTION # 65

You want to add a new auditor to a Google Cloud Platform project. The auditor should be allowed to read, but not modify, all project items.

How should you configure the auditor's permissions?

- A. Create a custom role with view-only service permissions. Add the user's account to the custom role.
- B. Create a custom role with view-only project permissions. Add the user's account to the custom role.
- C. Select the built-in IAM service Viewer role. Add the user's account to this role.
- **D. Select the built-in IAM project Viewer role. Add the user's account to this role.**

Answer: D

Explanation:

<https://cloud.google.com/resource-manager/docs/access-control-proj>

NEW QUESTION # 66

You want to configure autohealing for network load balancing for a group of Compute Engine instances that run in multiple zones, using the fewest possible steps. You need to configure re-creation of VMs if they are unresponsive after 3 attempts of 10 seconds each. What should you do?

- **A. Create a managed instance group. Verify that the autoscaling setting is on.**
- B. Create an HTTP load balancer with a backend configuration that references an existing instance group. Set the health check to healthy (HTTP)
- C. Create a managed instance group. Set the Autohealing health check to healthy (HTTP)
- D. Create an HTTP load balancer with a backend configuration that references an existing instance group. Define a balancing mode and set the maximum RPS to 10.

Answer: A

NEW QUESTION # 67

Your company uses Cloud Storage to store application backup files for disaster recovery purposes. You want to follow Google's recommended practices. Which storage option should you use?

- A. Nearline Storage
- B. Multi-Regional Storage
- **C. Coldline Storage**
- D. Regional Storage

Answer: C

Explanation:

Reference: <https://cloud.google.com/storage/docs/storage-classes#nearline>

<https://cloud.google.com/blog/products/gcp/introducing-coldline-and-a-unified-platform-for-data-storage> Cloud Storage Coldline: a low-latency storage class for long-term archiving Coldline is a new Cloud Storage class designed for long-term archival and disaster recovery. Coldline is perfect for the archival needs of big data or multimedia content, allowing businesses to archive years of data. Coldline provides fast and instant (millisecond) access to data and changes the way that companies think about storing and accessing their cold data.

NEW QUESTION # 68

.....

Are you still worried about not able to pass Associate-Cloud-Engineer exam certification? Then you can ask Actual4Dumps for help. It can bring you the master of the sophisticated techniques of IT industry and help you pass Associate-Cloud-Engineer certification exam easily. With Actual4Dumps's efforts for years, the passing rate of Associate-Cloud-Engineer Certification Exam

has reached as high as 100%. Choosing Actual4Dumps is to choose the way to go to a beautiful future.
