It is a challenging exam that requires a deep understanding of Google Workspace administration best practices and a comprehensive knowledge of its features and functionalities.

Google Cloud Certified - Professional Google Workspace Administrator Sample Questions (Q62-Q67):

NEW QUESTION # 62
Your global marketing team has over 500 employees. They recently started working with Google Analytics and want to move to managed accounts. You decide to use Google Cloud Directory Sync (GCDS) to sync users from your current identity provider. Your organization currently has no Google Workspace licenses linked to the Admin console. You run GCDS for the first time and receive the following error, "Domain user limit reached." You need to identify and fix the problem.
What should you do?

- A. Update the delete limits of GCDS, and try again.
- B. Ensure that there is a subscription available and enough licenses to sync the new users.
- C. Wait 48 hours until the domain is fully provisioned.
- D. Check if GCDS has the correct permissions to run a sync on your domain.

Answer: B

Explanation:
The error "Domain user limit reached" indicates that there are not enough Google Workspace licenses available to accommodate the new users being synced by GCDS.

NEW QUESTION # 63
Your organization has just appointed a new CISO. They have signed up to receive admin alerts and just received an alert for a suspicious login attempt. They are trying to determine how frequently suspicious login attempts occur within the organization. The CISO has asked you to provide details for each user account that has had a suspicious login attempt in the past year and the number of times it occurred for each account.
What action should you take to meet these requirements?

- A. Use the account activity report to export all suspicious login details for analysis.
- B. Create a custom query in BigQuery showing all suspicious login details.
- C. Use the login audit report to export all suspicious login details for analysis.
- D. Create a custom dashboard with the security investigation tool showing suspicious logins.

Answer: C

Explanation:
* Access the Admin Console:
* In the Google Workspace Admin console, navigate to "Reports" > "Audit" > "Login".
* Generate a Login Audit Report:
* Customize the report to include details about suspicious login attempts.
* Set the time frame to the past year and filter the results to show only suspicious logins.
* Export the Report:
* Export the login audit report in a suitable format (e.g., CSV) for further analysis.
* Ensure the report includes user account details and the number of suspicious login attempts for
* each account.
* Analyze the Data:
* Review the exported data to identify patterns and determine how frequently suspicious login attempts occur within the organization.
* Provide the analysis to the CISO with the required details for each user account.

NEW QUESTION # 64

Your company has been engaged in a lawsuit, and the legal department has been asked to discover and hold all email for two specific users. Additionally, they have been asked to discover and hold any email referencing "Secret Project 123."
What steps should you take to satisfy this request?

- A. Create a Matter and a Hold. Set the Hold to Gmail, set it to the top level Organization, and set the search terms to "secret project 123." Create a second Hold. Set the second Hold to Gmail, set it to Accounts, and enter: user1 @your-company.com, user2@your-company.com. Save.
- B. Create a Matter and a Hold. Set the Hold to Gmail, set it to Accounts, and enter: user1@your- company.com AND user2@your-company.com. Set the search terms to: secret AND project AND 123. Save.
- C. Create a Matter and a Hold. Set the Hold to Gmail, set it to Accounts, and set the usernames to: user1@your-company.com, user2@your-company. Set the search terms to: (secret project 123). Save.
- D. Create a Matter and a Hold. Set the Hold to Gmail, set it to Accounts, and set the usernames to: user1@your-company.com, user2@your-company. Set the search terms to secret OR project OR 123. Save.

Answer: C

Explanation:
* Create a Matter: Access Google Vault and create a new matter for the lawsuit. Matters are used to manage legal holds and searches.
* Create a Hold: Within the matter, create a new hold.
* Set the Hold Scope: Set the hold scope to Gmail, since the requirement is to discover and hold emails.
* Specify Accounts: Set the usernames to user1@your-company.com and user2@your-company.com.
This ensures that all emails for these specific users are held.
* Set Search Terms: Use the search terms "secret project 123" to hold any emails that reference this specific term. This is a broad search that captures any email mentioning "Secret Project 123."
* Save the Hold: Save the hold to ensure that it captures all relevant emails for the specified users and the search term.
References
* Google Support: Create or update a hold

NEW QUESTION # 65
Your Security Officer ran the Security Health Check and found the alert that "Installation of mobile applications from unknown sources" was occurring. They have asked you to find a way to prevent that from happening.
Using Mobile Device Management (MDM), you need to configure a policy that will not allow mobile applications to be installed from unknown sources.
What MDM configuration is needed to meet this requirement?

- A. In the Application Management menu, configure the whitelist of apps that Android, iOS devices, and Active Sync devices are allowed to install.
- B. In Android Settings, ensure that "Allow non-Play Store apps from unknown sources installation" is unchecked.
- C. In the Application Management menu, configure the whitelist of apps that Android and iOS devices are allowed to install.
- D. In Device Management > Setup > Device Approvals menu, configure the "Requires Admin approval" option.

Answer: B

Explanation:

NEW QUESTION # 66
An executive at your organization asked you to give their executive administrator access to their Workspace account. You need to ensure that this executive administrator can manage emails in the executive's account. You need to maintain security and privacy of the executive's account. What should you do?

- A. Assist the executive in setting up email forwarding to their executive administrator.
- B. Grant delegated access to the executive's Gmail account, and assign access to their executive administrator in Gmail settings.
- C. Create a Google Group, and add all executive administrators. Enable delegated access to the Group.

- D. Instruct the executive to share their password with their executive administrator.

Answer: B

Explanation:
Granting delegated access allows the executive administrator to manage the executive's emails without requiring access to the executive's password. This solution ensures security and privacy by limiting the permissions to email management only, while keeping the executive's account secure. The executive administrator will be able to send, read, and delete emails on behalf of the executive, but they won't have access to other aspects of the account.
