ZDTA學習筆記，新版ZDTA題庫上線

你還在猶豫什麼，機不可失，失不再來。現在你就可以獲得Zscaler的ZDTA考題的完整本，只要你進Testpdf網站就能滿足你這個小小的欲望。你找到了最好的ZDTA考試培訓資料，請你放心使用我們的考題及答案，你一定會通過的。

Zscaler ZDTA 考試大綱：

主題	簡介
主題 1	• Zscaler Zero Trust Automation: This part measures Automation Engineers on their ability to utilize Zscaler APIs, including the One API framework, for automating zero trust security functions and integrating with broader enterprise security and orchestration tools.
主題 2	• This section assesses Data Protection Officers on techniques to secure data across motion, SaaS, cloud, and endpoints using Zscaler's AI-driven data discovery and data protection technologies. It involves securing BYOD environments and understanding risk management to protect sensitive information.
主題 3	• Zscaler Digital Experience: This section evaluates Network Performance Analysts on their knowledge of Zscaler Digital Experience (ZDX), including understanding the ZDX score, architectural overview, features, functionalities, and practical use cases to optimize digital user experiences.
主題 4	• Access Control Services: This area assesses Security Operations Specialists on implementing access control mechanisms including cloud app control, URL filtering, file type controls, bandwidth controls, and segmentation. It also covers Microsoft 365 policies, private application access strategies, and firewall configurations to protect enterprise resources.
主題 5	• Platform Services: This section measures skills of Cloud Infrastructure Engineers and focuses on the suite of Zscaler platform services. Key topics include advanced device posture assessments, TLS inspection mechanics, and the application of policy frameworks governing internet, private access, and digital experience services.

主題 6	• Risk Management: This domain measures skills of Risk Managers and Security Architects in using Zscaler's comprehensive risk management suite. Candidates are expected to understand risk capabilities, dashboards, asset and financial risk insights, vulnerability management, deception tactics, identity protection, and breach prediction analytics.
主題 7	• Identity Services: This section of the exam measures skills of Identity and Access Management Engineers and covers foundational identity services including authentication and authorization protocols such as SAML, SCIM, and OIDC. Candidates should understand identity administration tasks and how to manage policies and audit logs within the Zscaler platform.
主題 8	• Connectivity Services: This domain evaluates Network Security Engineers on configuring and managing connectivity essentials like device posture assessment, trusted network definitions, browser access controls, and TLS • SSL inspection deployment. It also includes applying policy frameworks focused on authentication and enforcement for internet access, private access, and digital experience.

最新的 Digital Transformation Administrator ZDTA 免費考試真題 (Q82-Q87):

問題 #82

Which of the following is an open standard used to provide automatic updates of a user's group and department information?

- A Import
- B. LDAP Sync
- C. SCIM
- D. SAML

答案：

解題說明：

C

Explanation:

SCIM (System for Cross-domain Identity Management) is the open standard API designed for automated provisioning and ongoing synchronization of users' attributes, such as group and department, between identity providers and service platforms.

問題 #83

As technology that exists for a very long period of time, has URL Filtering lost its effectiveness?

- A. In a modern cloud world, access to all Internet sites and cloud applications should be granted by default. URL Filtering is no longer needed.
- B. URL Filtering has been replaced by CASB functionality through blocking access to all Internet sites and only allowing a few corporate applications.
- C. URL Filtering is outdated and no longer needed. The rise of HTTPS leads renders URL Filtering ineffective as all traffic is encrypted.
- D. URL Filter is the most commonly used web filtering technique in the arsenal. It acts as first line of defense.

答案： D

解題說明：

URL Filtering remains the most widely deployed web filtering method, serving as the first line of defense by categorizing and controlling access to websites before any deeper inspection or cloud-based security service takes over.

問題 #84

What is the default policy configuration setting for checking for Viruses?

- A. Block

- B. Malware Protection
- C. Allow
- D. Unwanted Applications

答案： A

解題說明：

Out of the box, Zscaler's Malware Protection policy is configured to block any traffic identified as a virus, ensuring known malicious files are denied immediately.

問題 #85

What Malware Protection setting can be selected when setting up a Malware Policy?

- A. Block
- B. Do Not Decrypt
- C. Bypass
- D. Isolate

答案： A

解題說明：

The valid Malware Protection setting selectable when configuring a Malware Policy in Zscaler is Block. This setting instructs the platform to block malicious files or activities detected by malware scanning engines.

Other settings like Isolate or Bypass are not standard malware policy actions in Zscaler's malware protection configuration. The "Do Not Decrypt" option relates to SSL inspection settings, not malware policy actions.

The study guide specifies "Block" as the primary malware policy action to enforce protection.

問題 #86

From a user perspective, Zscaler Bandwidth Control performs traffic shaping and buffering on what direction (s) of traffic?

- A. Outbound traffic is shaped. Inbound or localhost traffic is unshaped.
- B. Localhost traffic is shaped. Outbound or Inbound traffic is unshaped.
- C. Outbound or inbound traffic is shaped. Localhost traffic is unshaped.
- D. Inbound traffic is shaped. Outbound or localhost traffic is unshaped.

答案： A

解題說明：

Zscaler Bandwidth Control shapes and buffers only the outbound traffic from the user's device, ensuring smooth egress flow, while inbound and localhost traffic remain unshaped.

問題 #87

.....

學歷不等於實力，更不等於能力，學歷只是代表你有這個學習經歷而已，而真正的能力是在實踐中鍛煉出來的，與學歷並沒有必然聯繫。不要覺得自己能力不行，更不要懷疑自己，當你選擇了Zscaler的ZDTA考試認證，就要努力通過，如果你擔心考不過，你可以選擇Testpdf Zscaler的ZDTA考試培訓資料，不管你學歷有多高，你能力有多低，你都可以很容易的理解這個培訓資料的內容，並且可以順利的通過考試認證。
