Test Snowflake COF-C02 Cram Pdf | COF-C02 Latest Training

Only 20-30 hours on our COF-C02 learning guide are needed for the client to prepare for the test and it saves our client's time and energy. Most people may wish to use the shortest time to prepare for the COF-C02 test and then pass the test with our COF-C02 Study Materials successfully because they have to spend their most time and energy on their jobs, learning, family lives and other important things. And our COF-C02 exam braindumps won't let you down!

Snowflake SnowPro Core Certification Exam Sample Questions (Q730-Q735):

NEW QUESTION # 730

A company needs to read multiple terabytes of data for an initial load as part of a Snowflake migration. The company can control the number and size of CSV extract files.

How does Snowflake recommend maximizing the load performance?

- A. Use an external tool to issue batched row-by-row inserts within BEGIN TRANSACTION and COMMIT commands.
- B. Produce a larger number of smaller files and process the ingestion with size Small virtual warehouses.
- **C. Produce the largest files possible, reducing the overall number of files to process.**
- D. Use auto-ingest Snowpipes to load large files in a serverless model.

Answer: C

Explanation:

Snowflake's documentation recommends producing the largest files possible for data loading, as larger files reduce the number of files to process and the overhead associated with handling many small files. This approach can maximize the load performance by leveraging Snowflake's ability to ingest large files efficiently¹. Reference: [COF-C02] SnowPro Core Certification Exam Study Guide

NEW QUESTION # 731

What technique does Snowflake use to limit the number of micro-partitions scanned by each query?

- **A. Pruning**
- B. Indexing
- C. B-tree
- D. Map reduce

Answer: A

Explanation:

Snowflake uses a technique called pruning to limit the number of micro-partitions scanned by each query. Pruning effectively filters out unnecessary micro-partitions based on the query's filter conditions, which can significantly improve query performance by reducing the amount of data scanned¹.

NEW QUESTION # 732

How many credits does a size 3X-Large virtual warehouse consume if it runs continuously for 2 hours?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:

In Snowflake, the consumption of credits by a virtual warehouse is determined by its size and the duration for which it runs. A size 3X-Large virtual warehouse consumes 128 credits if it runs continuously for 2 hours. This consumption rate is based on the principle that larger warehouses, capable of providing greater computational resources and throughput, consume more credits per hour of operation. The specific rate of consumption is defined by Snowflake's pricing model and the scale of the virtual warehouse. References: Snowflake Pricing Documentation

NEW QUESTION # 733

Which of the following are characteristics of security in Snowflake?

- A. Account and user authentication is only available with the Snowflake Business Critical edition.
- B. Support for HIPAA and GDPR compliance is available for UI Snowflake editions.
- **C. Periodic rekeying of encrypted data is available with the Snowflake Enterprise edition and higher**
- D. Private communication to internal stages is allowed in the Snowflake Enterprise edition and higher.

Answer: C

Explanation:

One of the security features of Snowflake includes the periodic rekeying of encrypted data, which is available with the Snowflake Enterprise edition and higher.

This ensures that the encryption keys are rotated regularly to maintain a high level of security.

NEW QUESTION # 734

Which of the following Snowflake capabilities are available in all Snowflake editions? (Select TWO)

- A. Up to 90 days of data recovery through Time Travel
- B. Column-level security to apply data masking policies to tables and views
- C. Customer-managed encryption keys through Tri-Secret Secure
- **D. Automatic encryption of all data**
- **E. Object-level access control**

Answer: D,E

Explanation:

In all Snowflake editions, two key capabilities are universally available:

B. Automatic encryption of all data: Snowflake automatically encrypts all data stored in its platform, ensuring security and compliance with various regulations. This encryption is transparent to users and does not require any configuration or management.

D. Object-level access control: Snowflake provides granular access control mechanisms that allow administrators to define permissions at the object level, including databases, schemas, tables, and views. This ensures that only authorized users can access specific data objects.

These features are part of Snowflake's commitment to security and governance, and they are included in every edition of the Snowflake Data Cloud.
