Get Apple DEP-2025 Dumps - 100% Success Guaranteed

Certification has become a prerequisite for employment and career growth in the Apple industry for reputable companies. To advance comfortably in your career, passing the DEP-2025 exam is a valuable validation of your expertise. However, many test takers struggle to find updated Apple Deployment and Management Exam (DEP-2025) dumps and fail to prepare effectively in a short period, resulting in a loss of time, money, and motivation.

Apple Deployment and Management Exam Sample Questions (Q155-Q160):

NEW QUESTION # 155
What's required to use supervision on a device?

- A. An MDM solution
- B. A VPN configuration
- C. Apple Configurator or ADE
- D. User acceptance

Answer: C

Explanation:
Supervision requires Apple Configurator (via USB connection) or Automated Device Enrollment (ADE) through Apple Business Manager (ABM) or Apple School Manager (ASM). These methods apply a supervision identity to the device, enabling advanced management features. An MDM solution (option A) manages supervised devices but isn't the tool for applying supervision. User acceptance (option C) isn't required, as supervision is an administrative action. A VPN configuration (option D) is unrelated. TheApple Platform Deployment Guidespecifies these tools for supervision.
Reference:Apple Platform Deployment Guide(Chapter: Supervision).

NEW QUESTION # 156
You used Apple Business Manager to assign enrolled iPhone and iPad devices to a new MDM solution. What must you do to enroll the devices in the new MDM solution using Automated Device Enrollment?

- A. Send a remote-wipe command from Apple Business Manager.
- B. Erase the devices.
- C. Revive the devices.
- D. Release the devices in Apple Business Manager.

Answer: B

Explanation:
Erasing triggers ADE. TheApple Business Manager User Guidestates, "To enroll devices in a new MDM solution via ADE after reassignment, erase the devices to restart Setup Assistant and connect to the new server." References:
Apple Business Manager User Guide, "Reassign Devices" section.
Apple Platform Deployment Guide, "ADE Re-enrollment" section.

NEW QUESTION # 157
What's the benefit of using Profile Manager?

- A. Enables configuration profile creation
- B. Separates personal and managed data
- C. Allows personalization
- D. Improves network performance

Answer: A

Explanation:
Profile Manager, a macOS tool, enables configuration profile creation and management, allowing IT administrators to define settings (e.g., Wi-Fi, security) for deployment via MDM or manually. This centralizes device configuration for organizations. Personalization (option A) is user-driven and often restricted by profiles. Network performance (option C) is unrelated, and data separation (option D) pertains to User Enrollment. The Apple Platform Deployment Guide highlights profile creation as Profile Manager's primary benefit.
Reference: Apple Platform Deployment Guide (Chapter: Profile Manager).

NEW QUESTION # 158
A user enrolled their personal iPhone in the organization's MDM solution. Which management capability does the organization's MDM solution have on the user's iPhone?

- A. Require a passcode
- B. Access device location
- C. Disable Activation Lock
- D. Remotely wipe the entire device

Answer: A

Explanation:
Apple differentiates betweenUser Enrollment(for BYOD) andDevice Enrollment(for organization-owned devices). For personal

devices enrolled throughUser Enrollment, MDM has limited capabilities to protect privacy. Apple Learning emphasizes that MDM cannot track personal location data, cannot wipe the entire device, and cannot disable user features like Activation Lock. However, MDM retains control over organizational data and canenforce a device passcode requirement. This ensures that managed apps and accounts are protected by encryption at rest. If the user removes the passcode, the device will become non- compliant, and organizational data may be removed. This limited but critical control balances enterprise security with personal user privacy.
References:Apple Platform Deployment - "Management capabilities of User Enrollment."

NEW QUESTION # 159
What do you use to manually add a Mac to Apple Business Manager or Apple School Manager?

- A. Apple Configurator for iPhone
- B. Apple Configurator for Mac
- C. Xcode
- D. System Settings

Answer: A

Explanation:
Apple requires the use ofApple Configurator for iPhoneto manually add Macs into Apple Business Manager or Apple School Manager. The workflow involves placing the target Mac into Device Enrollment mode and then scanning an on-screen image with the Configurator app running on an iPhone. Once completed, the Mac is added to the organization's ABM account with a 30-day provisional period. Apple Configurator for Mac, while useful for restoring and preparing iOS/iPadOS devices, does not support manually adding Macs to ABM. System Settings and Xcode are unrelated to device enrollment workflows. This method is Apple's prescribed approach for organizations acquiring Macs outside normal reseller channels.
References:Apple Configurator User Guide for iPhone - "Add a Mac to Apple Business Manager or Apple School Manager."

NEW QUESTION # 160
......

In today's rapid economic development, society has also put forward higher and higher requirements for us. In addition to the necessary theoretical knowledge, we need more skills. Our DEP-2025 exam simulation is a great tool to improve our competitiveness. After we use our DEP-2025 Study Materials, we can get the DEP-2025 certification faster. And at the same time, we can do a better job since we have learned more knowledge on the subject.
