

First-hand Fortinet NSE4_FGT_AD-7.6 Reliable Test Vce: Fortinet NSE 4 - FortiOS 7.6 Administrator | NSE4_FGT_AD-7.6 Practice Test Engine

BONUS!!! Download part of Test4Cram NSE4_FGT_AD-7.6 dumps for free: https://drive.google.com/open?id=119b84eD00JR-XGY7Vd_Lhnojka-DycwY

Each user's situation is different. NSE4_FGT_AD-7.6 simulating exam will develop the most suitable learning plan for each user. We will contact the user to ensure that they fully understand the user's situation, including their own level, available learning time on NSE4_FGT_AD-7.6 Training Questions. Our experts will fully consider the gradual progress of knowledge and create the most effective learning plan on the NSE4_FGT_AD-7.6 exam questions for you.

In order to facilitate the user's offline reading, the NSE4_FGT_AD-7.6 study braindumps can better use the time of debris to learn, especially to develop PDF mode for users. In this mode, users can know the NSE4_FGT_AD-7.6 prep guide inside the learning materials to download and print, easy to take notes on the paper, and weak link of their memory, and every user can be downloaded unlimited number of learning, greatly improve the efficiency of the users with our NSE4_FGT_AD-7.6 Exam Questions. Our NSE4_FGT_AD-7.6 prep guide can be very good to meet user demand in this respect, allow the user to read and write in a good environment continuously consolidate what they learned.

NSE4_FGT_AD-7.6 Practice Test Engine | NSE4_FGT_AD-7.6 Latest Test Bootcamp

The desktop Fortinet NSE4_FGT_AD-7.6 exam simulation software works only on Windows, but the web-based Fortinet NSE4_FGT_AD-7.6 practice exam is compatible with all operating systems. You can take the online Fortinet NSE4_FGT_AD-7.6 Mock Test without software installation via Chrome, Opera, Firefox, or another popular browser.

Fortinet NSE4_FGT_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Firewall Policies and Authentication: This domain focuses on creating firewall policies, configuring SNAT and DNAT for address translation, implementing various authentication methods, and deploying FSSO for user identification.
Topic 2	<ul style="list-style-type: none"> Deployment and System Configuration: This domain covers initial FortiGate setup, logging configuration and troubleshooting, FGCP HA cluster configuration, resource and connectivity diagnostics, FortiGate cloud deployments (CNF and VM), and FortiSASE administration with user onboarding.
Topic 3	<ul style="list-style-type: none"> Content Inspection: This domain addresses inspecting encrypted traffic using certificates, understanding inspection modes and web filtering, configuring application control, deploying antivirus scanning modes, and implementing IPS for threat protection.
Topic 4	<ul style="list-style-type: none"> Routing: This domain covers configuring static routes for packet forwarding and implementing SD-WAN to load balance traffic across multiple WAN links.
Topic 5	<ul style="list-style-type: none"> VPN: This domain focuses on implementing meshed or partially redundant IPsec VPN topologies for secure connections.

Fortinet NSE 4 - FortiOS 7.6 Administrator Sample Questions (Q47-Q52):

NEW QUESTION # 47

Refer to the exhibit. An administrator has configured an Application Overrides for the ABC.Com application signature and set the Action to Allow. This application control profile is then applied to a firewall policy that is scanning all outbound traffic. Logging is enabled in the firewall policy. To test the configuration, the administrator accessed the ABC.Com web site several times.

Priority	Details	Type	Action
1	ABC.Com	Application	Allow
2	Excessive-Bandwidth	Filter	Block

Why are there no logs generated under security logs for ABC.Com?

- A. The ABC.Com is configured under application profile, which must be configured as a web filter profile.
- **B. The ABC.Com Action is set to Allow.**
- C. The ABC.Com is hitting the category Excessive-Bandwidth.
- D. The ABC.Com Type is set as Application instead of Filter.

Answer: B

Explanation:

When the action is set to Allow in an application override, traffic matching this override is allowed without generating security logs because it bypasses deeper inspection and blocking.

NEW QUESTION # 48

Refer to the exhibits. You have implemented the application sensor and the corresponding firewall policy as shown in the exhibits. Which two factors can you observe from these configurations? (Choose two.)

Application sensor **FORTINET**

Edit Application Sensor

Categories

Mixed ▾ All Categories

- Business (157, △ 6)
- Collaboration (266, △ 13)
- Game (83)
- Mobile (3)
- Operational Technology
- Proxy (189)
- Social Media (113, △ 29)
- Update (48)
- VoIP (23)
- Unknown Applications
- Cloud/IT (72, △ 12)
- Email (76, △ 11)
- General Interest (254, △ 15)
- Network Service (338)
- P2P (55)

Network Protocol Enforcement

Application and Filter Overrides

+ Create New Edit Delete

Priority	Details	Type	Action
1	BWVR Excessive-Bandwidth	Filter	<input checked="" type="checkbox"/> Block
2	VEND Google	Filter	<input checked="" type="checkbox"/> Monitor

2

- A. YouTube access is blocked based on Excessive-Bandwidth Application and Filter override settings.
- B. Facebook access is allowed but you cannot play Facebook videos based on Video/Audio category filter settings.
- C. Facebook access is blocked based on the category filter settings.
- D. YouTube search is allowed based on the Google Application and Filter override settings.

Answer: B,D

Explanation:

Facebook belongs to the Social Media application category, which is set to Block in the application sensor. Therefore, any Facebook application traffic is blocked by category.

YouTube Search may fall under Google services or General Interest depending on how traffic is parsed (especially with SSL deep inspection).

The Google application override is set to Monitor, which means traffic is allowed, just logged.

The Video/Audio category (which includes YouTube video playback) is blocked, but this does not block YouTube Search, which is just browsing and searching on the site, is not blocked by the Video/Audio category unless the actual video stream starts.

NEW QUESTION # 49

An administrator has configured a dialup IPsec VPN on FortiGate with add-route enabled.

However, the static route is not showing in the routing table.

Which two statements about this scenario are correct? (Choose two.)

- A. The administrator must ensure phase 2 is successfully established.
- B. The administrator must enable a dynamic routing protocol on the dialup interface.
- C. The administrator must use a policy route instead of a static route for add-route to work properly.
- D. The administrator must define the remote network correctly in the phase 2 selectors.

Answer: A,D

Explanation:

The administrator must ensure phase 2 is successfully established → The static route for the dialup VPN is only added after Phase 2 negotiation completes successfully.

The administrator must define the remote network correctly in the phase 2 selectors → The add- route feature installs a route based on the Phase 2 selectors; if they are incorrect, no route will appear in the routing table.

NEW QUESTION # 50

Refer to the exhibits, which show the firewall policy and an antivirus profile configuration.

The screenshot displays the 'Firewall policy configuration' window for a policy named 'Internet_Access'. The configuration is as follows:

- Name:** Internet_Access
- Incoming Interface:** port2
- Outgoing Interface:** port1
- Source:** all
- Destination:** all
- Schedule:** always
- Service:** DNS, FTP, HTTP, HTTPS
- Action:** ACCEPT (checked), DENY (unchecked)
- Inspection Mode:** Flow-based (selected), Proxy-based
- Firewall/Network Options:**
 - NAT:** Enabled
 - IP Pool Configuration:** Use Outgoing Interface Address (selected), Use Dynamic IP Pool
 - Preserve Source Port:** Disabled
 - Protocol Options:** PROT default
- Security Profiles:**
 - AntiVirus:** Enabled, AV default
 - Web Filter:** Disabled
 - DNS Filter:** Disabled
 - Application Control:** Disabled
 - IPS:** Disabled
 - File Filter:** Disabled
 - SSL Inspection:** SSL deep-inspection

Antivirus profile configuration

Edit AntiVirus Profile

Name: default

Comments: Scan files and block viruses. 29/255

AntiVirus scan: **Block** Monitor

Feature set: **Flow-based** Proxy-based

Inspected Protocols

HTTP

SMTP

POP3

IMAP

FTP

CIFS

APT Protection Options

Treat Windows executables in email attachments as viruses

Send files to FortiSandbox for inspection

Send files to FortiNDR for inspection

Include mobile malware protection

Quarantine

Virus Outbreak Prevention

Use FortiGuard outbreak prevention database

Use external malware block list

Use EMS threat feed

Why is the user unable to receive a block replacement message when downloading an infected file for the first time?

- A. The firewall policy performs a full content inspection on the file.
- B. The intrusion prevention security profile must be enabled when using flow-based inspection mode.
- C. The option to send files to FortiSandbox for inspection is enabled.
- **D. Flow-based inspection is used, which resets the last packet to the user.**

Answer: D

Explanation:

In Flow Based scanning, if a virus is detected, the final packet is dropped making the file unusable to the end user. FG caches the URL of the file. If the user attempts to download again, rather than scanning the file again, the IPS engine then sends a block message to the user.

NEW QUESTION # 51

Which inspection mode does FortiGate use for application profiles if it is configured as a profile-based next-generation firewall (NGFW)?

- A. Certificate inspection
- B. Proxy-based inspection
- C. Flow-based inspection
- D. Full content inspection

Answer: C

Explanation:

You can configure application control in proxy-based and flow-based firewall policies. However, because application control uses the IPS engine, which uses flow-based inspection, the INSPECTION is always flow-based.

NEW QUESTION # 52

.....

We here guarantee that we will never sell the personal information of our candidates. There is no need for you to worry about the individual privacy under our rigorous privacy NSE4_FGT_AD-7.6 actual test guide. As regards purchasing, our website and NSE4_FGT_AD-7.6 study files are absolutely safe and free of virus. For further consideration we will provide professional IT personnel to guide your installation and the use of our NSE4_FGT_AD-7.6 Exam Questions remotely. So you can buy our NSE4_FGT_AD-7.6 actual test guide without any misgivings. If you have any questions, please you contact us online through the email.
