

# Quiz 2026 Nutanix Accurate NCP-EUC: Dump Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam File

2026 Latest ExamcollectionPass NCP-EUC PDF Dumps and NCP-EUC Exam Engine Free Share: [https://drive.google.com/open?id=1964ypE\\_Ib5VJEDZonk\\_V6S2uLOP-92y](https://drive.google.com/open?id=1964ypE_Ib5VJEDZonk_V6S2uLOP-92y)

Here we want to give you a general idea of our NCP-EUC exam questions. Our website is operated with our NCP-EUC practice materials related with the exam. We promise you once you make your choice we can give you most reliable support and act as your best companion on your way to success. We not only offer NCP-EUC free demos for your experimental overview of our practice materials, but being offered free updates for whole year long.

To be eligible for the NCP-EUC Certification Exam, candidates must have at least six months of experience in deploying and managing end-user computing solutions using Nutanix technology. They must also have a solid understanding of VMware vSphere, Microsoft Windows Server, and desktop operating systems like Windows 10.

## NCP-EUC Study Guide & NCP-EUC Guide Torrent & NCP-EUC Practice Test

Our company ExamcollectionPass is glad to provide customers with authoritative study platform. Our NCP-EUC quiz torrent was designed by a lot of experts and professors in different area in the rapid development world. At the same time, if you have any question on our NCP-EUC exam questions, we can be sure that your question will be answered by our professional personal in a short time. In a word, if you choose to buy our NCP-EUC Quiz torrent, you will have the chance to enjoy the authoritative study platform provided by our company.

## Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q39-Q44):

### NEW QUESTION # 39

A network team is designing a new switch infrastructure and wants to keep VM traffic and Storage resiliency traffic separate while minimizing the number of physical ports in use on the switch.

What best practice design choice will work?

- A. Configure traffic shaping to distribute traffic between VLANs
- B. Separate CVM and VM NICs in different virtual switches
- C. Connect breakout cables to multiple node interfaces
- **D. Use the native VLAN for CVMs and tagged VLAN for VMs**

**Answer: D**

Explanation:

To achieve logical traffic separation while minimizing physical ports (using the same physical uplinks for multiple traffic types), Nutanix AHV networking best practices recommend the use of 802.1Q VLAN tagging.

The standard validated design is to:

\* Place the CVM and AHV Host management/storage interfaces on the Native VLAN (untagged) or a specific management VLAN.

\* Place User VM (Guest) traffic on Tagged VLANs.

This configuration allows storage replication traffic (CVM) and user traffic (VMs) to share the same physical cables (minimizing port usage) while remaining logically isolated at the switch level. Options like separate virtual switches (Option B) often require dedicated physical uplinks, which violates the requirement to minimize ports.

### NEW QUESTION # 40

After receiving multiple complaints from VMware Horizon-based virtual desktop users about their slower logon and application load times, an administrator performed troubleshooting on the issue to optimize the environment.

The following discoveries were made on the Nutanix cluster:

- A. 4% average CPU Ready time
- B. Host power Policy set to High Performance
- C. 75% average memory utilization
- **D. Failed to create Native clone errors.**

**Answer: D**

Explanation:

one of the possible causes of slower logon and application load times for VMware Horizon-based virtual desktop users is Failed to create Native clone errors. This error occurs when there is a problem with cloning virtual machines using Nutanix Native Clones technology. To troubleshoot this issue, you can check the following:

The Nutanix cluster has enough free space to create clones

The Nutanix cluster has enough CPU and memory resources to handle cloning operations The Nutanix cluster is running a compatible version of AOS and AHV with VMware Horizon The VMware Horizon environment is configured correctly to use Nutanix Native Clones The VMware Horizon agent is installed and updated on the master image

### NEW QUESTION # 41

Refer to the exhibit.

An administrator is configuring a virtual desktop gold master image with P40 NVIDIA vGPU. upon trying to add a vCPU assignment in Prism Element, the administrator noticed that it is not selectable and cannot proceed. Which two actions are correct steps to resolve this issue? (Choose two.)

- A. Disable ECC by running `nvidia-smi -e 0`.
- B. Check if ECC Mode is turned on by running `nvidia-smi -q | grep "ECC Mode" -A2`
- C. Install the NVIDIA GPU drivers on the Gold Master.
- D. Install the NVIDIA GPU Manager Driver.

**Answer: A,B**

Explanation:

ECC (Error Correcting Code) mode is a feature of some NVIDIA GPUs that provides error detection and correction for memory errors. However, ECC mode can interfere with vGPU functionality and prevent vGPU-enabled VMs from being created or started. Therefore, two correct steps to resolve this issue are B (Disable ECC by running `nvidia-smi -e 0`) and D (Check if ECC Mode is turned on by running `nvidia-smi -q | grep "ECC Mode" -A2`).

#### NEW QUESTION # 42

An administrator attempts to create a Machine Catalog for Windows 11 desktops in Citrix utilizing Machine Creation Services (MCS), but the desktops fail to register on startup. What could be preventing registration?

- A. Insufficient CPU/Memory allocated to machines.
- B. Invalid characters in Machine name.
- C. Time is off on the machines.
- D. No RDS Licenses are available.

**Answer: C**

Explanation:

For a Citrix VDA (Virtual Delivery Agent) to successfully register with the Delivery Controller, it must establish a secure communication channel which relies heavily on Kerberos authentication.

A common cause for registration failure on startup, particularly in new deployments or non-persistent environments, is that the Time is off on the machines. If the system clock of the virtual desktop drifts more than 5 minutes from the domain controller or the Delivery Controller, Kerberos ticket generation fails. This prevents the VDA from authenticating with the Broker Service, resulting in a "Unregistered" state in Citrix Studio. While Windows 11 has strict hardware requirements (Option A), failing to meet those usually prevents the OS from booting or installing entirely; if the OS boots but fails to register, time synchronization is the most probable infrastructure cause.

An administrator needs to create a new MCS Catalog, but is receiving a failure error, as shown below:

Acropolis \_ Inventory: Getcontent Exception:system.ArgumentException: Error during serialization or deserialization using the JSON  
Java Scriptserialier. The length of the string exceeds the value set on the maxJsonLenth property.

- A. 0
- B. `nutanix@cvmr: ~$ acli snapshot.list I wc -l`
- C. 1
- D. `nutanix@cvmr: ~$ acli snapshot.list I wc -l`
- E. Running the below command on CVM shows the following output:

**Answer: B,C,D**

### NEW QUESTION # 44

• • • • •

The Nutanix NCP-EUC exam questions are being offered in three different formats. These formats are Nutanix NCP-EUC PDF dumps files, desktop practice test software, and web-based practice test software. All these three Nutanix NCP-EUC Exam Dumps formats contain the real Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam (NCP-EUC) exam questions that assist you in your NCP-EUC practice exam preparation and finally, you will be confident to pass the final NCP-EUC exam easily.
