Research indicates that government warnings can affect buying patterns. A recent federal research report links red-meat consumption to poor health. Another report praises chicken as a healthy meat alternative. If other market conditions remain the same, the price of chicken will probably

- A. rise, then fall
- B. increase
- C. remain unchanged
- D. decrease

#### Answer: B

Explanation:

Government warnings linking red meat to poor health and praising chicken as a healthier alternative are likely to increase consumer demand for chicken. With other conditions constant, increased demand shifts the demand curve right, raising the equilibrium price of chicken. Option B (increase) would occur with decreased demand. Option C (unchanged) ignores the demand shift. Option D (rise, then fall) lacks evidence for a subsequent decline. This question aligns with the Economics category, focusing on demand and price dynamics.
