Microsoft Configuring and Operating Microsoft Azure Virtual Desktop 認定 AZ-140 試験問題 (Q103-Q108):

質問 # 103

You have an Azure Virtual Desktop deployment.

You are configuring the outbound firewall settings for the host pool.

Which outbound URL and outbound port should you configure to ensure that the host machines maintain Windows activation? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Microsoft

Outbound URL:

- *.wvd.microsoft.us
- *eh.servicebus.windows.net
- gcs.prod.monitoring.core.windows.net
- kms.core.windows.net

Outbound port:

- 80
- 389
- 443
- 1688

正解:

解説:

ANSWER AREA

Microsoft

Outbound URL:

- *.wvd.microsoft.us
- *eh.servicebus.windows.net
- gcs.prod.monitoring.core.windows.net
- kms.core.windows.net

Outbound port:

- 80
- 389
- 443
- 1688

質問 # 104

You deploy an Azure Virtual Desktop session host pool.

You need to provide a group of pilot users access to the virtual machines in the pool.

What should you do?

- A. Add the users to a Remote Desktop Users group on the virtual machines.
- **B. Create a role assignment.**
- C. Create a role definition.
- D. Add the users to the local Administrators group on the virtual machines.

正解: B

質問 # 105

HOTSPOT

You have a Windows Virtual Desktop deployment.

You need to ensure that all the connections to the managed resources in the host pool require multi-factor authentication (MFA).

Which two settings should you modify in a conditional access policy? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

New

Conditional access policy

Control user access based on conditional access policy to bring signals together, to make decisions, and enforce organizational policies. [Learn more](#)

質問 # 106

Your on-premises network contains an Active Directory domain that syncs with an Azure AD tenant. You have an Azure Virtual Desktop host pool that contains Windows 11 session hosts joined to the domain. You need to configure Azure NetApp Files to store user profile containers.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

NOTE: More than one order of answer choices is correct. You will receive credit for any of the correct orders you select.

Actions

Create a capacity pool.

Create a new NFS volume.

Create a new SMB volume.

Configure an Active Directory connection to the Azure AD tenant.

Create a new Azure NetApp Files account.

Configure an Active Directory connection to the on-premises domain.

Answer Area
