## Simulations H12-891\_V1.0 Pdf, New H12-891\_V1.0 Dumps Questions

Our H12-891\_V1.0 test torrent has been well received and have reached 99% pass rate with all our dedication. As a powerful tool for a lot of workers to walk forward a higher self-improvement, our H12-891\_V1.0 certification training continued to pursue our passion for advanced performance and human-centric technology. To get a full understanding of our H12-891\_V1.0 study torrent,

you can visit our web or free download the demo of our H12-891\_V1.0 exam questions as we provide them on the web for our customers to try the quality of our H12-891\_V1.0 training guide.

Huawei H12-891\_V1.0 (HCIE-Datcom V1.0) Exam is a certification exam designed to test the knowledge and skills of IT professionals in the field of data communication. H12-891\_V1.0 exam is specifically targeted towards those who are seeking to advance their careers in network design, implementation, and maintenance. Passing the Huawei H12-891\_V1.0 Exam is a great way to demonstrate one's proficiency in data communication and to open up new opportunities for career advancement.

## Huawei HCIE-Datcom V1.0 Sample Questions (Q64-Q69):

### NEW QUESTION # 64

Which of the following statements about OPS (Open Programmability System) application scenarios is incorrect?

- A. The OPS can be used to automatically check the health status of devices.
- B. The OPS can reduce the impact of the network environment in some cases. For example, when collected information is transmitted to a server, the Python script can be used to temporarily store the execution result to the device when the network is disconnected. After the network is reconnected, the execution result is transmitted to the server.
- C. When the OPS is used to automatically deploy unconfigured devices, a Python script is used to obtain the IP addresses of the software and configuration file server and download the system software and configuration file.
- D. To enable a network device to automatically send a configuration file to the server after the device configuration is saved, users can use the maintenance assistant to create a timer trigger condition and periodically run the Python script.

**Answer: B**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

A: Correct: OPS can use the maintenance assistant to trigger Python scripts periodically or based on events.

B: Correct: OPS supports automatic deployment using Python scripts to download software and configuration files.

C: Incorrect: OPS does not inherently provide local storage for temporarily saving execution results when the network is disconnected. This would require additional programming logic in the script itself, which is not a built-in feature of OPS.

D: Correct: OPS can run scripts to automatically check device health and report the status.

Therefore, the incorrect statement is C.

### NEW QUESTION # 65

The following statement about the NSSA area is correct (multiple choice).

- A. The NSSA zone must automatically generate a default LSA to access the external network
- B. In the NSSA area where the OSPF neighbor sends hello packets, the N position 0, E within the option field Position 1
- C. In the OSPF neighbor in the NSSA region sends hello packets, position 1 within the option field, position E
- D. The NSSA zone generates a Category VII LSA to advertise external routing, and the FA address in the Category VII LSA acts to prevent loops

**Answer: C**

### NEW QUESTION # 66

The following description of the Layer 6 functionality in the OSI reference model is correct?

- A. Provides a common data compression and encryption scheme
- B. Establishing, maintaining, and terminating communication sessions
- C. Determines the availability of resources
- D. Synchronous communication

**Answer: A**

### NEW QUESTION # 67

To obtain the token ID of Master NCE, you need to send an HTTP request using the following Python code to invoke the Master NCE RESTful API:

Which of the following statements is incorrect?

- A. You can run `print(r.json())` to display the response message sent from the server.
- B. The request body is in JSON format.
- C. Token resources are located at `https://139.9.213.72:18002/controller/v2/tokens`.
- **D. The HTTP request uses the GET method to query the token value.**

**Answer: D**

Explanation:

Comprehensive and Detailed Explanation:

#Breakdown of the Python Code:

##(A) Correct# The function `r.json()` can be used to display the server response (token details).

##(B) Correct# The token request URL is correct.

##(D) Correct# The request body is in JSON format (`json={"userName": nbi_name, "password": nbi_pwd}`).

##(C) Incorrect# The request uses POST, not GET (`requests.post()` is explicitly called).
