Free PDF 2026 CompTIA Updated CV0-004: Reliable CompTIA Cloud+ (2025) Test Sims

Are you still distressed that you are a young learner of CV0-004 exam prep? From now on, Prep4sureGuide will solve all your worries about the CV0-004 test. The textbooks of CV0-004 test questions contain different perspective materials. Even if you are young learners, you can master CV0-004 Test Questions easily. Having it, you will have the key to pass CV0-004 exam and will have unprecedented confidence. So what are you waiting for?

CompTIA Cloud+ (2025) Sample Questions (Q325-Q330):

NEW QUESTION # 325

A retail store is rolling out a new point-of-sale solution to several locations where the staff members normally use cash registers. Which of the following activities will best assist staff members with integrating this new solution? (Select two).

- A. Gap analysis
- B. Documentation
- C. Progress monitoring
- D. Touch points
- E. Training sessions
- F. Team collaboration

Answer: B,E

Explanation:

For successful adoption of new systems, user documentation and training sessions are essential.

Documentation provides reference material, while training equips staff with hands-on knowledge for daily operations. Gap analysis and monitoring are planning and control tasks but do not directly support staff integration.

Reference: CompTIA Project+ PK0-005 - Change Management & Training; CompTIA Cloud+ CV0-004 Operations & Support domain.

NEW QUESTION # 326

A company's engineering department is conducting a month-long test on the scalability of an in- house-developed software that requires a cluster of 100 or more servers. Which of the following models is the best to use?

- A. SaaS
- B. IaaS
- C. DBaaS
- D. PaaS

Answer: B

Explanation:

For testing the scalability of an in-house-developed software that requires a cluster of 100 or more servers, Infrastructure as a Service (IaaS) is the best model. IaaS provides the necessary compute resources and allows the engineering department to configure the environment as needed for their specific test without the constraints that might be present in PaaS or SaaS offerings.

NEW QUESTION # 327

A project team that handles sensitive data analysis recently onboarded three new employees.

Which of the following should the PM do first?

- A. Check employee security clearance
- B. Execute an analysis of the sensitive data
- C. Allow access to the internet on corporate computers
- D. Train the new employees to handle sensitive data

Answer: A

Explanation:

When onboarding new staff who will handle sensitive data, the PM must first verify their security clearance or authorization. Only authorized personnel should access sensitive systems or datasets. Training follows after confirming clearance. Data analysis itself should never begin until security requirements are validated.

NEW QUESTION # 328

Which of the following is an auditing procedure that ensures service providers securely manage the data to protect the interests of the organization and the privacy of its clients?

- A. ITIL
- B. SOC2

- C. CIS
- D. ISO 27001

Answer: B

Explanation:

SOC2 (Service Organization Control 2) is an auditing procedure that ensures service providers securely manage data to protect the interests of an organization and the privacy of its clients. SOC2 is specifically designed for service providers storing customer data in the cloud, making it pertinent for data management and privacy.

Reference: SOC2 and its role in auditing and ensuring secure data management by cloud service providers are part of the compliance standards and regulations included in the CompTIA Cloud+ certification material.

NEW QUESTION # 329

A cloud solutions architect needs to design a solution that will collect a report and upload it to an object storage service every time a virtual machine is gracefully or non-gracefully stopped. Which of the following will best satisfy this requirement?

- A. An API of the object-defined storage service that will scrape the stopped VM disk and self-upload the required files as objects
- B. An event-driven architecture that will send a message when the VM shuts down to a log-collecting function that extracts and uploads the log directly from the storage volume
- C. Creating a webhook that will trigger on VM shutdown API calls and upload the requested files from the volume attached to the VM into the object-defined storage service
- D. A script embedded on the stopping VM's OS that will upload the logs on system shutdown

Answer: B

Explanation:

An event-driven architecture is suited for this scenario, where an event (like a VM shutdown) triggers a function to execute specific tasks (log collection and upload). This approach is efficient and ensures that the logs are collected and uploaded to an object storage service every time the VM is stopped, regardless of whether it is a graceful or non-graceful shutdown.
