高質量的Salesforce B2C-Commerce-Architect資訊和授權的NewDumps - 認證考試材料的領導者

在如今這個人才濟濟的社會，穩固自己的職位是最好的生存方法。NewDumps提供的考試練習題的答案是非常準確的，我們是可以100%幫你通過B2C-Commerce-Architect考試。但是穩固自己的職位並不是那麼容易的。當別人在不斷努力讓提高職業水準時，如果你還在原地踏步、安於現狀，那麼你就會被淘汰掉。要想穩固自己的職位，需要不斷提升自己的職業能力，跟上別人的步伐，你才能使自己不太落後於別人。

最新的 Salesforce Architect B2C-Commerce-Architect 免費考試真題 (Q39-Q44):

問題 #39

The client provided these business requirements:

- * The B2C Commerce storefront will integrate with the client's Order Management System (OMS).
- * The storefront will provide real-time order export of successfully pieced orders. The OMS supports both web service export and SFTP batch order export, but the client has expressed concern about the availability of the OMS.

Which two solutions satisfy the requirements and address the OMS reliability concern?

Choose 2 answers

- A. implement a batch export of orders via web service, excluding exported orders. This runs as a scheduled Job with an hourly run rate and marks processed orders as exported upon success.
- B. Implement a live export of orders during checkout via web service, marking the processed order as exported when the AM returns successfully.
- C. Implement a Live export of orders during checkout via SFTP, marking the processed order as exported when it has completed successfully.
- D. Implement a batch export of orders to SFTP, excluding exported orders. This runs as a scheduled job with a high-frequency run rate and marks processed orders as exported upon success.

答案: B,D

問題 #40

There is an issue with the site when the domain is opened from Google search results. After researching the problem, it turns out that the site returns a 404 page error when accessed with a parameter in the URL.

What should the Architect recommend to fix that issue?

- A. Add this snippet to the aliases configuration for the domain:

```
{
  "pipeline": "Home-Show",
  "apply-to-host-only-request-with-params": "true"
}
```

- B. Add this snippet to the aliases configuration for the domain

```
{
  "controller": "Home-Show",
  "apply-to-host-only-request-with-params": "true"
}
```

- C. Add dynamic catch-all rule to redirect to home page.
 - D. Add dynamic redirect if the URL contains parameter to Home Show.
- Add this snippet to the aliases configuration for the domain

答案： A

問題 #41

The following promotions are configured with no exclusivity (can be combined with any other promotion) in a - 1 month campaign:

- * Free correct- in -store shipping
- * 20% accessories products discount, applies for all customers
- * \$5 off coupon based discount, sent to a selected group of customers

The combination of above promotions allows customers to get 16 socks for free in store. This was unintended, and the Client If considering disabling the coupon. The Client is concerned about a potential spike in the number of Call Center calls from customers who had the coupon code added to their baskets before it was disabled. As basket lifetime is set to 30 days for all customers, this can continue for the full length of the campaign.

What solutions should the Architect suggest to keep the Call Center calls to a minimum?

- A. Disable the coupon code. Reduce the basket lifetime in Business Manager to expire some of the existing baskets
- B. Disable the coupon code. Clear the production cache from the Business Manager to clear existing baskets.
- C. Disable the coupon code. Restart the production instance from control Center to clear existing baskets.
- D. Disable the coupon code. Email all the customers to not use the coupon code in their baskets.

答案： A

解題說明：

Reducing the basket lifetime is a strategic approach to minimizing the impact of disabling a promotional coupon. This action will cause baskets that may still contain the now-disabled coupon to expire sooner, thereby reducing the potential volume of calls to the Call Center from customers inquiring about the coupon.

This method also avoids the drastic measure of clearing all existing baskets or restarting the production instance, which could disrupt user experience and lead to further customer dissatisfaction.

問題 #42

The development team is building a complex LINK cartridge for a hosted checkout solution. The provider's database is used as a single source of truth, but the information in the Basket on B2C Commerce side needs to be synchronized. This is implemented asynchronously the back end when the customers interact with the hosted checkout page and change their shipping/bidding details. As an Architect you have to advise the development team with how to implement the logging to ensure that there will be a mechanism available to allow troubleshooting in the case something goes wrong on production.

Which solution should the Architect suggest?

- A. Report debug level message for the back-end asynchronous communication between both systems. Report all errors at error-level message.
- B. Get logger for cartridge-specific category. Report Info level message for the back-end asynchronous communication between both systems. Report all errors at error level message.
- C. Report info level message for the back-end asynchronous communication between both systems Report all errors at error level message.
- D. Get logger for cartridge specific category. Report debug level message for the back end asynchronous communication between both systems. Report all errors at error level message.

答案：B

問題 #43

A company is beginning a multi-cloud implementation involving B2C Commerce and Service Cloud. The company wants to trace configuration and code changes as much as possible and ensure basic standards for code quality.

Which three options should a Solution Architect recommend to help the company with this goal?

Choose 3 answers

- A. Smoke testing
- B. Salesforce DX
- C. Static Code Analysis tools
- D. GIT Repository
- E. CI/CD Pipelines

答案：C,D,E

問題 #44
