

300-620 Exam Dumps Demo, Answers 300-620 Real Questions

P.S. Free 2026 Cisco 300-620 dumps are available on Google Drive shared by PDFDumps: <https://drive.google.com/open?id=1XpyOH5sR7wYEIMRu30I1DtXDqAzLuhLv>

The simplified information contained in our Cisco 300-620 training guide is easy to understand without any difficulties. And our Cisco 300-620 practice materials enjoy a high reputation considered as the most topping practice materials in this career for the merit of high-effective. A great number of candidates have already been benefited from them.

In order to make all customers feel comfortable, our company will promise that we will offer the perfect and considerate service for all customers. If you buy the 300-620 training files from our company, you will have the right to enjoy the perfect service. If you have any questions about the 300-620 learning materials, do not hesitate and ask us in your anytime, we are glad to answer your questions and help you use our 300-620 study questions well. We believe our perfect service will make you feel comfortable when you are preparing for your 300-620 exam and you will pass the 300-620 exam.

Answers 300-620 Real Questions & 300-620 Exam Overviews

Our web-based practice exam software is an online version of the Cisco 300-620 practice test. It is also quite useful for instances when you have internet access and spare time for study. To study and pass the Cisco 300-620 Certification Exam on the first attempt, our Cisco 300-620 practice test software is your best option.

Cisco 300-620 certification exam is designed for network professionals, system engineers, and technical architects who are responsible for implementing and managing Cisco ACI solutions. 300-620 exam is ideal for those who have experience with Cisco technologies and have a solid understanding of network protocols, data center architecture, and virtualization. Candidates who are familiar with Cisco Nexus switches, Cisco UCS servers, and VMware virtualization will find 300-620 Exam to be a natural fit.

Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q147-Q152):

NEW QUESTION # 147

Which endpoint learning operation is completed on the ingress leaf switch when traffic is received from a Layer 3 Out?

- A. The source IP address of the traffic is learned as a local endpoint.
- B. The source IP address of the traffic is learned as a remote endpoint.
- C. The source MAC address of the traffic is learned as a remote endpoint.
- D. The source MAC address of the traffic is learned as a local endpoint.

Answer: D

NEW QUESTION # 148

Refer to the exhibit. A Cisco ACI fabric has these configurations:

- VPC exists between Leaf2 and Leaf3.
- A switch profile called SW_Prof exists.
- A switch selector called SW_Select exists.
- An interface selector named Int_Select exists.
- An interface profile named Int_Prof exists.

Which two sets of actions must the engineer perform to connect Server1 to Leaf2 and Leaf3 using VPC? (Choose two.)

- **A. Map switch selector SW_Select under switch profile SW_Prof.
Add Leaf2 and Leaf3 node IDs under switch selector SW_Select.
Assign policy group to interface selector Int_Select.**
- B. Add Leaf2 and Leaf3 node IDs under switch selector SW_Select.
Map switch profile SW_Prof under switch selector SW_Select.
Create the explicit VPC group from access policies.
- C. Add Leaf2 and Leaf3 node IDs under switch profile SW_Prof.
Map Int_Select under Int_Prof.
Assign policy group to interface profile Int_Prof.
- D. Create the explicit VPC group from fabric policies.
Map interface Eth1/1 under interface selector Int_Select.
Assign policy group to interface selector Int_Select.
- **E. Create the explicit VPC group from access policies.
Map interface Eth1/1 under interface selector Int_Select.
Map Int_Select under Int_Prof.**

Answer: A,E

NEW QUESTION # 149

A customer creates Layer 3 connectivity to the outside network. However, only border leaf switches start receiving destination updates to other networks from the newly created L3Out. The updates must also be propagated to other Cisco ACI leaf switches. The L3Out is linked with the EPGs via a contract. Which action must be taken in the pod policy group to accomplish this goal?

- **A. Apply a BGP route reflector policy.**
- B. Enable a COOP policy.
- C. Configure an IS-IS policy.
- D. Implement an access management policy.

Answer: A

Explanation:

To ensure that destination updates from a newly created L3Out are propagated to all Cisco ACI leaf switches, a BGP route reflector policy should be applied. This policy allows the border leaf switches, which act as BGP route reflectors, to redistribute the learned routes to other leaf switches within the fabric.

NEW QUESTION # 150

Which two protocols are used for fabric discovery in ACI? (Choose two.)

- **A. LLDP**
- B. CDP
- **C. DHCP**
- D. OSPF
- E. ISIS

Answer: A,C

NEW QUESTION # 151

Which method does the Cisco ACI fabric use to load-balance multideestination traffic?
