NEW QUESTION # 10

Which of the following applies in a greenfield deployment scenario when migrating configurations from your test site?

- A. You can revert migrated configurations from the target site.
- B. You cannot make other configuration updates in ICM when a migration operation is in progress.

- C. The status changes to Complete when migration is finished.
- D. if any configuration type fails during the migration process, you cannot create a new migration request.

Answer: B,C

NEW QUESTION # 11

The customer wants to have a field to hold Contract Storage Locations and the address. Those locations are loaded from an external system, and the user should be able to search for storage locations.

What should be used to hold the valid storage locations?

- A. You should load a new Enumeration Type and call it Storage Location and load the location addresses. Create a new field of type Enumeration with a custom filter to only Enumerations of type show Storage Locations.
- B. Create a new field of type Date, where each date entry is tied to a unique Storage Location and its corresponding address, allowing users to select locations based on historical data entries.
- C. You should create a new Flex Master Data (FMD) Template with appropriate attributes and call it Storage Location. Once the template is published and sample data loaded, you can create a custom field and select the type Storage Location
- D. Create a new field of type Text, with a custom Validation where the available Storage Locations are listed.

Answer: C

NEW QUESTION # 12

Which scenarios are applicable when moving templates from the test site to the production site by ICM? Note: There are 2 correct answers to this question.

- A. Published templates with flex master data references in the test site are migrated to the production site during the first migration attempt.
- B. Draft templates on the source site are skipped.
- C. Batch imports are available for templates when migrating configuration bundles.
- D. New templates that successfully migrated to the production site are in Draft state.

Answer: B,C
