

Valid 300-610 Real Test | 300-610 Reliable Test Dumps

DOWNLOAD the newest Exam4PDF 300-610 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1yD8DuPVKwG47ZEsnJmxDDBTSvnvdd65>

If you purchase our 300-610 preparation questions, it will be very easy for you to easily and efficiently find the exam focus. More importantly, if you take our products into consideration, our 300-610 study materials will bring a good academic outcome for you. At the same time, we believe that our 300-610 training quiz will be very useful for you to have high quality learning time during your learning process.

300-610 certification can help you prove your strength and increase social competitiveness. Although it is not an easy thing for somebody to pass the exam, but our 300-610 exam torrent can help aggressive people to achieve their goals. This is the reason why we need to recognize the importance of getting the test 300-610 Certification. More qualified certification for our future employment has the effect to be reckoned with, only to have enough qualification certifications to prove their ability, can we win over rivals in the social competition.

Latest updated Valid 300-610 Real Test & Guaranteed Cisco 300-610 Exam Success with Pass-Sure 300-610 Reliable Test Dumps

The Exam4PDF is one of the most in-demand platforms for Cisco 300-610 exam preparation and success. The Exam4PDF is offering valid, and real Cisco 300-610 exam dumps. They all used the Cisco 300-610 exam dumps and passed their dream Cisco 300-610 Exam easily. The Cisco 300-610 exam dumps will provide you with everything that you need to prepare, learn and pass

the difficult Cisco 300-610 exam.

Cisco 300-610 Exam is a computer-based test that is administered at Pearson VUE testing centers worldwide. 300-610 exam consists of 60-70 multiple-choice and scenario-based questions that must be completed within 90 minutes. The passing score for the exam is 825 out of 1000 points.

Cisco Designing Cisco Data Center Infrastructure Sample Questions (Q275-Q280):

NEW QUESTION # 275

A network consultant evaluates the Ethernet Adapter Policy configuration to be applied to the Cisco UCS blade servers. The policy must minimize latency and increase throughput for sensitive applications. The solution must increase the CPU data cache hit rate to meet these requirements. Which policy is required?

- A. AIC
- B. RDMA
- **C. ARFS**
- D. NVM-e

Answer: C

NEW QUESTION # 276

A Cisco UCS instance has four interfaces on a UCS VIC. Where on the fabric interconnect does each interface terminate?

- A. vPC
- B. physical port
- **C. virtual interface**
- D. port channel

Answer: C

Explanation:

<https://www.cisco.com/c/dam/en/us/products/collateral/servers-unified-computing/ucs-6300-series-fabric-interconnects/cisco-unified-fabric.pdf>

NEW QUESTION # 277

Where does Cisco UCS handle Fibre Channel traffic failover?

- A. in the hardware on the Cisco UCS VIC 12xx adapter or later
- **B. on the host, by using multipathing software**
- C. in the hardware on any Cisco UCS VIC adapter
- D. on a Cisco UCS Fabric Interconnect ASIC in Fibre Channel switching mode

Answer: B

Explanation:

Typically, host software - such as NIC teaming for Ethernet and EMC PowerPath or multipath I/O (MPIO) for Fibre Channel - provides failover across the two fabrics (Figure 4).

NEW QUESTION # 278

A network engineer must perform a VMM integration for the VMWare vCenter platform with the Cisco ACI Fabric. The vCenter is already installed in one of the rack servers connected to ACI leaf switches in a vPC mode. Which type of management network must be used to integrate vCenter with ACI?

- **A. out-of-band management**
- B. In-band management

- C. ARC infra
- D. VLAN infra

Answer: A

NEW QUESTION # 279

An engineer must create a solution for server deployment in a multitenant UCS environment with UCS Central. The solution must:

- Make use of centralized WWPN and IP pools.
- Define a unique network configuration for an organization.

Which action creates a solution that meets the requirements?

- A. Create a local service profile and reference global pools.
- B. Configure a global service profile that references local policies.
- C. Set up a local vNIC template and create global service profiles.
- D. Copy global pools to the local organization and reserve a WWPN range.

Answer: A

Explanation:

By defining the service profile locally within the tenant's organization and pointing its WWPN and IP assignments to the centralized (global) pools in UCS Central, you get unique network settings per org while still leveraging shared WWPN/IP resources.

NEW QUESTION # 280
