You don't need to install or use any plugins or software to take the 312-85 web-based practice exam. Furthermore, you can take this online mock test via any operating system.

ECCouncil Certified Threat Intelligence Analyst Sample Questions (Q44-Q49):

NEW QUESTION # 44
H&P, Inc. is a small-scale organization that has decided to outsource the network security monitoring due to lack of resources in the organization. They are looking for the options where they can directly incorporate threat intelligence into their existing network defense solutions.
Which of the following is the most cost-effective methods the organization can employ?

- A. Look for an individual within the organization
- B. Recruit managed security service providers (MSSP)
- C. Recruit the right talent
- D. Recruit data management solution provider

Answer: B

Explanation:
For H&P, Inc., a small-scale organization looking to outsource network security monitoring and incorporate threat intelligence into their network defenses cost-effectively, recruiting a Managed Security Service Provider (MSSP) would be the most suitable option. MSSPs offer a range of services including network security monitoring, threat intelligence, incident response, and compliance management, often at a lower cost than maintaining an in-house security team. This allows organizations to benefit from expert services and advanced security technologies without the need for significant resource investment.References:

NEW QUESTION # 45
Tim is working as an analyst in an ABC organization. His organization had been facing many challenges in converting the raw threat intelligence data into meaningful contextual information. After inspection, he found that it was due to noise obtained from misrepresentation of data from huge data collections. Hence, it is important to clean the data before performing data analysis using techniques such as data reduction. He needs to choose an appropriate threat intelligence framework that automatically performs data collection, filtering, and analysis for his organization.
Which of the following threat intelligence frameworks should he choose to perform such task?

- A. TC complete
- B. Threat grid
- C. SIGVERIF
- D. HighCharts

Answer: A

NEW QUESTION # 46
Karry, a threat analyst at an XYZ organization, is performing threat intelligence analysis. During the data collection phase, he used a data collection method that involves no participants and is purely based on analysis and observation of activities and processes going on within the local boundaries of the organization.
Identify the type data collection method used by the Karry.

- A. Exploited data collection
- B. Passive data collection
- C. Raw data collection
- D. Active data collection

Answer: B

Explanation:

Karry's method of collecting data, which involves no active engagement with participants and is purely based on analysis and observation of activities within the organization, is known as passive data collection. This method is characterized by the non-intrusive monitoring of data and events, allowing analysts to gather intelligence without alerting potential adversaries or disrupting ongoing processes. Passive data collection is essential for maintaining operational security and obtaining an unaltered view of system and network activities.

NEW QUESTION # 47
A network administrator working in an ABC organization collected log files generated by a traffic monitoring system, which may not seem to have useful information, but after performing proper analysis by him, the same information can be used to detect an attack in the network.
Which of the following categories of threat information has he collected?

- A. Low-level data
- B. Strategic reports
- C. Advisories
- D. Detection indicators

Answer: D

NEW QUESTION # 48
Alison, an analyst in an XYZ organization, wants to retrieve information about a company's website from the time of its inception as well as the removed information from the target website.
What should Alison do to get the information he needs.

- A. Alison should recover cached pages of the website from the Google search engine cache to extract the required website information.
- B. Alison should use SmartWhois to extract the required website information.
- C. Alison should use https://archive.org to extract the required website information.
- D. Alison should run the Web Data Extractor tool to extract the required website information.

Answer: C

NEW QUESTION # 49
.....
