They should also have a thorough understanding of the Salesforce platform, including its security model, data model, and user interface. Candidates can also take advantage of Salesforce's official training resources, such as the Sharing and Visibility Designer course, to help prepare for the exam.

Salesforce Certified Sharing and Visibility Architect Sample Questions (Q37-Q42):

NEW QUESTION # 37

The sales manager in Japan have asked the sales manager in Australia to assist them with closing their deals. How are these requirements achieved?

- A. Use sharing set to give the sales manager access to the deals.
- **B. Create ownership-based sharing rule.**
- C. Use opportunity teams to automatically add the sales manager as a team member.
- D. Assign the sales manager View All on the opportunity object.

Answer: B

Explanation:

Explanation

Creating an ownership-based sharing rule is the best way to achieve the requirements. Ownership-based sharing rules allow administrators to automatically grant access to records owned by certain users or roles to other users or roles². This way, the sales manager in Australia can access the deals owned by the sales manager in Japan. Using sharing set, using opportunity teams, and assigning View All on the opportunity object are not options that can achieve the same result.

NEW QUESTION # 38

What should the Architect do to ensure Field-Level Security is enforced on a custom Visualforce page using the Standard Lead Controller?

- A. Use the "With Sharing" keyword on the Standard Lead Controller.
- B. Use the `Schema.SObject.Lead.isAccessible()` method.
- **C. Nothing; Field-Level Security will automatically be enforced.**
- D. Use the `{!Schema.sObjectType.Lead.fields.isAccessible()}` expression

Answer: C

Explanation:

Explanation

The architect does not need to do anything to ensure field-level security is enforced on a custom Visualforce page using the standard lead controller. This is because the standard controller automatically enforces field-level security based on the user's profile and permission sets. The user will only see the fields that they have read access to, and will only be able to edit the fields that they have edit access to

NEW QUESTION # 39

Universal Containers uses the standard Case object to track various support requests sent to servicing agents. Currently, the Case object has more than 400 fields. Eight different types of case processes have been established, each with a unique combination of statuses. The Director of Customer Service wants to ensure that servicing agents see only the required information specific to the case type they are addressing.

Which option is recommended to implement this requirement?

- A. Use different Page Layouts per case type, each representing the relevant fields per case type.
- B. Use a custom LWC to override the View action of the Case object, and a Custom Metadata Type to define the relevant fields per case type.
- C. Use Dynamic Forms with different field sections representing the relevant fields per case type, and control visibility of sections by Case Record Type value.

Answer: C

NEW QUESTION # 40

Universal Containers has a custom object to maintain Job information with a private sharing model. The Delivery group is distributed through the Role Hierarchy based on geography. As the Delivery group often collaborates on Jobs, all users in the Delivery profile required View access to all Job records. In special case, the Delivery user who owns a job must be able to grant a Product Development user access to a Job record. Which two platform features can be used to support these requirements?

Choose 2 answers

- A. "View All" Profile settings
- B. Manual Sharing
- C. Owner-based Sharing Rules
- D. Criteria-based Sharing Rules

Answer: A,B

NEW QUESTION # 41

Sales manager at universal containers (UC) have requested viewing customer invoices in Salesforce. Invoice data is mastered in the ERP system. The architect at UC decided to surface the customer invoices in salesforce using external objects and did the following:

-Configured an external object called Invoice.

-Created a lookup relationship between account and the invoice.

How can the architect grant the sales managers access to the customer invoices data?

- A. By creating sharing rules to share the invoices records with users in sales managers roles.
- B. By creating a sharing set to share invoices with users in sales manager role.
- C. By creating controlling the invoices object permission on the sales manager's profile.
- D. By creating manual sharing to share invoices with relevant sales managers.

Answer: C

NEW QUESTION # 42
