## Free PDF UiAAAv1 - UiPath Agentic Automation Associate –Reliable Valid Vce Dumps

Even if you spend a small amount of time to prepare for UiAAAv1 certification, you can also pass the exam successfully with the help of PrepAwayETE UiPath UiAAAv1 braindump. Because PrepAwayETE exam dumps contain all questions you can encounter in the actual exam, all you need to do is to memorize these questions and answers which can help you 100% pass the exam. This is the royal road to Pass UiAAAv1 Exam. Although you are busy working and you have not time to prepare for the exam, you want to get UiPath UiAAAv1 certificate. At the moment, you must not miss PrepAwayETE UiAAAv1 certification training materials which

are your unique choice.

## UiPath Agentic Automation Associate Sample Questions (Q59-Q64):

### NEW QUESTION # 59

Scenario: A user is working on a document in an HDX session and saves data on the desktop. The Virtual Delivery Agent (VDA) session abruptly crashes, causing the saved data to be lost. Which Citrix Profile Management policy can a Citrix Administrator enable to prevent data loss?

- A. Profile Caching
- **B. Active Write Back**
- C. Delay Cached Profile Deletion
- D. Profile Streaming

**Answer: B**

Explanation:

Active Write Back ensures that changes made during the session, such as saving files to the desktop, are written back to the user profile in real time. This prevents data loss if the VDA session crashes unexpectedly.

### NEW QUESTION # 60

Scenario: A Citrix Administrator has enabled an HDX Session printers policy within a Citrix Virtual Apps and Desktops Site. The administrator added a printer to a print server and assigned the printer to all users through a session printer policy. In addition, several local client printers are auto-created within HDX sessions. No other printing policies are configured. How will print jobs be routed when users send print jobs to a printer managed by the print server?

- **A. Directly to the network print server and then to the specified printer**
- B. Directly from the session Virtual Delivery Agent (VDA) machine to the printer
- C. Over the HDX virtual channel to the specified printer attached to the print server
- D. Over the HDX virtual channel, through the endpoint, and then to the print server

**Answer: A**

Explanation:

When using session printers from a print server, print jobs are routed directly from the VDA to the network print server, which then forwards them to the physical printer. The HDX virtual channel is only used for client printers, not for print server-based session printers.

### NEW QUESTION # 61

Scenario: A Citrix Administrator maintains a Citrix Virtual Apps and Desktops Site with a number of network print servers being used for all users. Currently, the print servers use native Windows drivers. No client printers are being used. New company guidelines require a reduction in the number of native drivers being used within the Site infrastructure. Which step can the administrator take to meet the new company guidelines?

- **A. Install the Universal Print Server on all print servers in the Site and update the Universal printer driver usage policy setting.**
- B. Configure the Citrix Universal Generic Printer and update the Auto-create generic universal printer policy setting.
- C. Install the Universal Print Server on all print servers in the Site and leave the default Universal printer driver usage policy setting.
- D. Enable the Citrix Universal Print Driver (EMF) driver and leave the default Universal printer driver usage policy setting.

**Answer: A**

Explanation:

By installing the Citrix Universal Print Server and configuring the Universal printer driver usage policy, print servers can use the Citrix Universal Print Driver instead of multiple native Windows drivers. This reduces the number of drivers in the environment while ensuring centralized network printing remains functional.

### NEW QUESTION # 62

After creating a new machine catalog, a Citrix Administrator notices that the Virtual Delivery Agent (VDA) machines fail to register. What could the administrator have done to cause this condition?

- A. Failed to take a VM snapshot prior to creating the catalog
- B. Failed to run the Citrix Health Assistant
- C. Selected an incompatible VDA functional level in Citrix Studio
- D. Selected an invalid VM naming scheme in Citrix Studio

**Answer: C**

Explanation:

If an incompatible VDA functional level is selected when creating the machine catalog, the VDA machines cannot register with the Delivery Controllers. The functional level must match or be supported by the installed VDA software version.

### NEW QUESTION # 63

What is the minimum permission a Citrix Administrator can grant to an IT manager to access Citrix Studio?

- A. Machine Catalog Administrator
- B. Host Administrator
- C. Delivery Group Administrator
- D. Read Only Administrator

**Answer: D**

### NEW QUESTION # 64

.....

The content and design of our UiAAAv1 learning quiz are all perfect and scientific, and you will know it when you use this. Of course, we don't need you to spend a lot of time on our UiAAAv1 exam questions. As long as you make full use of your own piecemeal time after 20 to 30 hours of study, you can go to the exam.
