Microsoft PL-600 certification exam consists of multiple-choice questions and performance-based tasks that test the candidate's ability to design, develop, and deploy solutions using the Microsoft Power Platform. PL-600 exam covers topics such as data modeling, user interface design, automation, integration, and solution deployment. PL-600 Exam is conducted online, and candidates are required to complete it within three hours.

Microsoft Power Platform Solution Architect Sample Questions (Q185-Q190):

NEW QUESTION # 185
A company uses Microsoft Power Platform solutions.
The company plans to set up application lifecycle management (AIM) capabilities to store the solutions in source control, which will be used to automate the release process.
You need to set up the initial ALM infrastructure to store the solutions in source control.
Which four actions should you perform in sequence?
To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:
1 - Create an Azure DevOps Project.
2 - Install the Microsoft Power Platform Build Tools.
3 - Create a Release pipeline.
4 - Add a task for Microsoft Power Platform Import Solution.

NEW QUESTION # 186
A company plans to implement Microsoft Power Platform to provide data controls. The current implementation is complex and spans multiple environments.
The IT team will implement DLP policies. Members of the team have different security roles applied to their user accounts, depending on their specified level of access.
You need to identify which policies the IT team can apply for the different security roles.
Which policy type should you recommend for each security role? To answer, move the appropriate policy types to the correct security roles. You may use each policy type once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation:

NEW QUESTION # 187
You are supporting a recent go-live for a model-driven app that includes mobile offline functionality.
Users report the following issues:
* The process of downloading initial metadata for the app takes hours to complete.
* Some account views are unavailable when the app is offline.
* Changes to users' security privileges are not reflected in the mobile app.
* Contact data is not available when the app is offline.
You need to resolve the mobile app performance issues.
What should you review? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 188
A company plans to integrate a model-driven app with external data sources. The company has the following requirements:
* Consume data in its data warehouse from Microsoft Dataverse.
* Use a plug-in to retrieve information from an external service.
You need to recommend a Microsoft Azure component for each requirement.
Which Azure components should you recommend? To answer, drag the appropriate Azure components to the correct requirements. Each Azure component may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
