ServiceNow Certified Implementation Specialist - Discovery Sample Questions (Q43-Q48):

NEW QUESTION # 43

Which 2 of the below record types are part of the Configuration Management Database (CMDB)?

Response:

- A. Device
- B. Relation Type
- C. Configuration Item (CI)
- D. IP Address

Answer: B,C

NEW QUESTION # 44

What identifiers does the Identification phase in discovery use for matching discovered CIs with the CMDB:
Response:

- A. CI Identifiers
- B. Class Identifiers
- C. sys id
- D. CMDB Identifiers

Answer: A

NEW QUESTION # 45

Based on the following image, which of the following choices is also true about London Linux Servers?

- A. It is a Datacenter Group in London.
- B. It is a CMDB Group with Default Group type.
- C. It is a CMDB Group with Health Group type.
- D. It is a CMDB Group with Dashboard Group type.

Answer: C

NEW QUESTION # 46

When installing a MID Server on a Windows platform, which right must be associated when creating a Service Account?

- A. Log on as service
- B. Local Admin
- C. MID Server User Role
- D. Domain Admin

Answer: A

Explanation:

The Service Account for the MID Server must have the Log on as service right on the Windows platform.

This right allows the MID Server to run as a Windows service and communicate with the ServiceNow instance. The Service Account does not need to have local or domain admin rights, as these are not required for the MID Server functionality. The MID Server User Role is a role on the ServiceNow instance, not on the Windows platform, and it is used to control the access and permissions of the MID Server on the instance.

:

Correcting MID Server Windows service account user and permissions

What is a ServiceNow MID Server and how does it work?

Configure Windows MID Server service credentials

NEW QUESTION # 47

After running Discovery and viewing the ECC Queue tab, what are some of the displayed default fields?
(Choose three.)

- A. Details
- B. CMDB CI
- C. Discovery schedule name
