

C1000-173 Exam Voucher & Valid Exam C1000-173 Practice

2026 Latest Dumps Valid C1000-173 PDF Dumps and C1000-173 Exam Engine Free Share: https://drive.google.com/open?id=1vIPKQitlD7nJBnxc3Ckxbd_RRkY0uhyLX

Our C1000-173 learning quiz is the accumulation of professional knowledge worthy practicing and remembering, so you will not regret choosing our C1000-173 study guide. The best way to gain success is not cramming, but to master the discipline and regular exam points of question behind the tens of millions of questions. Our C1000-173 Preparation materials can remove all your doubts about the exam. If you believe in our products this time, you will enjoy the happiness of success all your life

If you use the trial version of our C1000-173 study materials, you will find that our products are very useful for you to pass your exam and get the certification. Though the trail version of our C1000-173 learning guide only contains a small part of the exam questions and answers, but it shows the quality and validity. If you buy our C1000-173 Exam Questions, we can promise that you will pass the exam for sure and gain the according the certification.

Valid Exam C1000-173 Practice | C1000-173 Exam Dumps Free

May be you still strange to our C1000-173 dumps pdf, you can download the free demo of the dump torrent before you buy. If you have any questions to our IBM exam questions torrent, please feel free to contact us and we will give our support immediately. You will be allowed to updating C1000-173 Learning Materials one-year once you bought pdf dumps from our website.

IBM C1000-173 Exam Syllabus Topics:

Topic	Details
Topic 1	- Plan for a Cloud Pak for Data Implementation: This section of the exam measures the skills of an Implementation Consultant and covers determining which Cloud Pak for Data services to deploy based on organizational needs. It involves sizing the Kubernetes - OpenShift cluster appropriately for workload demands and planning backup and restore strategies to ensure data protection. Planning for high availability and disaster recovery is essential to maintain uninterrupted service. Multi-tenancy requirements must be understood to support multiple user groups securely on shared infrastructure. Migration requirements need assessment to transition existing data and workloads smoothly.
Topic 2	Architect with AI Series: This section measures the skills of an AI Solution Architect and includes designing architectures for solutions involving various IBM Watson AI services. Architecting with Watson Assistant involves creating conversational AI interfaces. Watson Discovery solutions focus on building cognitive search and content analytics applications. Watson Pipelines solutions involve orchestrating data science workflows. Watson OpenScale architectures enable AI model monitoring and governance. Architecting with Match 360 supports personalized engagement by integrating multi-channel customer insights.

Topic 3	Architect with Data Governance Services: This section evaluates skills of a Data Governance Specialist, covering the architecture of knowledge catalogs to enable data discovery and management. Data Privacy architectures ensure compliance with regulatory requirements around data protection. Knowledge Accelerators involve designing solutions that speed up data governance processes through predefined policies and templates.
Topic 4	Architect with Analytic Services: This domain targets a Data Analytics Architect and focuses on designing solutions using analytic components of Cloud Pak for Data. Architecting with DataStage involves creating data integration and ETL pipelines. Data Refinery architectures prepare and cleanse data for analysis. Db2 Big SQL solutions address querying large distributed data sets with SQL, facilitating analytics across diverse data sources.

IBM Cloud Pak for Data v4.7 Architect Sample Questions (Q77-Q82):

NEW QUESTION # 77

What must be created to enable the Cloud Pak for Data platform to use a company's custom CA certificate to validate certificates from internal servers?

- A. A secret containing a wildcard certificate for all internal servers.
- B. A secret that contains the company's CA certificate.
- C. A configmap that contains the company's CA certificate.
- D. A configmap that contains all internal server certificate chains.

Answer: C

Explanation:

To enable IBM Cloud Pak for Data to trust certificates from internal servers using a custom Certificate Authority (CA), the correct method is to create a Kubernetes ConfigMap that contains the CA certificate. This ConfigMap is referenced by the platform's foundational services to include the CA in the trusted root store.

Secrets are typically used for storing sensitive data like private keys and TLS certificates but are not used for adding trusted root CAs at the platform level. A ConfigMap is explicitly required by the platform to inject the CA trust into the certificate validation chain.

NEW QUESTION # 78

What happens when the maximum number of new service instances is reached in Watson Discovery?

- A. The user is warned that all service instances will stop.
- B. The oldest service instance is deleted to maintain the maximum number.
- C. A reset command is required.
- D. There is no option to create more.

Answer: D

NEW QUESTION # 79

What is the primary goal of High Availability in computing environments?

- A. To reduce the efficiency of backup processes
- B. To ensure a system operates at its peak capacity
- C. To minimize downtime and prevent data loss

- D. To maximize system downtime

Answer: C

NEW QUESTION # 80

How do Metro-DR and Regional-DR differ in terms of disaster recovery planning?

- A. Metro-DR is less concerned with geographic diversity
- B. Regional-DR requires less data synchronization
- C. Metro-DR operates over longer distances than Regional-DR
- **D. Metro-DR typically has lower latency and faster recovery times than Regional-DR**

Answer: D

NEW QUESTION # 81

Which statement is true about Cloud Pak for Data SIEM integration?

- A. The Cloud Pak for Data Audit Logging Service explicitly supports the SIEM solutions: Splunk, QRadar, and Log360.
- B. Auditing logging is supported by all Cloud Pak for Data components and services.
- C. If a connection to multiple SIEM systems has been established, the same method must be used to connect to each SIEM system.
- **D. The Cloud Pak for Data Audit Logging Service uses Fluentd input streams to forward and export audit records.**

Answer: D

Explanation:

Cloud Pak for Data provides audit logging capabilities via the Audit Logging Service, which uses Fluentd to collect, process, and forward log data to external SIEM solutions. Fluentd input streams are configured to export audit records in real time. While Splunk and QRadar are common integrations, Log360 is not explicitly listed in the official supported list. Each SIEM connection can be configured independently, and while audit logging is widely supported, it may not be enabled by default for every single service- therefore only option B is correct.

NEW QUESTION # 82
