

Test H19-301_V3.0 Cram Pdf & H19-301_V3.0 Test Dump

[Pass Huawei H19-301_V4.0 Exam | Latest H19-301_V4.0 Dumps & Practice Exams - Cert007](#)

1.VXLAN uses MAC-in-UDP encapsulation to extend Layer 2 networks. It encapsulates Ethernet frames into IP packets for routing, without considering the MAC addresses of VMs. In addition, routed networks are not limited by the network architecture and support large-scale scalability. VM migration through routed networks is also not limited by the network architecture.

- A. True
- B. False

Answer: A

2.The free mobility solution allows a user on a campus network to obtain the same network access policy regardless of the user's location and IP address. When configuring a policy, the administrator does not need to pay attention to the IP address ranges of different users, but only needs to focus on the logical access relationships between users and servers.

- A. True
- B. False

Answer: A

3.What are the characteristics of Segment Routing?

- A. Its deployment is dependent on the controller.
- B. It introduces the source routing mechanism conforming to SDN.
- C. Its deployment is dependent on LDP and RSVP.
- D. It reduces the number of protocols and extends IGP/BGP to support label distribution without depending on LDP or RSVP.

Answer: B,D

4.If only one firewall is deployed at the egress of the network, a failure on the firewall will affect services on the entire network. To improve network reliability, you can deploy two or more firewalls and set up a stack system. Member firewalls do not need to be managed independently. You only need to configure the stack system.

- A. True
- B. False

Answer: A

5.Which of the following statements are true about the underlay and overlay concepts on a data center network? (Select all that apply)

- A. After implementing overlay technology, there is no need to deploy routing protocols or static routes on the underlay network.
- B. An underlay network is a bearer network consisting of various physical devices, such as switches and VAS devices.
- C. Overlay technology is a tunneling method that encapsulates service packets and transmits them transparently over the underlay network, with the origin recovered after reaching their destination.
- D. Overlay is a software-defined logical network built on the underlay network using VXLAN.

Answer: B,C,D

6.The campus WAN interconnection solution is a sub-solution provided in the Cloud Campus Solution for

Because of the unremitting effort of our professional experts, our H19-301_V3.0 exam engine has the advantages of high quality, validity, and reliability. And the warm feedbacks from our customers all over the world prove that we are considered the most popular vendor in this career. our H19-301_V3.0 Study Materials are undeniable excellent products full of benefits, so they can spruce up our own image. Besides, our H19-301_V3.0 practice braindumps are priced reasonably, so we do not overcharge you at all.

Huawei H19-301_V3.0 (HCSA-Presales-IP Network Certification V3.0) Exam is a certification offered by Huawei Technologies Co. Ltd. HCSA-Presales-IP Network Certification V3.0 certification is designed for individuals who wish to demonstrate their knowledge and skills in IP network pre-sales. H19-301_V3.0 exam covers a wide range of topics related to IP network pre-sales, including basic network concepts, network planning and design, network deployment and maintenance, and network security. H19-301_V3.0 exam is intended for individuals who have a basic understanding of IP networks and who wish to develop their skills in network pre-sales.

The H19-301_V3.0 Exam covers a range of topics including network technologies and solutions, sales skills, and Huawei IP network products. H19-301_V3.0 exam is designed to test candidates' ability to understand and explain network technologies, design and plan network solutions, and provide technical support to customers. Candidates are also expected to have good communication skills and be able to work effectively with customers and colleagues.

Huawei H19-301_V3.0 Test Dump, H19-301_V3.0 Valid Test Fee

Our windows software of the H19-301_V3.0 study materials are designed to simulate the real test environment. If you want to experience the real test environment, you must install our H19-301_V3.0 preparation questions on windows software. Also, it only support running on Java environment. If you do not install the system, the system of our H19-301_V3.0 Exam Braindumps will automatically download to ensure the normal operation.

Huawei H19-301_V3.0 Exam covers a wide range of topics, including IP network fundamentals, network planning and design, Huawei IP network products, and network troubleshooting. H19-301_V3.0 exam consists of multiple-choice questions that assess the candidate's understanding of these topics. HCSA-Presales-IP Network Certification V3.0 certification is aimed at individuals who are involved in the presales process of IP network solutions, including sales engineers, technical support engineers, and network planners.

Huawei HCSA-Presales-IP Network Certification V3.0 Sample Questions (Q136-Q141):

NEW QUESTION # 136

MACsec is an important feature to make sure security and reliability. Which one is MACsec corresponding standard?

- A. 802.1ae
- B. 802.1ab
- C. 802.1p
- D. 802.1at

Answer: A

Explanation:

MACsec (Media Access Control Security) is a Layer 2 encryption protocol designed to secure Ethernet communications. It provides confidentiality, integrity, and replay protection for data transmitted over wired networks. The IEEE standard corresponding to MACsec is 802.1AE, which defines the protocol's mechanisms for encrypting and authenticating Ethernet frames. Other options refer to unrelated standards:

802.1ab: Defines Link Layer Discovery Protocol (LLDP) for network discovery.

802.1p: Specifies priority tagging for Quality of Service (QoS).

802.1at: Defines Power over Ethernet Plus (PoE+).

References:

HCSA-Presales-IP Network Study Guide, Section: "MACsec and Network Security." IEEE 802.1AE Standard Documentation.

NEW QUESTION # 137

Which of the following are factors affecting the wireless rate (throughput) of a Wi-Fi AP?

- A. CPU performance
- B. Spatial stream
- C. SNR
- D. Frequency bandwidth

Answer: A,B,C,D

Explanation:

The wireless rate (throughput) of a Wi-Fi AP is influenced by several factors. Below is an analysis of each option:

* CPU performance : The AP's CPU processes data packets and manages wireless communication.

Higher CPU performance enables faster packet processing and better throughput.

* Spatial stream : Wi-Fi uses multiple spatial streams (MIMO) to transmit data simultaneously. More spatial streams increase the data rate and improve throughput.

* Frequency bandwidth : The bandwidth of the frequency channel determines how much data can be transmitted at once. For example, 160 MHz channels provide higher throughput than 20 MHz channels.

* SNR (Signal-to-Noise Ratio) : A higher SNR indicates a stronger signal relative to noise, resulting in better data transmission quality and higher throughput. Poor SNR leads to retransmissions and reduced performance.

All four factors significantly impact the wireless rate of a Wi-Fi AP.

NEW QUESTION # 138

Huawei Fabric Insight solution supports 75+ fault case numbers, TCP/UDP/RCE full-scenario traffic visibility, fault isolation and recovery.

- A. False
- B. True

Answer: B

NEW QUESTION # 139

Which of the following network quality monitoring technologies are supported by Huawei devices?

- A. TWAMP
- B. BFD
- C. iFIT
- D. NQA

Answer: A,B,C,D

NEW QUESTION # 140

CE16800 is the main sales model in 2020. What are its advantages for friends? (Multiple choice)

- A. Support standard NSH business chain
- B. Supports connection with controllers from other manufacturers
- C. Self-developed chip (with third-party test report)
- D. Micro-segmentation
- E. AI engine

Answer: A,C,D,E

NEW QUESTION # 141
