## SAP Certified Associate - Positioning SAP Business AI Solutions as part of SAP Business Suite Sample Questions (Q60-Q65):

### NEW QUESTION # 60

How does SAP AI support sales and marketing automation?

Please choose the correct answer.

Response:

- A. By providing AI-driven lead scoring and customer insights
- B. By managing cloud infrastructure
- C. By generating payroll reports
- D. By automating workforce planning

**Answer: A**

### NEW QUESTION # 61

A retail business wants to use AI for automating customer support while ensuring personalized customer interactions. Which SAP AI solutions should they implement?

There are 3 correct answers to this question.

Response:

- A. SAP Predictive Analytics
- B. SAP Conversational AI
- C. SAP AI Business Service
- D. SAP AI for Customer Experience
- E. SAP Blockchain for Business

**Answer: B,C,D**

### NEW QUESTION # 62

What is the primary objective of SAP Responsible Design and Production? Please choose the correct answer.

- A. Enhance customer relationship management
- B. Support circular economy strategies
- C. Automate payroll processing
- D. Manage employee benefits

**Answer: B**

Explanation:

SAP Responsible Design and Production is designed to promote sustainable product development and manufacturing, with a focus on circular economy principles. The correct answer is "Support circular economy strategies," as this is the primary objective of the solution.

SAP documentation states: "SAP Responsible Design and Production helps companies design and produce products sustainably by supporting circular economy strategies. It enables organizations to optimize resource use, reduce waste, and integrate sustainability into product lifecycles." This solution supports "tracking material flows, assessing environmental impacts, and ensuring compliance with sustainability regulations," enabling companies to adopt practices like recycling and reuse. For example, it helps manufacturers "design products with end-of-life recycling in mind," aligning with circular economy goals.

The incorrect options are unrelated to SAP Responsible Design and Production. Automating payroll processing is an HR function, typically handled by SAP SuccessFactors. Enhancing customer relationship management is a marketing function, not related to product design. Managing employee benefits is also an HR task. SAP Responsible Design and Production's focus on sustainability, as part of SAP's sustainability portfolio, confirms its role in supporting circular economy strategies.

## NEW QUESTION # 63

(Which of the following makes SAP a trusted AI partner? Note: There are 3 correct answers to this question.)

- A. Unparalleled collaborations with leading general-purpose AI technology providers
- B. The AI use case 'Risk Classification & Assessment Process' within the SAP AI Ethics Handbook
- C. Commitment to data protection, privacy, security, and ethics
- D. Affirming the guiding principles of the UNESCO Recommendation on the Ethics of AI
- E. Unique access to, and understanding of, business data

**Answer: B,C,D**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract: SAP is positioned as a trusted AI partner due to its strong commitment to data protection, privacy, security, and ethics, its affirmation of the UNESCO Recommendation on the Ethics of AI, and the inclusion of the 'Risk Classification & Assessment Process' as an AI use case in the SAP AI Ethics Handbook, which ensures structured risk reviews and ethical AI development.

Exact extracts supporting this:

Commitment to data protection, privacy, security, and ethics: "SAP's AI Ethics efforts are guided by a multi-stakeholder approach and a strong governance framework, coordinated by the AI Ethics Office. The approach is based on SAP's Global AI Ethics Policy and development standards for responsible AI innovation... Principles include proportionality and do not harm, safety and security, fairness and non-discrimination, sustainability, right to privacy and data protection, human oversight and determination, transparency and explainability, responsibility and accountability, awareness and literacy, and multistakeholder and adaptive governance and collaboration."sap.com "SAP prioritizes data privacy and security, ensuring customer data remains safeguarded within its ecosystem. Customer data is not shared with third-party large language model (LLM) providers for training their models."sap.com Affirming the guiding principles of the UNESCO Recommendation on the Ethics of AI: "Our guiding principles are based on UNESCO's Recommendation on the Ethics of Artificial Intelligence."sap.com "...affirming the 10 guiding principles of the UNESCO Recommendation on the Ethics of Artificial Intelligence. These principles cover proportionality and do no harm, safety and security, fairness and non-discrimination, sustainability, right to privacy and data protection, human oversight and determination, transparency and explainability, responsibility and accountability, awareness and literacy, and multi-stakeholder and adaptive governance and collaboration."news.sap.com "SAP's AI Ethics policy is based on the UNESCO Recommendation on the Ethics of Artificial Intelligence, ensuring human-centered AI systems that respect and augment humans while retaining human oversight."sap.com The AI use case 'Risk Classification & Assessment Process' within the SAP AI Ethics Handbook: "The assessment process enables SAP to conduct a structured review that targets critical AI risks. Our product standard risk management framework helps to ..." "Risk Classification & Assessment Process Flowchart."sap.com "...the establishment of our AI use case 'Risk Classification & Assessment Process' within our AI Ethics Handbook."learning.sap.com Other options are incorrect because:

Option B: While SAP leverages business data responsibly and has understanding through grounding AI in customer data, it does not claim "unique access" as data usage is governed by customer agreements and opt-outs, emphasizing shared rather than exclusive access.

Option D: SAP has collaborations with AI providers like Cohere, Microsoft, and others, but these are described as strategic partnerships rather than "unparalleled," with focus on ecosystem integration rather than being a primary trust factor in ethics contexts. Reference from Positioning SAP Business AI Solutions as part of SAP Business Suite documents or Study Guide: Derived from the official SAP AI Ethics Handbook and related product pages, as well as the SAP Learning course "Discovering SAP Business AI," which highlights responsible AI practices in positioning SAP Business AI within the SAP Business Suite. The UNESCO affirmation and risk assessment process are key elements in the C\_BCBAL\_2502 study materials for ethical AI positioning.

## NEW QUESTION # 64

What are the key use cases of SAP AI in manufacturing?

There are 3 correct answers to this question.

Response:

- A. Automated quality control
- B. AI-driven predictive maintenance
- C. AI-powered production scheduling
- D. Manual equipment failure analysis
- E. Handwritten production reports

**Answer: A,B,C**

## NEW QUESTION # 65
