免費下載JN0-336考題 - JN0-336新版題庫上線

PDFExamDumps始終致力於為客戶提供高品質的學習資料，來提高考生一次性通過Juniper JN0-336考試的概率，這是考生獲取認證最佳捷徑。我們的JN0-336認證PDF和軟件版本具有最新更新的問題解答，涵蓋了所有考試題目和課題大綱，在線測試引擎測試可以幫助您準備并熟悉實際考試情況。在您決定購買我們產品之前，您可以先免費嘗試Juniper JN0-336 PDF版本的DEMO，此外，我們還提供全天24/7的在線支持，以便為客戶提供最好的便利服務。

最新的 JNCIS-SEC JN0-336 免費考試真題 (Q66-Q71):

問題 #66

You are deploying a new SRX Series device and you need to log denied traffic.
In this scenario, which two policy parameters are required to accomplish this task? (Choose two.)

- A. count
- B. session-close

- C. deny
- D. session-init

答案: B,C

問題 #67

Which two statements about SRX Series device chassis clusters are true? (Choose two.)

- A. Chassis cluster member devices must be the same model.
- B. Each chassis cluster member device can host active redundancy groups
- C. Each chassis cluster member requires a unique cluster ID value.
- D. Redundancy group 0 is only active on the cluster backup node.

答案: A,B

解題說明:

In a chassis cluster, both nodes can host active redundancy groups. The active redundancy groups can be distributed between the two nodes, depending on the configuration and failover status, allowing each node to handle traffic for different sets of services or interfaces.

For the chassis clustering to function correctly, both nodes in the cluster must be of the same model.

This requirement ensures that the hardware capabilities, such as processing power and interface compatibility, are identical, which is crucial for maintaining consistent performance and behavior between cluster nodes.

問題 #68

On an SRX5800, which port is used for chassis cluster out-of-band management?

- A. fxp1
- B. user-defined
- C. ge-0/0/0
- D. Txp0

答案: B

問題 #69

You want to be alerted if the wrong password is used more than three times on a single device within five minutes.

Which Juniper Networks solution will accomplish this task?

- A. Juniper Secure Analytics
- B. Juniper Identity Management Service
- C. Adaptive Threat Profiling
- D. Intrusion Prevention System

答案: A

解題說明:

The Juniper Networks solution that will accomplish the task of alerting if the wrong password is used more than three times on a single device within five minutes is Juniper Secure Analytics (JSA). JSA is a security intelligence platform that collects, analyzes, and correlates network data from various sources, such as firewalls, routers, switches, servers, and applications. JSA can detect and respond to threats, anomalies, and vulnerabilities in real time using rules, offenses, reports, and dashboards. JSA can also integrate with JIMS (Juniper Identity Management Service) to obtain user identity information from Active Directory domains or syslog sources. JSA can use this information to create custom rules that trigger offenses or alerts based on user behavior or activity, such as failed login attempts or password changes.

問題 #70

You are preparing a proposal for a new customer who has submitted the following requirements for a vSRX deployment:

- globally distributed,
- rapid provisioning,
- scale based on demand,
- and low CapEx.

Which solution satisfies these requirements?

- **A. AWS**
- B. VMWare ESXi
- C. Juniper ATP Cloud
- D. Network Director

答案： A

解題說明：

The solution that satisfies the requirements for a vSRX deployment is AWS. AWS (Amazon Web Services) is a cloud computing platform that provides on-demand services such as infrastructure, platform, software, and database as a service. AWS is globally distributed, meaning that it has data centers in multiple regions around the world. AWS also allows rapid provisioning, meaning that you can launch vSRX instances in minutes using preconfigured Amazon Machine Images (AMIs) or custom templates. AWS also enables scaling based on demand, meaning that you can adjust the number and size of vSRX instances according to your network traffic and performance needs. AWS also has low CapEx (capital expenditure), meaning that you only pay for what you use and do not need to invest in hardware or maintenance costs.
