

# 100% Pass Quiz Juniper - Perfect JN0-105 - Exam Junos, Associate (JNCIA-Junos) Blueprint

P.S. Free 2026 Juniper JN0-105 dumps are available on Google Drive shared by Prep4King: <https://drive.google.com/open?id=1YCy2dLbGRqywkfZ1Jjvvp4nn0WJ0rkKJ>

Our JN0-105 guide torrent is compiled by experts and approved by the experienced professionals. They are revised and updated according to the change of the syllabus and the latest development situation in the theory and practice. The language is easy to be understood to make any learners have no learning obstacles and our JN0-105 study questions are suitable for any learners. The software boosts varied self-learning and self-assessment functions to check the results of the learning. The software can help the learners find the weak links and deal with them. Our JN0-105 Exam Torrent boosts timing function and the function to stimulate the exam. Our product sets the timer to stimulate the exam to adjust the speed and keep alert. Our JN0-105 study questions have simplified the complicated notions and add the instances, the stimulation and the diagrams to explain any hard-to-explain contents.

## Juniper JN0-105 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Routing Policy and Firewall Filters: The topic of Routing Policy and Firewall Filters covers routing policy and firewall filters on Junos devices. Furthermore, the topic also deals with routing policies and firewall filters on a Junos device.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>Routing Fundamentals: This topic discusses pointing out basic routing concepts or functionality for Junos devices. Moreover, the topic also describes configuring or monitoring basic routing elements for a Junos device.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>Operational Monitoring and Maintenance: Different methods of monitoring or maintaining Junos devices are identified in this topic. Lastly, it discusses monitoring or maintenance procedures for a Junos device.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>User Interfaces: This topic delves into identifying the concepts, operation, or functionality of the Junos user interface.</li></ul>

## Test Certification Juniper JN0-105 Cost | JN0-105 Brain Exam

Experts at Prep4King strive to provide applicants with valid and updated Juniper JN0-105 exam questions to prepare from, as well

as increased learning experiences. We are confident in the quality of the Juniper JN0-105 preparational material we provide and back it up with a money-back guarantee. Prep4King provides Juniper JN0-105 desktop-based practice software for you to test your knowledge and abilities. The JN0-105 desktop-based practice software has an easy-to-use interface.

## Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q46-Q51):

### NEW QUESTION # 46

An administrator configures a router's interface with an IPv4 address and subnet mask. The administrator also confirms that this interface is in an up state.

In this scenario, which two route types are created on the local router? (Choose two.)

- A. a local route
- B. a static route
- C. a dynamic route
- D. a direct route

**Answer: A,D**

Explanation:

When an interface on a router is configured with an IPv4 address and is in an up state, two types of routes are automatically created in the routing table: a local route and a direct route, making B and D the correct answers.

The local route represents the interface's IP address itself, indicating that the router can directly receive packets addressed to this IP.

The direct route represents the subnet or network segment to which the interface is connected, indicating that the router can directly forward packets to destinations within this subnet.

### NEW QUESTION # 47

Which command displays all IPv6 routes in the default routing instance?

- A. show route table inet6.0
- B. show route table inet.1
- C. show route table inet6.1
- D. show route table inet.0

**Answer: A**

Explanation:

The show route table inet6.0 command displays all IPv6 routes in the default routing instance. In Junos OS, the routing table for IPv6 addresses is referred to as inet6.0, whereas inet.0 is used for IPv4 unicast routes. The other options do not correspond to the correct IPv6 routing table.

Juniper official documentation: Junos OS Routing Tables Overview.

### NEW QUESTION # 48

In the Junos OS, which keyboard shortcut allows you to move to the start of the line?

- A. Ctrl+k
- B. Ctrl+w
- C. Ctrl+e
- D. Ctrl+a

**Answer: D**

Explanation:

In the Junos OS command-line interface (CLI), the keyboard shortcut Ctrl+a is used to move the cursor to the start of the line. This is a common convention in many command-line environments and text editors, providing a quick way to navigate to the beginning of the current command or line of text without having to use the arrow keys. This can be particularly useful for making quick edits to commands or for navigating long lines of text more efficiently.

### NEW QUESTION # 49

Exhibit

```
[edit system archival] user@router# show configuration {
transfer-on-commit; archive-sites {
"scp://user@172.15.100.2 : /archive" password ## SECRET-DATA
"ftp://user@10.210.9.178:/archive" password "$9..."; ## SECRET-DATA
}
```

Referring to the exhibit, where are the configuration backup files stored?

- A. Files are stored to the SCP site and the FTP site simultaneously.
- B. Files are stored to the SCP site and the FTP site in a round-robin manner.
- C. Files are stored to the SCP site but if the transfer fails, then to the FTP site.
- D. Files are stored to any site as selected by Junos internally.

**Answer: A**

Explanation:

In Junos OS, the archival configuration under [edit system] allows for the automatic backup of configuration files to designated locations upon commit. When multiple archive-sites are specified, as shown in the exhibit with both SCP and FTP sites listed, the device does not choose between them or use them in a round-robin manner. Instead, it attempts to transfer the configuration backup files to all specified sites simultaneously upon each commit. This ensures redundancy and increases the likelihood that a backup will be successfully stored even if one of the transfer methods or destinations fails.

### NEW QUESTION # 50

Click the Exhibit button.

Referring the exhibit, what does the highlighted number indicate?

- A. cost is 5
- B. hop count is 5
- C. metric is 5
- D. route preference is 5

**Answer: D**

Explanation:

In the exhibit shown, the highlighted number next to the route type (Static) within the square brackets indicates the route preference, also known as the administrative distance. In Junos, the route preference is a value that determines the priority of the route source. Lower numbers indicate a higher priority when the routing table is being calculated. The route preference is used to select the best route when multiple paths to the same destination exist from different routing sources. The number 5 is unusually low for a static route by default, suggesting it has been manually configured to override other route types.

### NEW QUESTION # 51

.....

In fact, on one side, our JN0-105 training braidumps can help you pass the exam and win the certification. On the othe side, i think it is even more important, that you can apply what you have learned on our JN0-105 Practice Guide into practices. Your speed of finishing the task will be greatly elevated. Everting will take positive changes because of our JN0-105 exam materials. Please cheer up for yourself.
