156-315.82 Cert Exam - 156-315.82 Actual Questions

Infinite striving to be the best is man's duty. We have the responsibility to realize our values in the society. Of course, you must have enough ability to assume the tasks. Then our 156-315.82 learning quiz can give you some help. First of all, you can easily pass the 156-315.82 Exam and win out from many candidates for our 156-315.82 study materials are the most effective exam materials in the market. Secondly, you can also learn a lot of the specialized knowledge at the same time.

CheckPoint Check Point Certified Security Expert - R82 Sample Questions (Q111-Q116):

NEW QUESTION # 111

What is insights?

- A. An application that can show internal configuration for each ElasticXL members
- B. An excellent tool for discovering network names in environment
- C. A command that gives consolidated information about threats that were discovered in internal network
- **D. An excellent monitoring dashboard for Scalable Platforms**

Answer: D

Explanation:

Insights is a monitoring dashboard designed for Scalable Platforms like ElasticXL, providing administrators with real-time visibility into cluster performance, resource utilization, and overall system health.

NEW QUESTION # 112

Any VPN Gateway that can establish a direct VPN Tunnel with any Peer Gateway is member of which VPN Community

- A. Any Community
- B. Star Community
- C. Direct Community
- **D. Mesh Community**

Answer: D

Explanation:

In a Mesh Community, every VPN gateway can establish a direct tunnel with every other member, enabling full any-to-any connectivity between all participating gateways.

NEW QUESTION # 113

What is true about the magg1 and Sync interfaces on an ElasticXL Cluster?

- A. magg1 is a bonded interface, Sync is also a bonded interface
- **B. magg1 is a bonded interface, Sync is an individual Sync Port**
- C. magg1 is a secondary interface of the Mgmt Port, Sync is the Sync port
- D. magg1 is only available in Maestro and is a disabled and unused port in ElasticXL. Sync is the Sync Port

Answer: B

Explanation:

In an ElasticXL Cluster, magg1 functions as a bonded management aggregate interface that combines multiple links for management connectivity and redundancy, while the Sync interface is a dedicated individual port used specifically for state synchronization between cluster members.

NEW QUESTION # 114

What can be upgraded using Central Deployment?

- A. Gateways, Cluster Members
- B. Only Gateways (no Clusters)
- C. Security Management Servers, Dedicated Log Servers, Gateways, Cluster Members
- **D. Security Management Servers, Gateways, Cluster Members**

Answer: D

Explanation:

Central Deployment allows administrators to upgrade Security Management Servers, individual Gateways, and Cluster members in a coordinated manner, ensuring consistent software versions across the deployment.

NEW QUESTION # 115

What is the command to get the state information of the interfaces of a cluster node?

- A. ifconfig -a -clx
- B. get cluster elastic interfaces
- C. show interfaces -a
- **D. show cluster info interfaces**

Answer: D

Explanation:

The command show cluster info interfaces is used on a cluster member to display the state and status of all interfaces, providing detailed information about connectivity, sync, and operational status within the cluster.
