ISQI IREB Certified Professional for Requirements Engineering. Foundation Level Sample Questions (Q55-Q60):

NEW QUESTION # 55

Choose the correct sentence about system context.

- A. It is a part of the system environment.
- B. It is synonymous with system boundary.
- C. It is synonymous with system environment.
- D. It is a part of the system boundary.

Answer: A

NEW QUESTION # 56

A version number is typically composed of which components? (Select 2 answers.)

- A. Increment
- B. ID
- C. Version
- D. Day/month
- E. Serial number

Answer: A,C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The handbook states that version identifiers usually have at least two hierarchical parts: a version (major) and an increment (minor). For example, in "3.2", 3 is the version and 2 the increment; further qualifiers (build, date) may optionally be added. IDs, serial numbers or dates can be stored as additional attributes but are not the fundamental composition of the version number itself. Therefore, the standard structure is version plus increment, corresponding to options A and B.

NEW QUESTION # 57

You are employed as a requirements engineer in a company that develops control software for electric motors.

During your work it becomes increasingly evident that the developers are very well aware of the necessary requirements, even though the requirements are not documented in their entirety. Nevertheless, you decide to document requirements systematically.

Which two of the following arguments justifies this step? (2 Points)

Documenting requirements systematically is important, because...

- A. ... documented requirements are also good requirements.
- B. ... non-documented requirements are difficult to negotiate between the stakeholders.
- C. ... implementation without documented requirements is not possible.
- D. ... the coverage of the requirements by means of test cases cannot be checked.

Answer: B,D

NEW QUESTION # 58

Choose the options that present a gathering technique for elicitation.

- A. Brainstorming
- B. Scenarios and storyboards
- C. Apprenticing
- D. Workshops
- E. Analogy technique

Answer: C,D

NEW QUESTION # 59

You are assigned to carry out and document a system and context delimitation for a software system that is to be developed. What diagram is least suited for the representation of the delimitation? (1 Point)

- A. Statediagram
- B. Context diagram with data flows
- C. Use case diagram
- D. Class diagram

Answer: A

NEW QUESTION # 60
