EC-Council Certified CISO (CCISO) exam tests hired dedicated staffs to update the contents of the data on a daily basis. Our industry experts will always help you keep an eye on changes in the exam syllabus, and constantly supplement the contents of 712-50 test guide. Therefore, with our study materials, you no longer need to worry about whether the content of the exam has changed. You can calm down and concentrate on learning. At the same time, the researchers hired by 712-50 Test Guide is all those who passed the EC-Council Certified CISO (CCISO) exam, and they all have been engaged in teaching or research in this industry for more than a decade. They have a keen sense of smell on the trend of changes in the exam questions. Therefore, with the help of these experts, the contents of 712-50 exam questions must be the most advanced and close to the real exam.

EC-COUNCIL 712-50 Certification Exam is an essential credential for individuals who aspire to become Certified Chief Information Security Officers. EC-Council Certified CISO (CCISO) certification program provides a comprehensive and practical approach to information security management, and is recognized by organizations around the world. By obtaining this certification, individuals can demonstrate their knowledge and expertise in the field of information security and enhance their career prospects.

EC-Council Certified CISO 712-50 Exam

EC-Council Certified CISO 712-50 Exam which is related to EC-Council Certified CISO certification. This 712-50 exam validates the ability to a candidate to implement, manage and maintain an information security governance program, Coordinate the application of information security strategies, plans, policies, and procedures to reduce regulatory risk, control Information Security Management, Identify, negotiate and manage vendor agreement and community, Identify the basic network architecture, models, protocols and components such as routers and hubs that play a role in network security.

The EC-Council Certified CISO (CCISO) exam is a globally recognized certification program that is designed to assess an individual's knowledge and expertise in the field of information security management. EC-Council Certified CISO (CCISO) certification program is specifically targeted towards experienced information security professionals who are looking to take their career to the next level by becoming a Chief Information Security Officer (CISO).

100% Pass Quiz EC-COUNCIL - 712-50 - Valid Valid EC-Council Certified CISO (CCISO) Exam Topics

The EC-COUNCIL 712-50 practice exam material is available in three different formats i.e EC-COUNCIL 712-50 dumps PDF format, web-based practice test software, and desktop 712-50 practice exam software. PDF format is pretty much easy to use for the ones who always have their smart devices and love to prepare for 712-50 Exam from them. Applicants can also make notes of printed EC-Council Certified CISO (CCISO) (712-50) exam material so they can use it anywhere in order to pass EC-COUNCIL 712-50 Certification with a good score.

EC-COUNCIL EC-Council Certified CISO (CCISO) Sample Questions (Q470-Q475):

NEW QUESTION # 470

An IT auditor has recently discovered that because of a shortage of skilled operations personnel, the security administrator has agreed to work one late night shift a week as the senior computer operator. The most appropriate course of action for the IT auditor is to:

- A. Agree to work with the security officer on these shifts as a form of preventative control.
- B. Review the system log for each of the late night shifts to determine whether any irregular actions occurred.
- C. Develop a computer assisted audit technique to detect instances of abuses of the arrangement.
- **D. Inform senior management of the risk involved.**

Answer: D

NEW QUESTION # 471

Scenario: Your company has many encrypted telecommunications links for their world-wide operations. Physically distributing symmetric keys to all locations has proven to be administratively burdensome, but symmetric keys are preferred to other alternatives. Symmetric encryption in general is preferable to asymmetric encryption when:

- A. The number of unique communication links is large
- B. The distance to the end node is farthest away
- C. The volume of data being transmitted is small
- **D. The speed of the encryption / deciphering process is essential**

Answer: D

Explanation:

ECCouncil 712-50 : Practice Test

NEW QUESTION # 472

An example of professional unethical behavior is:

- A. Storing client lists and other sensitive corporate internal documents on a removable thumb drive
- B. Sharing copyrighted material with other members of a professional organization where all members have legitimate access to the material
- C. Gaining access to an affiliated employee's work email account as part of an officially sanctioned internal investigation
- **D. Copying documents from an employer's server which you assert that you have an intellectual property claim to possess, but the company disputes**

Answer: D

NEW QUESTION # 473

The purpose of NIST SP 800-53 as part of the NIST System Certification and Accreditation Project is to establish a set of standardized, minimum security controls for IT systems addressing low, moderate, and high levels of concern for

- A. Assurance, Compliance and Availability
- B. International Compliance
- **C. Confidentiality, Integrity and Availability**
- D. Integrity and Availability

Answer: C

Explanation:

Purpose of NIST SP 800-53:

NIST SP 800-53 defines standardized, minimum security controls to ensure IT systems maintain confidentiality, integrity, and availability (CIA).

Why This is Correct:

The CIA triad is the cornerstone of information security, and NIST SP 800-53 ensures these principles are addressed across low, moderate, and high-risk levels.

Why Other Options Are Incorrect:

* B. Assurance, Compliance, and Availability: Assurance and compliance are not core focuses.

- * C. International Compliance: NIST standards are primarily U.S.-focused.
- * D. Integrity and Availability: Leaves out confidentiality, a critical component.

References:

NIST SP 800-53 is foundational in EC-Council training for understanding how to establish controls to address the CIA triad effectively.

NEW QUESTION # 474

You are having a penetration test done on your company network and the leader of the team says they discovered all the network devices because no one had changed the Simple Network Management Protocol (SNMP) community strings from the defaults. Which of the following is a default community string?

- A. Read
- **B. Public**
- C. Administrator
- D. Execute

Answer: B

Explanation:

The Simple Network Management Protocol (SNMP) uses "community strings" as a form of authentication. The default read-only string for SNMP is often set to "Public".

* SNMP Overview:

* SNMP is used for monitoring and managing network devices such as routers, switches, and servers.

* Default Community Strings:

* Default strings like "Public" (read-only) and "Private" (read-write) are well-known and often targeted by attackers if not changed.

* Penetration Test Findings:

* Discovering devices through SNMP indicates improper security practices where default settings haven't been updated, making devices vulnerable.

* Mitigation:

* Change SNMP community strings to strong, unique values.

* Restrict SNMP access to trusted IP ranges.

* Configuration Management: Emphasizes updating default settings as a baseline security measure.

* Penetration Testing Insights: Findings like this are critical for improving network security posture, aligning with EC-Council's penetration testing methodologies.
