Our products are the masterpiece of our company and designed especially for the certification. Our COH-285 Study Materials have gone through strict analysis and verification by the industry experts and senior published authors. The clients trust our products and place great hopes on our COH-285 study materials.

Cohesity Certified Protection Professional - NetBackup Appliances Sample Questions (Q28-Q33):

NEW QUESTION # 28

An administrator is attempting to configure a new backup policy using synthetic backups. When creating a new full backup schedule, the Synthetic backup option is greyed out and therefore unable to be selected.

What must the administrator do to the policy to make the Synthetic backup option available for selection?

- A. select a backup destination that supports synthetic backups
- B. create a differential or cumulative incremental backup schedule
- C. create a full backup schedule with Accelerator forced rescan enabled
- D. enable Collect true image restore information with move detection

Answer: D

NEW QUESTION # 29

Where can an administrator configure cloud storage throttling?

- A. NetBackup Management > Storage > Storage Unit > Properties of the cloud storage unit
- B. NetBackup Management > Host Properties > Clients > Scalable Storage
- C. NetBackup Management > Host Properties > Media Servers > Scalable Storage

- D. NetBackup Management > Host Properties > Master Servers > Scalable Storage

Answer: C

NEW QUESTION # 30

What are the steps involved in configuring AdvancedDisk storage in NetBackup?

- A. Configuring the storage tiering and replication options for AdvancedDisk storage
- B. Creating a new disk pool and configuring a storage unit group
- C. Specifying the AdvancedDisk storage path and disk group parameters
- D. Defining the storage lifecycle policy and retention period for backup data

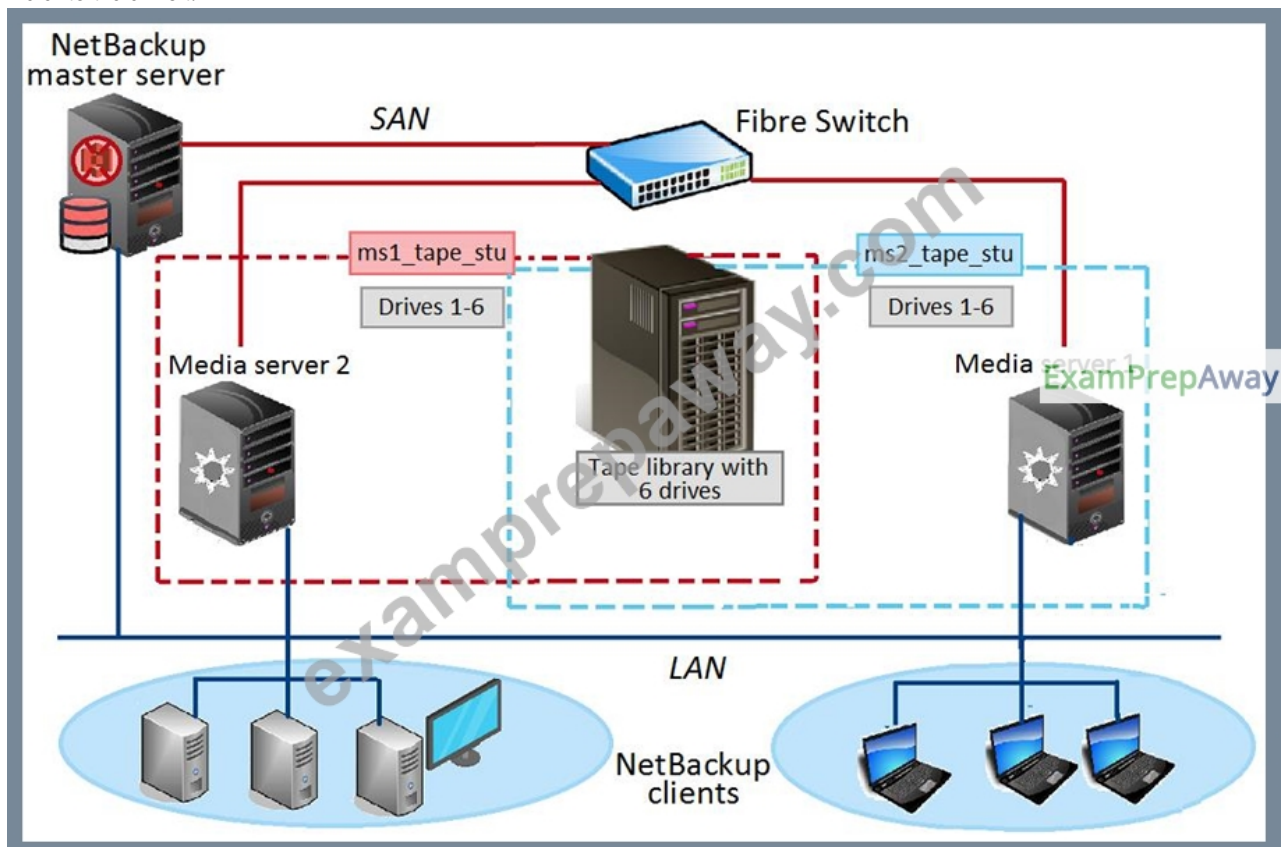

Answer: C

Explanation:

(To configure AdvancedDisk storage in NetBackup, you need to specify the AdvancedDisk storage path and disk group parameters, including the disk type, RAID level, and capacity.)

NEW QUESTION # 31

Refer to the exhibit.

Two media servers, sharing a library with 6 tape drives, exist in the NetBackup environment displayed in the exhibit. Both weekly Full and daily Differential Incremental backups need to run for the clients and each schedule has a different retention period. Because of network topology, some clients back up to Media server 1 and some back up to Media server 2. The environment suffers from multiple status 96 failures during the backup window.

How can the administrator minimize the number of failures?

- A. enable backups to span tape media
- B. configure media multiplexing
- C. increase the "Media unmount delay"
- D. enable media sharing

Answer: D

NEW QUESTION # 32

Which of the following is NOT a task that can be performed using Appliance Web Console?

- A. Creating policies
- B. Viewing reports
- C. Managing clients
- D. Backing up data

Answer: A

NEW QUESTION # 33

.....
